**Caught the Post.**  
Pat was walking along the road, when, hearing a whir, he looked back, and saw Larry flying fast and furious on a bicycle.  
"Hi! wait a minute!" shouted Pat. "I want to speak to you."  
"I can't, I'm in a hurry. I want to catch the post," cried Larry, flying by.  
Suddenly the bicycle swerved, and crashed into a telegraph pole on the roadside, and Larry and the bike lay in a helpless tangle. As Pat came on, Larry was extricating himself from the wire puzzle.  
"Bogorra!" said Pat, with a grin. "I see you caught the post."

**GIRLS! GIRLS! TRY IT,  
BEAUTIFY YOUR HAIR**

**Make It Thick, Glossy, Wavy, Luxuriant and Remove Dandruff—Real Surprise for You.**

Your hair becomes light, wavy, fluffy, abundant and appears as soft, lustrous and beautiful as a young girl's after a "Danderine hair cleanse." Just try this—moisten a cloth with a little Danderine and carefully draw it through your hair, taking one small strand at a time. This will cleanse the hair of dust, dirt and excessive oil and in just a few moments you have doubled the beauty of your hair.

Besides beautifying the hair at once, Danderine dissolves every particle of dandruff; cleanses, purifies and invigorates the scalp, forever stopping itching and falling hair.

But what will please you most will be after a few weeks' use when you will actually see new hair—fine and downy at first—yes—but really new hair—growing all over the scalp. If you care for pretty, soft hair and lots of it, surely get a 25 cent bottle of Knowlton's Danderine from any store and just try it. Adv.

**WHITE DIARRHEA IS MENACE**

Eternal Vigilance in Sanitation is Price of Health of Flock—Formula for Antiseptic.

(By GEORGE H. GLOVER, Colorado Agricultural College, Fort Collins, Colo.)  
It is claimed that not less than 50 per cent of chickens hatched die of white diarrhea and the loss from this disease is greater than the combined loss from all other diseases.

It is not difficult to distinguish between the white diarrhea and non-infectious diarrhea. The latter attacks older chicks and is not nearly so fatal. Incubator chicks are the most susceptible and the disease usually appears within the first three days after they are hatched. At least 80 per cent of chickens affected die.

The treatment must be preventive. The cause must be removed and sanitation is practically the whole thing. The incubators and brooders should be thoroughly scrubbed with soap and water in which a disinfectant has been added. They should then be further disinfected by fumigation with formaldehyde gas. For 36 hours after hatching, the chicks should receive no feed. An intestinal antiseptic may help to prevent infection. Doctor Kaupp has recommended for this purpose sulfocarbonate 30 grains, bichlor-

ide of mercury six grains and citric acid three grains, dissolved in one gallon of water. This mixture should constitute their drinking water.

Experience has fully demonstrated that success in the poultry business is impossible without the exercise of eternal vigilance in sanitation.

**USE INCUBATORS FOR DUCKS**

As Pekin and Runner Rarely Show Disposition to Sit, Artificial Means Are Used.

On commercial duck farms most of the hatching is done in incubators, for the Pekin and Runner rarely sit. On farms where no incubator is available, the eggs are usually hatched under hens. The period of incubation is a week longer than that of hens' eggs, and for this reason, the hen must be well cared for. While ducks are easier to brood artificially than chickens, they may also be raised successfully under hens. In the latter case, it is better to confine the hens and to allow the ducklings free range. Birds that are intended for sale as green ducks, however, are not usually allowed much range, but are fed heavily and forced for rapid growth. The brooders and brooding systems used for chickens give good results in rearing ducklings, although the latter do not require as high a temperature.

**KEEP DUCKS DRY IN WINTER**

Fowls on Many Farms Receive Shabby Treatment During Cold Weather—Give Them Dry Beds.

On many farms, ducks receive shabby treatment through the winter. Because they are a water fowl the assumption seems to be that they can stand any amount of water. Big pans in the duck runs are slopped over until the litter is thoroughly wet; the ducks cannot find a dry place to sleep in, and when they go lame as a natural consequence, their owners wonder what disease has attacked them.

Ducks require a dry bed. They can stand a good deal of cold, and some neglect as to food, but dryness at night they must have if they are to thrive.

Another cause of lameness in ducks is careless handling. Do not pick up a duck by the legs. Grasp it by the neck if you would avoid lameness.

**FEED FOWLS SPROUTED OATS**

Most Excellent in Ration of Laying Hens in Winter—Job of Sprouting is Not Difficult.

Sprouted oats are excellent feed for hens in the winter time. It matters not how long the sprouts get. The longer they get the more green food they furnish. They are easily sprouted in the house in pans or in a large flat box that can be placed over the range by hanging it from the ceiling.

**"CASCARETS" ACT ON LIVER; BOWELS**

No sick headache, biliousness, bad taste or constipation by morning.

Get a 10-cent box. Are you keeping your bowels, liver, and stomach clean, pure and fresh with Cascarets, or merely forcing a passageway every few days with Salts, Cathartic Pills, Castor Oil or Purgative Waters?

Stop having a bowel wash-day. Let Cascarets thoroughly cleanse and regulate the stomach, remove the sour and fermenting food and foul gases, take the excess bile from the liver and carry out of the system all the constipated waste matter and poisons in the bowels.

A Cascaret to-night will make you feel great by morning. They work while you sleep—never gripe, sicken or cause any inconvenience, and cost only 10 cents a box from your store. Millions of men and women take a Cascaret now and then and never have Headache, Biliousness, Coated Tongue, Indigestion, Sour Stomach or Constipation. Adv.

**FOR BETTER ROADS**

**MOTORTRUCK ROAD ARRIVED**

First One on Record Being Constructed Between Los Angeles and Harbor of San Pedro.

The motortruck road has arrived. The first one on record is being constructed by Los Angeles, Cal. It is 13 miles long, and runs from Los Angeles to the harbor of San Pedro. It is a 40-foot width of waterproof macadam, covered with eight inches of solid concrete, and with an elastic bituminous "carpet" over the whole.

This roadbed is more durable than those built merely for pleasure vehicles or light motortrucks. In construction and purpose it is a sort of compromise between the ordinary highway and the railroad. It provides the kind of road needed for the heaviest sort of hauling, and by segregating the slow, ponderous truck traffic it benefits the lighter traffic on other roads.

The innovation is sure to be widely followed in time, where conditions are similar. There may be truck roads established in all populous communities. Then we may see steady streams of great gas-driven trucks hauling freight along the established routes, relieving the pressure of traffic on common highways and supplementing the work of the railroads. It will be a valuable addition to our transportation systems.—New Bedford (Mass.) Times.

**NEED OF HIGHWAYS SYSTEM**

Concrete or Brick Surfaces for Heavy Traffic, With Macadam or Gravel on Other Roads.

(By D. WARD KING.)  
What we need, and in time will have, is a system of highways which will ramify from the largest cities to the doorway of the humblest citizen—villager or farmer. Such a system of highways will include trunk lines with expensive concrete or brick surfaces for the very heavy traffic, including trucks and automobiles. Less used but important roads may be of water-

bound macadam or gravel. Perhaps in certain regions where stone and gravel are not at hand oiled roads may prove most economical and practical. Minor wagon ways must remain of native soil, built and maintained with the road drag. Meanwhile antagonism to road dragging breeds in a lack of information or a narrowness which fails to comprehend the facts.

**IMPROVE ROAD BY DRAGGING**

Every Farmer Drags His Front Gate to His Neighbor's Front Gate Towards Town.

Out from all the stormy talk about good roads and taxation there looms one significant fact: Good roads can be made in normal soils by dragging. The factor in making dirt roads is water. Drag your road so as to make it shed water and you will have the best all-around highway on earth.

It can be kept in repair with small cost if "every farmer drags from his front gate to his neighbor's front gate towards town."

**Roads Attract City People.**

Better roads bringing city families out to the country frequently in their automobiles to visit farm families and to purchase supplies of them will act as an incentive for better general and special methods of farm-food production.

The "Invisible" Road Tax. Broken harness, wagons, buggies, automobiles, are part of the invisible tax the owners pay annually to poor roads. This tax is said to be greater than the cost of the road maintenance.

**Died of Premature Old Age!**

(BY V. M. PIERCE, M. D.)

How many times we hear of comparatively young persons passing away when they should have lived to be 70 or 80 years of age. This fatal work is usually attributed to the kidneys, as, when the kidneys degenerate, it causes auto-intoxication. The more injurious poisons passing thru the kidneys, the quicker will those noble organs be degenerated, and the sooner they decay.

To prevent premature old age and promote long life, lighten the work of the kidneys by drinking plenty of pure water all day long, and occasionally taking Anuric (double strength) before meals. This can be obtained at drug stores. Anuric will overcome such conditions as rheumatism, dropsical swellings, cold extremities, scalding and burning urine and sleeplessness due to constant arising.
