

Plight Your Troth In a Fine Diamond.

Nothing can take the place of a diamond when it comes to plighting a troth.

You can never regret the taste and expenditure invested in this fitting seal of your engagement.

To satisfy yourself and the person most directly interested in the matter that the diamonds are above question, buy them of a dealer who is known for his fairness and right methods.

Our business is handled in the same confidential manner you expect of your banker.

DIXON, The Jeweler.

There was a steady increase in the scale of wages paid to labor in this country in the last six years, and this was accomplished in the face of a steady reduction in the working hours of labor. Statistics published by the Department of Labor indicate that labor now is receiving more remuneration for fewer hours of toil than ever before. The figures are based on comparisons of union wage scale agreements, trade union reports and working compacts in central cities throughout the United States from 1907 to 1912.

North Platte on National Highway.

Announcement is made by the Lincoln Highway Association, of Detroit, Michigan, of the selection of a route for a continuous connecting highway between the Atlantic and Pacific oceans to be known as The Lincoln Highway. Starting in New York City the highway passes through Jersey City, Newark and Trenton to Philadelphia, then west to Pittsburgh, through the north central section of Ohio, over to Fort Wayne and South Bend, skirts Chicago, enters Joliet, Rochelle, Sterling and other Illinois cities, reaches Iowa at Clinton and leaves at Council Bluffs. Passes through Omaha and North, Platte goes to Denver and north to Cheyenne, west through Green River and Evanston to Salt Lake City, finds its way into Nevada by way of Tippet's ranch and after reaching Reno, goes to Lake Tahoe, California, finally ending on the Pacific seaboard at Oakland and San Francisco.

This is not intended simply as a highway for automobile travel, but is to be an improved roadway, either of cement or material equally suitable and durable; and the purpose is not simply to create a highway for the convenience of travelers, but to build a truly memorial to the immortal president, Abraham Lincoln.

Will Increase Plant Capacity.

The North Platte Electric Co. has placed an order for one 400-kilowatt engine and generator, direct-connected, to be installed not later than November 15th, in order to handle the increasing load that has been put upon the plant by the steady growth of the town and the new contract made with the railroad company for power and light service at the new round house and coal chutes. This engine and generator more than doubles the present capacity of the plant and will insure adequate service during the coming winter, and at the same time amply providing for reserve power to meet the increasing business which will naturally come with the growth of the city during the next two or three years.
