Mr. H. Lamplough,  
North Platte, Nebr.

Dear Sir:

The examination of the sample of water which you recently sent to State Health Inspector for examination gave the following results:

No. of bacteria present per c. c. 10

There were no colon bacilli present. There was no evidence of contamination from any source whatever. The number of bacteria present was exceedingly small. One rarely finds a sample of water which contains so few bacteria and it is only in the rarest occasions that so few are encountered in a sample sent from a distance. This examination shows this water to be exceedingly good for domestic purposes. In my opinion this water at this examination was made was absolutely above suspicion.

Very truly yours,

H. H. WAITE

**U. S. Land Office Moves.**

The United States land office opened for business yesterday morning in its new quarters on the third floor of the federal building. The office occupies all the rooms on the floor, the main working rooms and the offices of the register and receiver being situated on the east side, while the west portion is taken up by the large contest room and the storage room in which records of the office for the past forty years are stored.

The counters for the working rooms have not yet arrived, and lacking these the force is somewhat handicapped. Within the next thirty days it is expected that the counters will have arrived and the offices will then be finely equipped.

**Concert by Band.**

Notice to Water Consumers.

The notice of water consumers is called to Sec. 3 of the ordinance where it states that "Bills must be paid quarterly on the first day of each quarter and 5 per cent shall be added to all bills which are delinquent more than 20 days". April 20th is the last day of the quarter on which water bills can be paid without having the 5 per cent added. All bills paid after April 20th will have 5 per cent added to them as the ordinance provides. Please bear this in mind and be prompt so it will not be necessary to make this extra charge.

As we have more water this year and larger pumping capacity there will only be four rules put into force in regard to sprinkling lawns but these will be enforced.

Rule 1. Consumers may sprinkle lawns on any day in the week from 5 a. m. to 9 p. m.

Rule 2. All water for lawns must be used through a sprinkler or nozzle with 1/2 inch outlet and must not be run through hose without a nozzle unless consumer is on a meter and paying meter rates.

Rule 3. All lawn sprinklers and other outlets must be shut off whenever the fire whistle blows for a fire and must remain closed until notice is given that the fire is out by one long blast of the fire whistle.

Rule 4. The fire whistle will be blown at 9 p. m. and all lawn sprinklers and other outlets must be shut off at that time.

The penalty for violation of any of the above rules will be a fine of \$1.00, the consumer ordered to put in a meter and pay meter rates or the shutting off of the water.

There will be times when it will be necessary to shut off certain portions of the city for a short time in order to make repairs or new connections. As far as practicable notice of such shut-off will be given in advance but as this cannot always be given in advance I make the following statements: Should you find the water shut off and you have a hot fire in the stove, open the hot water faucet and allow it to remain open until water is turned on again. This allows the steam to escape and will prevent damage to your stove or piping. Should water remain off over 1/2 hour call up the water office by phone and we will tell you how much longer the water will be shut off or instruct you what to do.

Kindly report any leaks or dangerous ditches to the water office.

HERSHEY S. WELCH, Water Commissioner.
