**Girls as Bell Ringers.**  
Bell ringing is being done by girls in the little village of Longstock, Ireland, as the young men who used to perform this duty have joined the army. The chiming is excellently and regularly performed by three or four girls, trained by a local lady, and week-day and Sunday the bells send out their cheery message over the countryside. This may not be essential war-work, observes a correspondent, but it is one of immense value to the morale of the neighborhood, and a work which would be left undone, like so many other "odd jobs" of wartime, but for the good offices of the women at home.

**KIDNEY TROUBLE OFTEN CAUSES SERIOUS BACKACHE**

When your back aches, and your bladder and kidneys seem to be disordered, go to your nearest drug store and get a bottle of Dr. Kilmer's Swamp-Root. It is a physician's prescription for ailments of the kidneys and bladder.

It has stood the test of years and has a reputation for quickly and effectively giving results in thousands of cases.

This preparation so very effective, has been placed on sale everywhere. Get a bottle, medium or large size, at your nearest drugist.

However, if you wish first to test this preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

## The DAIRY

PUREBRED SIRE OF BENEFIT

Use of Animal Will Result in Great Improvement of Herd—Have Better Cattle.

There never has been a time when the common cow was at such a disadvantage to her owner as the present time. It takes a good cow to pay her way these times. A great many cows will be sold this fall because they would be unprofitable this winter, and yet every cow that will produce a calf is needed by the country.

Is it not a good time to make a resolution and live up to it, to have better cattle? The common cow was all right for cheap land and cheap feed. She must still do to mother better

Superior Purebred Bull.

cows, for the great majority of farmers who still have common cows. Get a purebred sire this fall, and if you can, one that can be used this fall. The use of purebred sires for ten years will generally result in a herd that passes in appearance for purebreds. Surely it is worth while. A man is not as good a farmer as he can be, unless he is improving his herd.

**FISH MEAL GOOD FOR COWS**

Nutritive Value as Affecting Milk or Butter Production Compares Well With Cottonseed.

The use of fish meal as a feed for dairy cows is not strictly a new feed, but only lately has the government seriously undertaken a study of it as a practical ingredient in dairy rations. Fish meal is a by-product of the fish industry. Waste from salmon and sardine canneries is especially excellent for the manufacture of high-grade fish meal.

Preliminary experiments made by the U. S. Dairy Division show that the meal has no detrimental effect on the quality of milk or butter, and that the nutritive value of fish meal as affecting production compares favorably with cottonseed meal. An average analysis of fish meal is as follows: Water, 5 per cent; ash, 16; protein, 60; fat, 14; salt, 5.

Fish meal is manufactured from the fresh waste of fisheries by a process of steam cooking, pressing, and drying. It is preferably made from freshwater fish to avoid too high a content of salt. Dried-fish products, known as fish scrap or "pomace," are used considerably for fertilizing purposes and fish meal fed to farm livestock retains all its valuable fertilizing properties.

**COWS REQUIRE PURE WATER**

Supply Constitutes Three-Fourths of Volume of Milk and Demands Dairyman's Attention.

All animals require plenty of good, pure water. This is especially true of the milking cow, as water constitutes more than three-fourths of the volume of milk. The water supply, therefore, demands the dairyman's most careful attention. Stale or impure water will not drink enough for maximum milk production. Such water also may carry disease germs which might make the milk unsafe for human consumption or be dangerous to the cow herself. During the winter, when cows are stabled the greater part of the time, and unless arrangements have been made to keep water before them all the time, they should be watered two or three times a day. If possible, the water should be 15 or 20 degrees above the freezing point, and should be supplied at practically the same temperature every day.

**URGE SKIMMING RICH CREAM**

Saving Can Be Accomplished by Turn of Cream Screw, and Is Well Worth Effort Required.

In skimming a hundred pounds of 35 per cent cream, 15 more pounds of skim milk is kept on the farm than when the same amount of 20 per cent cream is taken. This saving can be accomplished by a turn of the cream screw, and at present feed prices is well worth the effort required. More skim milk on the farms also means more calves raised to furnish meat and milk for all. Milk producers are paid for the butterfat in cream; not for the water and other constituents. This makes it advisable to skim a rich cream.

**Why That Lame Back?**

Morning lameness, sharp twinges when bending, or an all-day backache; each is cause enough to suspect kidney trouble. Get after the cause. Help the kidneys. We Americans go it too hard. We overdo, overeat and neglect our sleep and exercise and so we are fast becoming a nation of kidney sufferers. 72% more deaths than in 1890 is the 1910 census story. Use Doan's Kidney Pills. Thousands recommend them.

**An Iowa Case**

Frank J. Rooney, grocer, 133 Julien Ave., Dubuque, Iowa, says: "I have a rheumatic pain in my left hip, often extending into my shoulder. I felt nervous and had little ambition. I knew my kidneys weren't acting properly and I began using Doan's Kidney Pills. They soon cured me and toned up my system. I am glad to say that the cure has been permanent."

**Would Save the Cake.**

Johnny had often seen the new food signs posted up everywhere, telling people not to waste food and use what is left. One day he was invited to a birthday party. In a short while the birthday cake was cut up and each child had a piece, and there was a big piece left. The maid was going to take this piece away when Johnny called to her and said, "I think I can use the piece that is left."

**Five Generations in Wars.**

Five generations of one family have served in the United States wars, the chain being completed by the recent enlistment at Los Angeles of a young man named Bennett. Not only did his two grandfathers, Bennett and Brookover, serve in the Civil war, but his great-grandfather, Daniel Bennett, was also a veteran of that war. The young man's great-great-grandfather, Asa Bennett, was in the war of 1812, and his two great-great-grandfathers, Bennett and Harris, were in the Revolutionary war. Although not in direct line of ancestry, young Bennett's uncle, Harry Brookover, represented the family in the Spanish-American war.

**Youngest British Soldier.**

The youngest soldier at the front and the youngest N. C. O. in the British army is a lad of eleven, who is attached to an A. S. C. unit. He was specially enlisted to act as interpreter, as he speaks English and French fluently. He was made a sergeant and is now regarded as a mascot.
