Hospital Receives Many Donations.

Many donations have recently been received by the Good Samaritan hospital which are much appreciated by the management. Many of the donations come from individuals and a large number from the ladies' auxiliary board, the result of the hospital teas which have been holding every week for some time past.

Following are some of the donations from individuals: Howe & Maloney, desk chair; Mrs. J. McGraw, grape juice and an air cushion for invalids; Mrs. Church, flannel jackets and patients' gowns; Mrs. Wilson, fruit and patients' gowns; a friend, flowers. The ladies' auxiliary made the following donations: Sash curtains for all the windows, writing desk, reading table, settee and two chairs for front office, two bath towels, twenty-seven wash cloths, four bed-side table covers, two dresser scarfs, ten linen tray cloths, two stand covers, four pillow slips and a large amount of miscellaneous linen.

Meeting of Men's Club Postponed.

A meeting of the men's club of the Episcopal church was scheduled to be held last evening in the basement of the church but had to be postponed on account of the water in the basement.

This meeting was called for the especial purpose of getting together for a social evening and for taking up a proposition of Dr. Wurtele relative to forming a male chorus within the club under the direction of a competent leader to be used in the church service as well as for social purposes. The plans as they now stand are to get every male communicant as well as the "brother-in-law" and get them together for his purpose. There is sufficient talent within the church to get together a company of male singers about thirty or forty in number. It is hoped that this can be done in the near future.

A meeting of the men's club will be held at a later date, probably next week to take up the matter.

Up to November 1, 1914, Minnesota had issued 61,185 motor licenses, and of these 19,397 were Fords. The Ford's nearest competitor sold only 5,781.

High School Entertainment.

The high school students have been at work for some time on an entertainment which will be given at the high school auditorium on Friday evening April 16th. A part of the proceeds of the evening are to be used to defray expenses of the cadet encampment which will be held at Gothenburg during the last week in May, and a part will be used in the base ball fund. This is an entertainment worthy of a large patronage.

Eight of the High School Cadets will present a fancy drill which has been taught by Mr. Munger, the Girls' Glee Club will sing several selections, the famous High School Minstrels will furnish music and the latest burnt cork jokes—some of the jokes are so late that they are not out yet—Dorothy Hinman will present a humorous reading, and besides all this there will be a side-splitting farce comedy in which Thurston Woodhurst, Jack Hisband, Cecil Cool Claude Peters, Georgie Hoxie and Catherine Hall are the characters. This laughable play, entitled "An Afflicted Man", is full of interesting situations from first to last—there is a laugh in every line of it. Keep Children off Streets.

The parents of children who are out of school on account of the scarlet fever epidemic are asked by the board of health and the school administration to keep their children off the streets as much as possible and not permit them to run about and play with other children.

This measure is kindly asked to prevent any chance of the disease spreading over the entire city. While the children themselves may not have the disease they still take the chance of contracting it from some of their playmates.

Several of the residents of the Second ward have spoken about the way children have been allowed to run about and it is deemed unwise by the board of health as well. With the number of cases already reported in that part of the city there is considerable danger of it spreading over the city unless every precaution is taken and it will be only for a short time. The picture shows is another place where there is much chance for children getting the disease and it is advised that the children who might be exposed to it refrain from attending them for a short time until the disease has had time to run itself out.

Obedience to this request will be much appreciated both by the school administration and the board of health as well as by the parents of children who have not had the disease.
