

How many hours do you sleep?

All the other hours---at least two-thirds of the time---you are using your eyes. Is it to be wondered at that nervousness, headaches, exhaustion and serious illness come from eye strain? Think of keeping muscles under constant strain for 16 hours out of 24. It is easy to see how properly fitted glasses, which remove the strain, improve efficiency, health and disposition. Have your eyes examined at Clinton's today.
