

#### Keev Your Eyesight as Young as Your Memory

With KRYPTOKS (pronounced Criptocke) you can adjust your vision from near to far as quickly and accurately as when you were a youth.

Why fuss with two pairs of glasses or peer freakishly over your reading glasses to see objects a few feet away when you can wear KRYPTOKS and enjoy near and far vision in one

# THE INVISIBLE BIFOCALS

KRYPTOKS are fast replacing the old-style bifocals because they are void of lines, seams or humps of any kind. Nobody but the wearer would ever suspect they were anything but single vision lenses.

You can always tell KRYP-TOKS by their clear, even smooth surfaces.
