Canada is Calling You to her Rich Wheat Lands She extends to Americans a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta.

This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help to feed the world ever. Canada wants you to help to feed the world by tilling some of her soil-land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think what you can make with wheat around \$1 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming is fully as profitable an industry as grain growing.

> The Government this year is asking farmers to put increased acreage into

grain. Military service is not compulsory in Canada but there is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. MADE THE VICTORY CERTAIN

Gunner's Announcement Naturally Brought Joy to the Heart of Artillery Captain.

With a ringing cheer the enemy advanced to attack the intrenchments. "Fire!" hoarsely shouted the artillery captain, and the roar of the guns responded, but without checking the steady advance of the enemy.

One piece remained undischarged. "Why don't you fire?" demanded the captain.

"I-I don't know if it's loaded," responded the gunner.

A gleam of joy lit up the stern features of the commander.

"Then victory is ours!" he shouted. "Fire it and let's find out!" The discharge mowed down the ad-

vancing column and the assault was repelled.

WHY CATCH COLD One-half of the Deaths and Twothirds of the Sickness is the Di-

rect Result of Catching Cold. Nothing could be of greater vital interest to the family than to know: how to avoid catching cold.

COLDS THAT KILL

If it be true, as one famous doctor says, that catching cold can be avolded, think what it means. Twothirds of the sickness that now oppresses the people would be avoided. Serious interference with business. The anguish of anxious parents. The blasting of many brilliant dreams, All these things would be largely done away with if people knew how to avoid catching cold. Catching cold is a very common experience in numerous households. People have come to believe that there is no way to avoid it.

A Substitute River.

One of the perplexing problems encountered by coaches of the various "varsity" racing shell crews, that of providing better means for winter training than is offered by the ordinary rowing machine, has been met satisfactorily at Syracuse university through the installation of an indoor rowing tank, provided with mechanical means for simulating the passage of the boat through the water. This provides what might almost be called actual rowing, besides keeping the men in condition .- Popular Mechanics Magazine,

THE TIN CAN DINNER.

Time was when the old-fashioned housekeeper looked askance upon her who served a dish. or worse, a meal, from a tin can. This prejudice is gradually becoming removed, for we find that many of our foods are well tinned 1351 and at a saving of en-

ergy, money and the most important of all, the time we may use for better things.

Never leave the contents of a can after it has been opened, but put into a bowl or dish and set away in a cool place. Many of the vegetables are improved by pouring out and airing for a time before cooking.

Through canned goods the house wife of today may call upon the markets of the world. Novelties in form and combination are appearing each month on the narkel.
