SPRING~MODES

FEATURING

Printzess Coats and Suits

SPRING is here, and on every hand nature flaunts her bright, fresh colors while Mother Earth decks herself in new garments to greet the season.

And with the coming of Spring your thoughts too, turn to the question of new clothes to wear—clothes that shall be appropriate in color and texture to meet the needs of the season. In your mind rises the familiar but perplexing question of what will be worn this season.

Then is the time to come to us, to visit our different departments, to see what our buyers have gathered for your inspection at this time. Now they spread before you the results of their months of study of Fashion's moods. Table and shelves, rack and cabinets—everywhere you find things that are new—in such profusion that even the most critical can quickly find just what they want.

Make a list of your needs—come in and let us help you make your purchases.

Wilcox Returns From East.

J. Q. Wilcox returned the early part of the week from a trip to St. Joe, Mo., and Chicago, where he purchased spring stock for the Wilcox store. In both of these jobbing centers he found the wholesale houses unable to supply the retail merchants with all the classes of goods they desired, and in many lines the supply is far below the demand. All classes of merchandise is higher in price than last fall, these advances ranging from five to thirty-five per cent, and further advances are anticipated. There is a greater scarcity of imported goods, and this is especially true of linens. Mr. Wilcox says business conditions in the middle west appear to be excellent.

Cheapest Washing You Ever Did

One cent an hour for washing and wringing. That's the average cost for current. Sometimes it's less than that. And this machine really washes. It doesn't merely "swash" the clothes around in a mass. Its backward and forward motion thoroughly mixes the suds with the clothes—every inch of them—and the result is a clean, white, sweet-smelling washing. You don't have to hand-rub a stitch. It never harms the finest laces. The dolly and interior walls are entirely free from anything that would catch the smallest thread.

Saves Time and Labor

It washes in but a mere fraction of the time required by a hand washer; and so makes washing an ordinary task. Easy to operate. Just screw the plug into your light socket, turn the switch and there you are. Always ready. Cost stops when it does. Electric mechanism and gears entirely enclosed. Has castors and ball bearings.
