**The City of Pola.**  
Since the Austrians made the city of Pola their chief base in 1848 they have accomplished wonders there. It is claimed that with the assistance of submarines and aircraft Pola is virtually impregnable. Its commodious harbor, almost land locked, has been enlarged so that it easily contains the entire Austrian fleet. It is divided into two basins by a chain of small islands. The entrance is strongly defended, and an extensive system of fortifications on the hills including the harbor insures complete protection. There is a good roadstead in the large channel of Fusan, which separates the mainland from the Brionian Islands. The marine arsenal of Pola is a vast establishment with all the requisites for a large fleet. Artillery laboratories and powder magazines are situated on the north shore, and behind the arsenal is San Polcarpo, with huge barracks and hospitals.—Argonaut.

**NORTH PLATTE MAY SEE GAME OF LEAGUE BALL**

"Pa" Rourke, manager and owner of the Omaha ball team, is in town today for the purpose of making arrangements for a game of ball to be played by the two all-star teams that will tour the west. The two touring teams are made up of the best league and association players, and their games are therefore exhibitions of real ball playing.

At the hour The Tribune went to press final and positive arrangements for the game had not been completed, but at that time it was almost certain that the required guarantee would be forthcoming.

**Hoagland in Lincoln.**  
The staff correspondent of the Omaha Bee in writing from Lincoln under date of yesterday says:  
"According to Senator Walter V. Hoagland of North Platte, the corn in Lincoln county and the country around that section will turn out a wonderful yield, the largest in the history of the state."  
"Senator Hoagland will not be a candidate for the republican nomination for lieutenant governor next year. He says he has all the business he can attend to and does not care to pass it up to play second fiddle in the Nebraska state political orchestra."  
"However, he believes chances for republican success in this state will be exceedingly good. According to his way of looking at it the democrats are so split up that they will not be able to get together on anything except Wilson, and the republicans, presenting a united force will be able to clean the political platter and put the state once more in the hands of an administration which will mean much to the state in a business way."  
"The senator was here attending a session of the supreme court and while awaiting his turn, called at the office of Governor Morehead and paid his respects to Private Secretary Mumford, in the absence of the governor."

## Lengthen the Life of Your Machinery

It has been proven that 75 per cent of the depreciation of farm machinery is due to weather exposure—only 25 per cent is due to wear and tear.

This means that rust destroys your machinery three times faster than use.

You can't save your machines from rust, but you can save them from rust. Build a shed. Keep your machines in it when not in use.

A machine shed is very simple to build. It doesn't cost much—in fact, is cheaper than paying for new machinery or new parts. Build it now. We have the necessary cement, lumber, shingles, roofing, etc., and will be glad to help you with the plans. Let's talk it over. This puts you under no obligations.
