

Is Your Back Stiff, Lame and Achy?

Do Weak Kidneys Keep You Sick, Tired and All Worn Out?

IF YOU have a constant, dull ache, or sharp pains whenever you bend or twist your back, and the kidney secretions seem disordered, too, don't waste time plastering or rubbing the bad back. It's likely that the cause is kidney weakness, and delay in treating the kidneys may invite uric acid poisoning, gravel, dropsy or fatal Bright's disease.

Get Doan's Kidney Pills, a special remedy for weak kidneys, used around the world and publicly recommended by 50,000 people in the U. S. A.

Personal Reports of Real Cases

BEST RESULTS ALWAYS.

Mrs. J. Light, 519 W. Fourth Ave., Cresco, Iowa, says: "I suffered from kidney complaint and rheumatic pains in my back and limbs. The kidney secretions passed too freely and gave me great annoyance. One of my limbs swelled so badly that I could hardly get my shoes on. The pressure of a finger on my flesh would leave a dent. I couldn't get around and was dreadfully weak and miserable. I had headaches, too. As soon as I used Doan's Kidney Pills, I improved. My kidneys were regulated and the pain, weakness and swelling left. Whenever I have taken Doan's Kidney Pills since, they have brought fine results."

KIDNEYS NOW NORMAL.

C. T. Evans, Seventh St. and Eleventh Ave., Nebraska City, Neb., says: "I was in misery with kidney trouble and finally had to give up work. I was confined to bed for five months. My limbs and body swelled terribly and the kidney secretions were in awful shape. My health was wrecked. Three doctors failed to cure me. When I was almost discouraged, I heard of Doan's Kidney Pills and began taking them. They made my kidneys normal and corrected all the other trouble. Since then my kidneys have been in good working order."

DOAN'S KIDNEY PILLS

50c a Box at All Stores. Foster-Milburn Co., Buffalo, N. Y., Mfg. Chemists

WORMS

"Wormy," that's what the matter of 'em. Stomach and intestinal worms. Nearly as bad as distemper. Cost you too much to feed 'em. Look bad—'em bad. Don't physic 'em to death. Spohn's Compound will remove the worms, improve the appetite, and tone 'em up all round and don't physic. Acts on glands and blood. Full directions with each bottle, and sold by all druggists.

SPOHN MEDICAL CO., Chemists, Goshen, Ind., U. S. A.

Always the Way.

"I know a man who wants to take out fifty thousand dollars' worth of life insurance."

"You do. Who is he?"
"A friend of mine who tried to get a thousand dollars' worth the other day and was rejected by the doctors."

Tin cans are used extensively in the manufacture of toy soldiers by Japanese toymakers.

Motor-driven windlasses have been designed for raising circus tent poles.

DR. KNOLLENBERG, D. C.

Specializes in all forms of Articular Rheumatism, Enlarged Joints, Kidney Trouble and Nervousness

I have given Chronic Diseases special study and I unhesitatingly say that my drugless treatment is not excelled by any specialist regardless of what he claims. EXAMINATION FREE. If after examination I accept your case, I will issue a written guarantee.

My Guarantee to You:
You don't pay if I fail, if you remain in my Sanitarium under my care and treatment.

Your Liver Is the Best Beauty Doctor

A dull, yellow, lifeless skin, or pimples and eruptions, are twin brothers to constipation. Bile, nature's own laxative, is getting into your blood instead of passing out of your system as it should. This is the treatment, in successful use for 50 years—one pill daily (more only when necessary).

PROFITS FROM DAIRY

Value of Land Raised by Increased Fertility Produced.

Farmers Are Few and Far Between Who Do Not Perceive That Few Cows Are Valuable Adjunct to Farming System.

Dairy farming is intensive farming. The dairy farmer may be located on a comparatively small area of land, but he is generally doing in higher finance than the large rancher or stockman. High-priced land is adapted to the dairyman and may be made to pay out where the same land used for grain crops would show a balance on the other side of the ledger.

More than this, the dairy farmer is a purchaser rather than a seller of grain and consequently his original capital by gaining in fertility is gaining in value rather than decreasing. The bringing in of concentrated protein feed means the bringing in of increased fertility and consequent increased land values. Rents and values are high on dairy land because it is an industry which yields large profits. In Holland land is frequently sold for \$1,000 to \$2,000 per acre and it is used almost entirely for dairy purposes. The islands of Jersey and Guernsey, the homes of the breeds by those names, are the most intensive dairy sections in the world. In these places land rents for \$60 per acre or even higher, and pays a profit.

Land in the corn-belt states has by no means reached limits such as these, nor is there any possibility that it will with our present population and area, yet careful students of the times are noticing that as land values increase dairying is also increasing, and as the number of cows grows larger land values soar proportionately. The Central states need not fear that they will all be driven to milking cows, but farmers are nightly few and far between who are not coming to see that a few cows are a valuable adjunct to their system of farming. For the sake of the land alone no one can afford to be without a few cows to supply fresh fertility to his fields.

SUBSOILER TO LOOSEN SOIL

Device is Adjustable to Any Depth and is Quite Valuable to Those Having Clay Subsoils.

An attachment to plows which loosens the soil at the bottom of the furrows is one that may be very val-

Subsoiler.

uable to those who have heavy clay subsoils. It is adjustable for depth, and its attachment to the plow may be seen in the illustration.—Wisconsin Agriculturist.

TREES CARED FOR PROPERLY

If Not Set Out Immediately on Receiving From Nursery They Should Be "Heeled In."

If trees cannot be set immediately when they are received from the nursery they should be "heeled in." To heel in trees dig a trench one foot deep, throwing out the earth to one side as it is turned by a plow. Place the trees side by side with their roots in the trench and their tops leaning over the turned-out earth at an angle of 45 degrees. Spade in earth over the roots and tramp in firm. In moving earth to cover the roots a second trench is made parallel with the first. More trees may be heeled in this second trench. This may be repeated so as to finally leave the trees in a compact block rather than in a single low row.

ADVANTAGES IN RAISING BEEF

Fact Lost Sight of That Steer Does Not Have to Be Milked Every Day—Cow Needs Much Care.

When a dairy expert compares the product of a cow with the value of a steer he usually forgets that the steer does not have to be milked every day. Furthermore, the steer is calved, raised, fattened and marketed before the cow gives a drop of milk. The cow needs a man attendant to every fifteen and the steer needs a man to every fifty.

SOUND HOGS RESIST DISEASE

Sanitation and Wholesome Food Are Best Assurances Against Disorders—Keep Yards Clean.

Sanitation and wholesome feed are the best assurances against hog diseases. Hogs that are kept on clean premises are not likely to become sick. Thrifty hogs are less susceptible to disease than hogs that are poorly nourished. Therefore, the first precautions are clean premises, plenty of pure water and air, and well-balanced rations. Hogs kept under such conditions will not be sick.

TABLE TO INOCULATE SEEDS

Takes Work Off Floor and Insures More Thorough Job—Is Useful for Other Tasks.

The inoculation of seeds is a very easy matter when one has a table especially for this purpose. In fact, there are so many advantages to the one shown that I wish to recommend it, writes Leo Matthews in Farm Progress.

It gets the work up off the floor so that it is not so tiresome. Since it is not so tiresome, the operator is

An inoculation table.

apt to do a more thorough job of mixing. The edging prevents the seed from scattering over a large space; and the fact that the table rocks makes it possible to tilt it slightly to drain off surplus water.

Finally, when the operation is complete, the table can be tilted enough to allow the seed to run into a box for sacking. Such a table is also handy when selecting seed corn or sorting fruit, and when not in use can be lifted off of the base and leaned up against the wall comparatively out of the way.

CARING FOR TOMATO PLANTS

Where Blossoms Drop Off and Fruit Is Scarce and Inferior Try Cutting Off Top Parts.

Very frequently you hear complaints of tomato vines making a very vigorous growth, bearing quantities of blossoms, which are dropping off, and the fruit is scarce and inferior.

Try cutting some of the upper parts of the vines almost off. Slash in such a manner that the branches will be almost severed, and drop to the ground and yet still cling enough to remain alive.

The plants will cease dropping the blossoms, and there will be a heavy crop of fine tomatoes which will be a surprise, as such treatment of vines seems contrary to the notion of most persons.

The secret is there is more plant than can be sustained, and the vitality needed to make fruit is used in sustaining the surplus plant.

OBTAIN HORSERADISH CROP

Commonly Grown From Sets and Not From Seed—In Spring Set in Between Cabbage Rows.

Horseradish is commonly grown from sets and not from seed. Some claim they have the best success growing it as a second crop after the early cabbage, beets, etc. The crop is dug in the fall, the small roots removed and then cut into sets four to six inches long. The top end is cut square and the bottom slanting, so as to make no mistake in planting. These are tied in bundles and kept over winter in sand.

In the spring after the cabbages are set out, a row of horseradish is set in between the cabbage rows. Small holes are made with a light crowbar or long stick and the sets dropped in and covered two or three inches deep so that they do not come up until July 1st.

NEGLECT OF SMALL FRUITS

Extremely Profitable to Maintain Grapes, Raspberries and Currants in Good Condition.

Grapes, raspberries and currants are frequently so neglected that they cease to be profitable. And yet it is extremely profitable to maintain these home accessories in vigorous condition. No argument should be needed to convince farmers of this fact, for a well-cared-for half-acre of these three or more fruits will bring \$200 worth of appetizing and healthful table supplies.

Culture, pruning and fertilizing are essential to the best possible results. These requirements are not so difficult that they are a sufficient bar to success.

ERADICATION OF PLANT LICE

Lime-Sulphur Applied Directly to Bodies of Insects Will Kill Them—Spray of No Avail.

You can't poison "plant life" or aphids by spraying. The spray which kills so-called lice, and also scale insects, must be applied directly to their bodies and kill by contact. Strong lime-sulphur will do the work.

For the tender insects with soft bodies, a strong solution of tobacco will kill them.

GROW SORGHUM FOR FORAGE

Furnish Considerable Amount of Feed for Swine During Hot, Dry Time of Summer.

Sorghum will furnish a considerable amount of forage for hogs during the hot, dry time of summer when other crops are not growing well.

If sown the latter half of May or the first of June it should be ready for pasturing in six to eight weeks.

W. L. DOUGLAS

"THE SHOE THAT HOLDS ITS SHAPE"
\$3 \$3.50 \$4 \$4.50 \$5 \$6 \$7 \$8 FOR MEN AND WOMEN
Save Money by Wearing W. L. Douglas shoes. For sale by over 9000 shoe dealers. The Best Known Shoes in the World.

W. L. Douglas name and the retail price is stamped on the bottom of all shoes at the factory. The value is guaranteed and the wearer protected against high prices for inferior shoes. The retail prices are the same everywhere. They cost no more in San Francisco than they do in New York. They are always worth the price paid for them.

The quality of W. L. Douglas product is guaranteed by more than 40 years experience in making fine shoes. The smart styles are the leaders in the Fashion Centres of America. They are made in a well-equipped factory at Brockton, Mass., by the highest paid, skilled shoemakers, under the direction and supervision of experienced men, all working with a honest determination to make the best shoes for the price that money can buy.

Ask your shoe dealer for W. L. Douglas shoes. If he cannot supply you with the kind you want, take no other make. Write for interesting booklet explaining how to get shoes of the highest standard of quality for the price, by return mail, postage free.

Enduring! Certain-Teed is a name which has come thru the storm of business competition stronger than ever. It stands for quality, dependability, satisfaction and fair dealing. On the reputation of this name there has been built the world's largest manufacturer of roofing and building papers.

Certain-Teed Certain-Teed

Roofing is the most eminent type of roofing for factories, office buildings, farm buildings, garages, etc. The cost of laying prepared roofings is the same whether you use good materials or poor. Therefore, it pays to get CERTAIN-TEED, which is the best. It is guaranteed for 5, 10 or 15 years, according to thickness (1/2 or 3/4 in.), and it will remain efficient long after the time when a poor quality roof would have had to be replaced.

Paints and Varnishes are good, reliable products made by experienced paint men who know how to make good paints and varnishes. The result is that CERTAIN-TEED Paints and Varnishes are high grade products, sold at lower prices than you would expect to pay for good paints and varnishes. We guarantee CERTAIN-TEED Paints and Varnishes to give satisfaction. Whether you do your own painting or hire a professional painter you will find it to your interest that you get CERTAIN-TEED.

CERTAIN-TEED PRODUCTS CORPORATION
General Roofing Mfg. Co., Greig Varnish Co., Mound City Paint & Color Co.

Safety First.

Officers of the marine corps recruiting station in Indianapolis tell an incident as a fair illustration of the wide ignorance regarding Uncle Sam's "soldiers of the sea." An applicant for information had just stepped out of the recruiting office when a man who works about the building accosted him.

"Are you thinking of joining?" the janitor asked.

"I have not decided yet," the applicant replied.

"Well, if you'll take my advice," counseled the janitor, "you'll stay out of the blamed submarines."—Indianapolis News.

Had Brought Up Many.

The pert lift-boy in the big hotel was airing his views to a passenger on the proper conduct of children.

"What do you know about it?" laughed the passenger. "You're not married, are you?"

"Well, no," replied the boy, as he flung open the gate on the top floor for his passenger to step out, "but I brought a good many families up in my time."

Almost the Same.

"You're crazy about George, aren't you, sis?"

"Huh! Mother says I'm crazy to have him about."

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—it's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.—adv.

Diplomacy.

"I overheard Miss Oldun ask you to guess her age. Did you?"

"Yes, but I didn't tell her what I guessed."—Puck.

Canadian Farmers Profit From Wheat

The war's devastation of European crops has caused an unusual demand for grain from the American Continent. The people of the world must be fed and wheat near \$2 a bushel offers great profits to the farmer. Canada's invitation is therefore especially attractive. She wants settlers to make money and happy, prosperous homes for themselves by helping her raise immense wheat crops.

You can get a Homestead of 160 acres FREE and other lands at remarkably low prices. During many years Canadian wheat fields have averaged 20 bushels to the acre many yields as high as 45 bushels to the acre. Wonderful crops also of Oats, Barley and Flax. Mixed farming as profitable an industry as grain raising. The excellent grasses full of nutrition are the only food required for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an extra demand for farm labor to replace the many young men who have volunteered for the war. The Government is urging farmers to put extra acres into grain. Write for literature and particulars as to reduced railway rates to Dept. of Immigration, Ottawa, Canada, or W. V. BENNETT Room 4, Bee Bldg., Omaha, Neb. Canadian Government Agent
