HOW BUICK

Solved the Gasoline Problem

Now Furnished on the New Buick Six.

The Gasoline Saver is One More New Invention of the Buick Six

It was shown for the first time at the New York Automobile Show in January. Now most all Buick dealers are showing the new cars equipped with this and other important new features. The gasoline saver is the only new feature shown on automobiles at this year's shows.

OVERCOMES POOR GASOLINE.

Hard starting and wasteful gasoline consumption due to cold weather and the low grade gasoline are overcome. Radiator and hood covers are not needed on the new Buick Sixes even in the coldest weather.

This device has been in use on hundreds of Buick Sixes during the coldest winter weather. Its effectiveness has been proven. It is as easily operated as the damper on a stove.

Low grade gasoline gives low mileage and is wasteful and harmful to the engine, unless the motor is operated steadily at a high temperature.

PRIMER INSURES EASY STARTING

In zero weather, even at 20 below, the new Buick Six motor starts. The primer is another new feature of the Buick Six.

On the new cars there are also other worth-while features you should see. There is the new upholstery, more attractive door fasteners, an improved body finish and other details you can see. The car that last year won every worth-while record is a much better automobile now because we have learned to build them better.

We made those records of endurance for acceleration and speed with cars of earlier production. No one has yet equaled anything we have done with stock Buick Six cars. And yet the cars we turn out today are infinitely better because of the increased skill and experience Buick work-

men have acquired in building the 75,000 cars that were produced last year.

BUYERS WAITED FOR MONTHS

At this time last season orders exceeded our production by 20,000. At no time during the season were there enough Buicks to go around. From this you can see that the demand will be this year. We are only producing 146,000 cars as against last year's 77,500 because we cannot build more and build them well. That is not a large increase. It shows, however, that if you want a Buick you cannot afford to postpone buying. Unless you act now you may be like other thousands who will be disappointed this year because they could not get prompt deliveries.

Don't fail to see the gasoline saver.

TRIANGLE CLUB ELECTS OFFICERS AND TRUSTEES

At a meeting of the members of the Triangle club Tuesday evening the following officers were elected: President, M. M. Redenbaugh; vice-president, L. W. Toole; secretary, Ralph Robinson; treasurer, W. E. Starr; trustees, M. E. Scott, J. H. Van Cleave, W. R. Maloney, J. L. Loudon and H. M. Grimes.

The Triangle club was recently promoted through the efforts of Rev. Hull, of the Baptist church, and its purpose is to furnish clean, wholesome amusement and entertainment for the men and boys of North Platte. The headquarters of the club are in the basement of the Baptist church, and the furnishings will include gymnasium apparatus, together with chess, checkers and kindred games, a reading table; in fact it will be provided with means whereby all members can pass a pleasant and profitable evening. The present membership is about one hundred, and it is hoped to increase it to two hundred within thirty days.

The club will be formally opened the early part of next month.

Fire at Lloyd Opera House

Dave Day, on his way to work Wednesday morning was attracted by the smell of burning wood as he passed the Lloyd opera house. Peeping through the window of the coat room, he discovered the building full of smoke. Failing to find an unlocked door, he gave an alarm, the fire boys promptly responded, and upon breaking into the building found the floor of the coat room on fire, which was quickly put out with the chemical extinguisher.

How the fire originated remains unsolved, but the supposition is that some one gained an entrance to the building started a fire in the stove, spent the night there, and departed at dawn. Following his departure live coals fell on the floor and started the blaze.

The Yeomen held a meeting in the building the evening before, but a fire had not been built in that particular stove. Had the fire started earlier, or had a draft been furnished through an open door or window, the building would probably have been pretty well gutted before the flames could have been extinguished.
