"The Best Equipped Laundry in the West"

Interior View of Our Ironing Room

An Economical Laundry WHY

We have spent thousands of dollars in making our plant one of the most complete in the west, but because we have done this we are not compelled to charge an exorbitant price for our work, as we have spent this money putting in the latest labor saving machines. We do not use the hard city water, but have wells of our own from which we pump the Purest Soft Water

for the entire plant. We are not on a meter system, so are not compelled to be careful of water, but on the contrary we change the rinse water several times, probably twice more than we would or could if we were paying for water by the METER SYSTEM.
