

War news is very interesting

Are you straining your eyes in reading about the war? Newspapers are hard on the best of eyes. On defective eyes they are a dangerous strain.

If your eyes are not as young as they used to be--or are young but defective in refracting--you'll get much more satisfaction from reading war news--and be much more efficient at your work--if you wear properly fitted glasses.

Clinton will test your eyes, and provide exactly the glasses you need to protect and preserve your sight.

Charges are fair and reasonable.

The Bank That Serves

That is the proud title which the McDonald State Bank covets.

We maintain a checking department that offers a safe depository for funds, a savings department that allows 4 per cent compound interest and aids in the promotion of thrift, decidedly essential to the national well-being just now, and in every possible way give the utmost in bank service to every responsible person in our community.

MAY STILL ENLIST IN COMPANY E

The impression has gone forth that enlistments in Company E will not be accepted by reason of the company being full. This, Captain Halligan informs us is erroneous, and that there is still room for more. Those who decide to enlist should, however, communicate with Captain Halligan at the earliest possible time.

In this connection, a Washington dispatch dated yesterday says: "New army regulations made public today reduce the minimum weight limit for recruits from 120 to 110 pounds and the minimum height from five feet four inches, to five feet one inch. This will add thousands who otherwise would be exempt to the national army to be raised by draft and opens the doors of the regular army and National Guard to many volunteers turned down in the past."

Your Health and Comfort Depend Largely on Your Heating Plant

When the cold winds blow--and the frost puts a white coating on everything it can reach, you are going to know just how good your heating plant really is.

The little ones, playing on the floor, are either going to sleep soundly and restfully all night, or they are going to bark with croup!

And the furnace does the deciding--not the quantity of coal you burn.

If there is even temperature in all rooms--in every corner of every room--the rooms facing the chilling winds as well as the others; if there is the right proportion of moisture in the air in your home--and your lungs are not robbed of moisture they need, then you know comfort and health.

And these conditions go hand-in-hand with a

Green COLONIAL Furnace

Has Green's Dome Heat Intensifier

Less fuel--fewer ashes; less shaking and poking--no coaxing!

Green's Dome Heat Intensifier gets the heat out of the fuel--sends a flood of it into every room.

A dome without a single joint--no possibility of gas-leaks!

Direct and Indirect Draft so there is no smoke or gas to get up into the house.

Large feed doors--big enough for the large chunks of coal or wood.

A large, air-blast fire-pot--giving extra high combustion results.

A guarantee that protects you for the life of the Green COLONIAL Furnace against defects of manufacture; a five-year guarantee that no part, excepting the grates, will burn out or crack in any Green COLONIAL.

For your comfort's sake, your health's sake, your satisfaction and enjoyment--for your home's sake and your family's sake--investigate the Green COLONIAL.

"Central" Appreciates Your Kindness

There are three operators concerned in every telephone call--you, the party you are talking to and "central."

All three parties must cooperate if the best service is to be had.

The telephone operators are human, just as you are.

Being human, they appreciate kindness and courtesy, but resent unkindness and discourtesy just as any of us do.

Kindness begets kindness, courtesy creates courtesy and patience encourages patience.

If you wish to get the best out of your telephone, make it a point to be kind and courteous to the operators.
