

Strange Impressions.
 "You go to moving pictures instead of to the saloon?"
 "Sure," replied Broncho Bob. "Licker never made the world seem wilder and dizzier than some of them films."
 Don't think that a fancy umbrella handle turns the rain.

Sillies.
 Sall—Why d'yer call me "Honey?"
 'Arry—Because you are my best loved.
 Sall—Oh, be hivy!

If anyone holds four aces in the showdown, the others hold their breath and that's all.

A Message to Mothers

YOU know the real human doctors right around in your neighborhood: the doctors made of flesh and blood just like you: the doctors with souls and hearts: those men who are responding to your call in the dead of night as readily as in the broad daylight; they are ready to tell you the good that Fletcher's Castoria has done, is doing and will do, from their experience and their love for children.

Fletcher's Castoria is nothing new. We are not asking you to try an experiment. We just want to impress upon you the importance of buying Fletcher's.

Your physician will tell you this, as he knows there are a number of imitations on the market, and he is particularly interested in the welfare of your baby.

Genuine Castoria always bears the signature of *Wm. C. Fletcher*

Feed the Fighters! Win the War!!
 Harvest the Crops — Save the Yields

On the battle fields of France and Flanders, the United States boys and the Canadian boys are fighting side by side to win for the World the freedom that Prussianism would destroy. While doing this they must be fed and every ounce of muscle that can be requisitioned must go into use to save this year's crop. A short harvest period requires the combined forces of the two countries in team work, such as the soldier boys in France and Flanders are demonstrating.

The Combined Fighters in France and Flanders and the Combined Harvesters in America WILL Bring the Allied Victory Nearer.

A reciprocal arrangement for the use of farm workers has been perfected between the Department of the Interior of Canada and the Departments of Labor and Agriculture of the United States, under which it is proposed to permit the harvesters that are now engaged in the wheat fields of Oklahoma, Kansas, Iowa, North Dakota, South Dakota, Nebraska, Minnesota and Wisconsin to move over into Canada, with the privilege of later returning to the United States, when the crops in the United States have been conserved, and help to save the enormous crops in Canada which by that time will be ready for harvesting.

HELP YOUR CANADIAN NEIGHBOURS WHEN YOUR OWN CROP IS HARVESTED !!!
 Canada Wants 40,000 Harvest Hands to Take Care of Its 13,000,000 ACRE WHEAT FIELD.

One cent a mile railway fare from the International boundary line to destination and the same rate returning to the International Boundary.

High Wages, Good Board, Comfortable Lodgings.

An Identification Card issued at the boundary by a Canadian Immigration Officer will guarantee no trouble in returning to the United States.

AS SOON AS YOUR OWN HARVEST IS SAVED, move northward and assist your Canadian neighbour in harvesting his; in this way do your bit in helping "Win the War". For particulars as to routes, identification cards and place where employment may be had, apply to Superintendent of Immigration, Ottawa, Canada, or to

Typewriter Service in Rural Communities

The typewriter is coming into more extended use in rural communities because of the assistance it renders to all classes of people. Here are a few examples:

Think of the possibilities of selling produce by the means of typewritten letters sent out to customers? Typewritten letters give the sender a business standing with the people who receive them and also enable the keeping of carbon copies of the correspondence, which many times does away with misunderstandings and lawsuits.

The boy or girl who is intending to follow a business career can secure no better start than a knowledge of typewriter operating. Children who learn to use the typewriter learn spelling at the same time. The housewife finds it a great convenience in writing recipes and for general correspondence.

What's the Answer?
 A short time ago Prof. H. B. Gough, head of the public-speaking department at DePauw university, delivered a talk in a small town in Lawrence county, near Bedford, says the Indianapolis News. He was being congratulated on the talk when one farmer in the audience edged his way to the speaker and asked whether he was in a hurry. Professor Gough, who had to make a certain train, said no, other than he wished to get home at a certain time. The farmer, instead of inviting him to a fine fried chicken dinner, said: "Say, my boy and me heard your talk and we wanted to know whether it was a sermon or an address." Professor Gough made his train and reached home without partaking of any fried chicken.

G. W. Agala.
 "And you mean to say," reprimanded the irate father to his little George, "that you drew out \$100 that your rich Aunt Patricia placed in the bank for you last Christmas?"
 "Father, I cannot tell a lie," answered the boy meekly. "I used it for a Liberty bond. They did it with their advertising." — Indianapolis News.

Most men have ability; too many of us, however, are too tired or too lazy to demonstrate it.

Brazil from 1908 to 1916 received 228,282 new settlers.

Good Memory for Dates.
 "Do you know what day this is?" asked Mrs. Oocy Wattles, sweetly.
 "Oh-huh," replied Mr. Wattles.
 "Sure, it's—ah—"
 "We were married just four years ago this morning," Mrs. Wattles went on.
 "Yes, sir, I remember just as though it was yesterday. And—er—it's next week our lease on the flat expires, isn't it?" — Kansas City Star.

DRUGGISTS PLEASUED WITH GOOD KIDNEY MEDICINE

I have sold your remedy for the past fifteen years and have sufficient confidence in it to give it my personal recommendation. I believe it is one of the best medicines of its class on the market today and I find pleasure in selling it at all times.

Very truly yours,
KAMINER'S DRUG STORE,

EFFECTIVE MOTH TRAP
 New Device to Be Used in Place of "Banding" Method.

Attractive Place Afforded for Larvae to Spin Cocoons, and Prevents Escape of Insects—Wire Screen Is Used.

A codling moth trap has been devised by E. H. Siegler of the bureau of entomology, United States department of agriculture, to be used as a substitute for what is known as the "banding" method for destroying the codling moth. The banding method, in which a folded strip of burlap is wrapped around the tree trunk, demands a considerable amount of labor, and the new trap is designed to minimize this.

The trap affords an attractive place for the larvae to spin their cocoons, and it prevents the escape of the moths after they emerge from these. The

Codling Moth Trap.

trap, which consists of a burlap band covered by a strip of wire screen, is made as follows:

Strips of burlap six inches wide are folded into three thicknesses. The loose bark from the lower branches and trunk of the tree is removed and a strip of this burlap folded once around the trunk. It is held in place by large tacks, which should be driven in in such a way that the edge projects about one-fourth of an inch beyond the burlap. The burlap is then covered by black-painted wire screen with 12 meshes to the inch. This is cut into strips six inches wide and the edges of each strip are folded twice, allowing one-fourth of an inch to each fold. The strip of screen should be long enough to allow for an overlap of three to four inches when placed around the trunk of the tree. The wire screen is placed over the burlap band and tacked to the tree in such a way that both the upper and lower edges fit snugly against the bark. The projecting tacks used to fasten the burlap to the tree prevent the wire pressing against the cloth. To make sure that no moths may escape through openings along the edges of the trap or along the flap, a thin coating of pitch tar may be used. This material, when heated, may be applied readily with a brush.

It must be clearly understood that this trap is not a substitute for spraying, but merely an additional precaution. Nevertheless, some larvae will invariably escape, and the offspring of these are largely responsible for the damage to the fruit crop. By the use of the codling moth trap, in addition to thorough spraying, the majority of the unpoisoned larvae may be captured and injury by later broods will be materially reduced.

SKIM MILK IN FEED RATION
 Not Valuable as Fat Producer When Fed Alone on Account of Lack of Starch and Sugar.

(By JOHN C. BURNS.)
 Skim milk, on the basis of its composition, is of the class known as protein feeds. Being too deficient in starches and sugars (carbohydrates) as well as fat, it is not very valuable as a fat producer when fed alone. When combined with corn or some similar feed in the proper proportions the protein of the skim milk supplies the deficiency of the protein in the corn, while the carbohydrates of the corn supply that deficiency in the skim milk, the two feed stuffs thus forming a balanced ration. This means a ration which contains the nutrients in proportions to meet the needs of the animal body for its best development.

HOLDING MOISTURE IN SOIL
 One of Chief Points in Well-Pulverized Soil, Without Which Soil is Only Ordinary.

One of the chief points of value in a well-pulverized soil is its moisture-holding capacity. It is to hold water that we introduce organic matter as well as to feed the plants, for humus holds soil moisture best, but pulverization alone is highly effective.

BROILER DUCKS FOR MARKET
 Fowls Are Easy to Raise and Develop Fast—Value of Feathers is Quite an Item.

Ducks are easy to raise and develop fast and soon are ready for the market. There is a good profit derived selling them for broilers, but if kept until five or six months old before selling them the value of their feathers gets quite an item.

AIR-TIGHT SILO FOUND BEST
 Silage Will Keep Indefinitely if Air Can Be Excluded—Cover With Chopped Hay or Straw.

Practically all the trouble from spoiling of silage comes from the action of air on the material after the first necessary fermentation is over. The first fermentation or "heating" of the green material uses up all the oxygen of the air which is present in it when it is packed into the silo. If no more air can get in, no further fermentation or decay can possibly take place. If the silo is air-tight, therefore, silage will keep indefinitely. Of course, most silos are open at the top and some spoilage will take place from the top of the mass downwards. But this can be prevented, in large part, by covering the silage, after it has finished settling, with a layer of chopped hay or straw well wetted down.

GOOD MIXTURE FOR THE CALF
 Something Must Be Given to Replace Butterfat When Skim Milk Is Substituted for Whole Milk.

When skim milk is substituted for whole milk in feeding the calf, something needs to be added to replace the butterfat removed in the cream. Corn can be used to good advantage. It is better cracked than ground fine. Bran is good and ground oats are splendid. A mixture is better than just one of them. The calf will begin to eat feed when two to three weeks old, and should have access to it. The best way to feed grain is dry and care should be taken not to allow any of it to remain in the corners of the feeding box as it will sour and may cause digestive troubles. Boiled ground flax seed is also used with skim milk to make up for the fat removed.

WATER BASIN FOR CHICKENS
 Device Shown Here With Advantage of Keeping Fowls From Getting Into Vessel.

This device has the advantage of keeping the chickens from getting into the basin wherein the water for their use is kept. The mouth of the vessel containing the water also is protected by an inclosing shield, while the top is

Poultry Watering Basin.

covered with a screen which keeps the poultry out of the water, yet does not keep the water away from the air places for drinking are provided at the side of the device.—Farming Business.

POOR CULTIVATION OF CORN
 Reason Given for Low Yields in Corn Belt States—Hired Men Have Forgotten Hoe.

In the corn-belt states, where one might expect the largest yields, they are in many cases very low. The reason for this is largely poor cultivation. Too many men try to get over about twice as much as they can handle profitably. The average hired man in the corn belt has forgotten how to run a hoe handle, and but little effort is made to get the weeds out of the hills in many cases. Better cultivation is a vital need in corn raising.

CARE FOR STRAWBERRY BEDS
 Good Plan to Renew as Soon as Fruit Is Picked—Hoe Out All the Weak Plants.

As soon as the strawberries are picked, if the bed is clean and the plants thrifty, it is a good plan to renew the bed. Mow the tops and rake them off, then hoe out all old weak plants and thin to a row of strong vigorous, new plants, not nearer than ten inches apart. Cultivate the rest of the season.

COOKED TOMATOES FOR HOGS
 Where There is an Excess Amount of Vegetable They May Be Prepared and Fed to Swine.

On farms where there is an excess of tomatoes, the surplus may be cooked and fed to hogs. The hogs would not eat the green tomatoes unless cooked. That which is not needed for immediate use is stored away in air-tight barrels for future use. The top layer decays, but that beneath remains good.

ALL SOILS SHOULD BE LOOSE
 Lumpy State Permits Drying Out Too Quickly—Where Pulverized Crops Are Successful.

Loose soils and lumpy soils are not one and the same condition, for whereas all soils should be loose, none should be lumpy. The latter state allows drying out so quickly that crops would fail whereas when soil is pulverized the same crop would be a marked success.

Horrors of War.
 They were in the squad under training at a certain military center and furnished a contrast not uncommon these days. One was tall and wiry, the other short and puffy, and an hour of Swedish drill had set the lesser of the two blowing hard.
 "I can't stand much of this," he whispered. "I'm simply all in," and at that moment the drill sergeant intimated that he would give them another spell before they were dismissed.
 "This was too much. The podgy patriot felt it was time to protest.
 "I'm really awfully sorry to seem unmilitary in addressing you, sir," he said, "but this Swedish drill is more than I can face in my present condition; besides," he added dolefully, "I never knew we were at war with Sweden."

CUTICURA IS SO SOOTHING

To Itching, Burning Skins—It Not Only Soothes, but Heals—Trial Free.

Treatment: Bathe the affected surface with Cuticura Soap and hot water, dry gently and apply Cuticura Ointment. Repeat morning and night. This method affords immediate relief, and points to speedy healing. They are ideal for every-day toilet uses.
 Free sample each by mail with Book, Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Canada's Liberal Offer of Wheat Land to Settlers

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads Are Actually Free to Settlers and Other Land Sold at from \$15 to \$20 per Acre

The great demand for Canadian Wheat will keep up the price. Where a farmer can get near \$2 for wheat and raise 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets, convenient climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. Write for literature and particulars as to reduced railway rates to Dept. of Immigration, Ottawa, Ont., or to

Had a Warm Job.
 The fact that half of the world hasn't thought of how the other half is living has been pretty well established, but even now the details of old and oppressing duties and routine is of interest. A remarkably pretty girl swooned while standing at the side of a bench on a subway platform, says a New York news letter. She fell heavily, and soon from the rush hour through several women had gathered about her. She revived quickly and looked about rather apologetically. "Thank you," she said to a woman who was holding a wet handkerchief to her forehead. "I just got dizzy for a moment." She closed her eyes again and looked very white and weak. "I guess I'm all right," she said after a little. "I'm tired and warm. I'm working as a cloak model downtown and all day I've been trying on fur coats. I'm just tired."

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man, "Give me a small bottle of freezone." This will cost very little but will positively remove every hard or soft corn or callus from one's feet.
 A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly, and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.
 This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.
 If your druggist hasn't any freezone tell him to order a small bottle from his wholesale drug house for you.—adv.

These Girls.

"I wonder who is ringing the door-bell. Is it some chump who merely wants to hang around the parlor, or is it a nice chuddle who wants to take me for a ride in his automobile?"
 "Take a sniff at the keyhole, girlie, and see if you can smell gasoline."

A Screen Scream.

"Isn't she a moving-picture star?"
 "More of a planet. She shines by reflected light."—Life.

WOMAN NOW IN PERFECT HEALTH
 What Came From Reading a Pinkham Advertisement.

Pateron, N. J.—"I thank you for the Lydia E. Pinkham remedies as they have made me well and healthy. Some time ago I felt so run down, had pains in my back and side, was very irregular, tired, nervous, had such bad dreams, did not feel like eating and had short breath. I read your advertisement in the newspapers and the newspapers and decided to try a bottle of Lydia E. Pinkham's Vegetable Compound. It worked from the first bottle, so I took a second and a third, also a bottle of Lydia E. Pinkham's Blood Purifier, and now I am just as well as any other woman. I advise every woman, single or married, who is troubled with any of the above-mentioned ailments, to try your wonderful Vegetable Compound and Blood Purifier and I am sure they will help her to get rid of her troubles as they did me."
 Mrs. ELSIE J. VAN DER SANDE, 36 No. York St., Pateron, N. J.
