

# Holy Cross Gold Mining and Milling Company.

## The Greatest Mining Offer Ever Made in Colorado.

Colorado's most famous gold mine that has produced and paid in dividends to its former owners one million dollars.

### 200,000 Shares at 10c a Share.

This is probably the last proposition this corporation will make to the investing public. This is the Company's clean up year and this issue of stock will probably furnish all the money needed.

Because of the recent rise of Silver to 73½ cents per ounce, the Holy Cross Gold Mining and Milling Company, in order to get ready to meet the urgent demand for Silver and also to remodel its mill, has concluded in order to raise the necessary money immediately so as to get to work, to sell (200,000) two hundred thousand shares at (10) ten cents per share, which is an opportunity never before offered to our investing public, to buy stock at a low price on a rising market value of the same. But the owners of the Holy Cross Gold Mining and Milling Co. so as to expedite matters must get right to work to take out the ore and milling the same ready for sale as a bullion. With the new Cyanide and Flotation of ore the mill, when remodeled and equipped up-to-date, can and will save and produce more money now for the Company and its stockholders out of its ores, Gold and Silver, with Silver at 73½ cents per ounce, as it is today, than it ever did before the demonitization of Silver in 1893. The cost of treatments and the improvements in machinery and devices and electrical inventions are the sole cause of this, together with Silver's raise in price.

The mine has produced over (\$1,000,000) one million dollars to its former owners and operators at the (500) five hundred foot level. There is a shaft sunk on the property, which consists of the Pelican Group of five patented mining claims, to a depth of (400) four hundred feet, and a 3300 foot tunnel which cuts the shaft at a depth of (100) one hundred feet lower, and there is a mill now on the property, as the accompanying picture in this announcement shows, that cost about (\$200,000) two hundred thousand dollars.

We extend to you an invitation to join us in our undertakings, and by so doing you get in on the ground floor. We feel that in asking you to invest with us in this enterprise that we are not only giving you a chance to make a large amount of money quickly, but that you and your heirs will be permanently benefitted by an investment that will pay you a continuous dividend in the years to come.

Our holding are located in the rich gold-bearing district is known as the Mt. of the Holy Cross, in close proximity to Leadville, Red Cliff and Breckenridge—three of the best known producing mining camps in the state of Colorado, and said to be the greatest gold fields in the country. This mine is not a prospect, but it is patented property, and has actually produced rich mineral-bearing ores, and paid in profits to the stockholders and investors of the former company before this, our present company.

They paid out in dividends to former owners over one million dollars (\$1,000,000.00). The ore that was mined and milled ran in value from one ounce to eight ounces per ton, or from twenty (\$20.00) to one hundred and sixty dollars \$160.00 per ton.

This is shown not only by the assays made but by the reports of the gold bullion taken from the plates when the mine and mill were in operation. This ore was all taken out below the four hundred-foot (400) level, both by shaft and tunnel, thus leaving open a vast amount of stopping ground above on the fourteen foot (14) vein of mill ore for our mill for years to come. The shaft being something over four hundred (400) feet deep—the thirty-three hundred (3,300) foot tunnel, which is run direct into the mountain to cut the fourteen (14) foot vein of mill ore on a level with the mill, by which means the ore is in easy access through the tunnel to the mill.

This property only awaits operation and not development to become a big producer and a big dividend payer.

As stated above, it has paid over one million dollars (\$1,000,000.00) to former owners and stockholders, and it will still produce and pay large dividends if the right amount of work is done on it under competent management.

Picture of Our Mill now on the Property.

Gold has made more wealth for the country than any other single product, and if it were not a profitable business it would be discontinued. Because of our new and late electrical devices and late modern machinery and new processes, and with the cyanide and flotation methods now at hand it is a well known fact that mining in all classes is much cheaper done today, with more accrued profits, than the same class of ores yielded fifteen or twenty years ago.

Five hundred dollars (\$500.00) invested today in gold mining stock will make more money for the investor in a short time than the average man or woman would be able to get investing in other lines of business in a whole lifetime. Stop and figure what this means to you, regardless of the value of the original purchase of the stock or the amount of your investment.

It is the intention of the management to dispose of only enough treasury stock at this time to remodel the mill with late, up-to-date, modern machinery, for the treatment of its ores, and when this is done the company should easily pay a 25 per cent DIVIDEND THE FIRST YEAR.

The quicker the stock is disposed of and money raised so as to place the mines and mill in operation, the sooner the company can pay dividends.

This property is located on the head waters of Cross Creek, and on the northeast slope of Mt. of the Holy Cross, and about sixteen miles from Red Cliff and eighteen miles from Leadville, with several tributary streams which affords plenty of water for power, mine, mill and also domestic uses. There is plenty of timber right at hand for mine timbering, building purposes and fuel.

The present company has the utmost confidence in the value of the property and feels that in offering two hundred thousand (200,000) shares of its treasury stock at 10 cents per share, that it is offering more than it is asking. In other words, if the promoters were themselves financially able to expend the necessary money to again put the mine in the producing class, they would not now be offering any of the stock to the public. So in order to be able to put the mine and mill in working order, to again pay dividends, we have decided to sell two hundred thousand (200,000) shares of its treasury stock at ten cents (10c) per share, which is far below its real value. We want to raise the money quick and we believe this low price will accomplish the result.

There has been about five hundred thousand dollars (\$500,000.00) spent in development work on this property.

The mill on this property cost about two hundred thousand dollars (\$200,000.00).

The great Homestead Mine, which has produced millions of dollars, is within a short distance of this property.

The Hunk-a-Doory Mine, which produced the largest free-gold nugget Colorado ever produced and which took the premium at the Omaha Exposition, is within a half mile of this property.

There is only a four thousand dollar indebtedness against this property.

This company's property, The Holy Cross Gold Mining and Milling Company, consists of the Pelican Group of five patented mining claims, of 24 49-100 acres, situated on the northeast side of the Mt. of the Holy Cross mountain, Holy Cross Mountain Mining District, Eagle County, Colorado.

Below is an exact copy of a letter from

the Treasurer of Eagle County, Colorado.

The district in which this company's property is located is a gold, silver, lead, copper and zinc mining district, and within close proximity of this company's property are such rare metal as carnotite, molybdenite, pitch blende, uranium, vanadium, tungsten and radium, and it is the intention of our company to take over and operate such properties as the company would deem profitable to them.

The Eagle County Treasurer's letter follows:

"Red Cliff, Colo., March 25, 1916.  
Mr. S. Goodwin,

1641 California Street,  
Denver, Colorado.

Dear Sir:—In response to telephone call from Leadville, I would say that the Pelican Group of mining claims consists of five claims, viz.: Pelican, Pelican Extension, Calumet, Little Mattie, and Delphine. Number of acres, 24 49-100, and are located on the northeasterly side of the mountain.

Yours very truly,  
A. F. CARLSON.

There is not a line or quotation in this announcement but what is an undisputed fact, and will stand the most rigid and careful scrutiny and investigation, and the men of the company are men of sterling integrity and worth, and their character is above reproach, and they are known in their community where they maintain residence and home for their honesty and uprightness.

The company and its managers solicit and invite you to call at Room 1, The Lamar, North Platte, to see samples of ore and obtain literature.
