Safety First Car to Tour the Country Pursuing its aggressive campaign for greater safety in motoring and general use of the public highways, the Safety First society of New York has hit upon a decidedly original and unique idea. This is to be a nation wide touring campaign with an automobile equipped with reliable devices

which tend to make motoring safe. Within the next ten days this car will be started on an extended tour of the eastern states and later continne on through the south and far west. It will carry representatives of the Safety first society who will use unfoue methods of preaching the gospel of caution and carry the message of 'Safety First" to motorists and other users of the highways along the entir route. CEE the International fifth wheel (patent applied for) on Weber and Columbus wagons. This one feature makes these two wagons stand out above all the rest as the best and cheapest for a farmer to buy. The fifth wheel prevents the pitching and pulling up of the front bolster, and it does away with broken king pins and bent circle irons. It doubles the bearing surface of the bolster on the sandboard; it increases the life of the wagon; distributes strains more evenly, and therefore makes the work of hauling easier on the horses.

With all these points to recommend it, the Inter-national fifth wheel is worth a trip to town to see. Call on the I H C local dealer who handles Weber or Columbus wagons and ask him to show you the International fifth wheel. You cannot see it on any other wagon.
