## PERTINENT FACTS ABOUT OUR NEW PAVING

A slight delay was experienced this week in the paving of the business streets due partly to the non-arrival of fifteen cars of the three inch vertical fibre brick which will be used on the surface but mostly to the scarcity of men. These delays are not noticed to any extent as there is enough concrete work to keep the employees busy until the brick arrives and in order to pump the gravel from the river fast enough to supply the demand two pumps have been in operation daily and it was necessary to employ a night force of twelve men. Many are of the opinion that only one block should be worked upon at one time and completed before the others are dug up but Engineer McNamara states that several blocks can be worked upon to better advantage and will keep the graders at work at all times instead of waiting for their line of work and it is better that the concrete be thoroughly set before covered with the brick. Four blocks are being paved at the present time. The curbing on Locust and streets west has been completed and drain boxes are being placed on Fourth, Fifth and Sixth streets through which water will run from north and south to the east from openings in the pavement. The brick is being shipped from Murphysboro, Ill., and each car contains 10,000 bricks.

This amount will only cover two blocks, but the rest has been ordered so that it will arrive as needed.

It takes about twenty men to run the big concrete mixer and they expect to concrete one block a day. As soon as the base is sufficiently set, which will take a week or ten days, it will be covered with a sand cushion one and one-half inches deep. After this is rolled and brought to an even surface the brick will then be laid and the spaces between filled with asphalt filler.

The traveling public must expect some inconvenience in a big undertaking like this, but they will be well repaid for their patience and co-operation after the work is finished, as we will be justly proud of our business section.

## Contract Awarded

F. M. Parsons, of Omaha, who drew the plans for the remodeling of the Methodist Episcopal church building, spent the greater part of last week here conferring with the building committee. Peggy is a truly American girl and an heiress and after her father's death she goes to live with an uncle in Scotland. She lands among these very pious people on a Sunday morning and from then on there is no dull in the play. When this picture has been shown in cities people have formed waiting lines to gain admission to the theatres. And no doubt people here will give the picture a large audience.
