

## "Eyestrain Disturbances of Human Machine"

(From the Review of Reviews.)

"High authority asserts that probably one-fourth of all the educated people in America suffer from various kinds of disturbances more or less due to eyestrain." Strange though it may seem, eyestrain is capable of disturbing our whole organism, because of the reflex relation between eyes and the vital parts of the human machine. Constant exhaustion and strain of these vital centers will frequently cause disturbances of the most extensive character. This follows because the strain of civilization rests heavier upon the eyes than upon any other organ. School life is responsible for deformities of the eye, and approximately, one-third of all the children in the upper grades of the elementary schools have eyes that rather seriously need correction."

## Mutual Building & Loan Ass'n.

OF NORTH PLATTE, NEBRASKA.  
ASSETS \$840,000.00

To Prospective Building & Loan Borrowers;  
Non-resident Building & Loan Companies are advertising the fact that they have reduced the monthly payments of borrowers to \$1.10 per month on each \$100.00 borrowed, making the monthly payment the same as the Mutual Building & Loan Association of North Platte. They fail to state that of the \$1.10 paid to the non-resident company, there is only thirty-five cents credited as a principal payment, the balance seventy-five cents being taken for interest. Of the \$1.10 monthly payment to this association on each \$100.00 borrowed sixty cents is for interest and fifty cents is credited as a principal payment.

This difference in the amount credited the borrower will result in the borrower in the non-resident company being compelled to pay not less than \$25.00 more on each \$100.00 borrowed in order to discharge the debt than they would if they were doing the business with this Association.
