Here's a Baseball Record.

The North Platte ball team closed the season last Friday and the team disbanded Saturday. During the season the team played forty-two games, winning thirty-eight and losing four, a percentage of 90.5, a record probably not equaled by any other team in the state. The percentage of the pitchers also stood unusually high. Maupin pitched seventeen games and last two; McClure lost two out of thirteen, Miller, Willey and Fritts each pitched two and lost none.

The members of the team were all gentlemanly boys, both on and off the diamond, they all played to win, there was no jealousy and if North Platte secures a berth in the state league next season, we are sure that all the ball enthusiasts would welcome the return of every member of this season's team. Here's hoping the boys may pass a pleasant winter and next season, wherever they play, may they be as successful as during the past season.

Round House Ready Oct. 15th
The date on which the new round house and coal chutes will be placed in service is now named as October 15th. The present round house force is now 130, seventy of whom work days and sixty at night. Foreman McGraw says that when the new round house is in operation this force will need be increased; there may not be any more men employed, but some of the employees who are now classed as shopmen will work at the new round house. Ten thousand dollars' worth of lathes, drills and other machines will be installed, and these will require skilled labor, and the operators will be taken from the shops.

Eventually the round house circle will be completed, and when this is done the space of five stalls will be used as machine shops. This practically means closing up the present shops.

The old round house will be used for storage purposes; engines that are needed for service only in the rush seasons will be kept there instead of left standing on out-of-the-way tracks.

Bread Baked from Occident Flour Wins First Prize at the County Fair. Successful Baking Guaranteed with Occident Flour

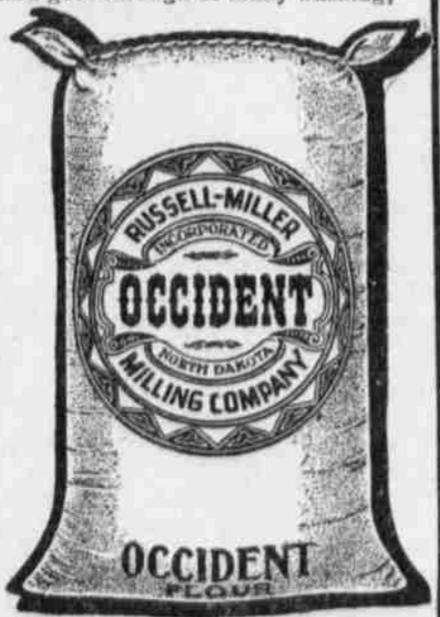

Everybody Can Afford To Pay for The Clean Flour

MOST people think all flour is clean because it looks clean. When wheat comes to the mill the crease in the wheat kernel is full of dirt. Unless every kernel is washed, and scoured, and the flour thoroughly purified by the most modern machinery, the dirt is ground up with the wheat, remains in the flour, and goes into the bread. You then pay for the dirt in the flour, so much per pound, and of course the dirt has no food value. Bread made from cheap flour which is not clean contains less nourishment,—it gets stale quicker and costs the family more in the end than bread made from higher priced flour.

The Guaranteed Flour OCCIDENT

is made from such high quality wheat and goes through so many washing, scouring and purifying processes that we are able to put a Money-Back Guarantee in every sack. We guarantee OCCIDENT Flour to make whiter, lighter, better tasting bread, biscuit, cake and pastry than any other flour, and more of it per sack. If it fails to please you for all baking, your money will be refunded without argument.

Costs More —Worth It
OCCIDENT bread, because of its extra cleanliness, stays fresh and sweet longer than other bread. You can bake a double batch. This saves the work and fuel expense of many baking days. Every housewife should test the extra great advantages of OCCIDENT Flour.
