EUROPE NEEDS FOOD

Food Administration Declares It Is an Absolute Sin to Waste Food—Food Has Become Sacred.

Europe is still sending an insistent call for more food. We must send it if the war is to go on efficiently. If we eat it all we cannot ship it, and the food administration has already tried to picture how much that wheat is needed by people who will starve if they do not get it, the food administration states.

"For the least bit of heedlessness on your part in food conservation some one somewhere in the world must suffer privation," an official statement declares. "The food administration has mastered the problem of America's food in such a way that every ounce of food conserved and kept in the currents of trade goes to an empty stomach in Europe."

"It is an absolute sin to waste food. Food has become sacred."

"Food means life; it means somebody's life, and you cannot escape responsibility."

"There is no waste of food among the allied nations."

Registration of Alien Enemies

He can apply at such office for blanks to fill out, which after being filled out should be returned to the postmaster. If the registrant moves from one precinct to another he must notify the postmaster of such removal. A severe penalty attaches to those who fail to register.

The postmasters are designated as the registrars in all towns having less than 5,000 population in 1910, therefore Postmaster McEvoy will be such registrar for North Platte and not the police officer as stated.

Beet Growers Ask More.

An item of interest to all farmers in this part of the state who grow sugar beets is that twelve dollars per ton for sugar beets as compared with \$7.00 per ton paid in 1917, is the price that the farmers who are raising sugar beets in the territory west of here propose asking. The proposed contract on the part of the sugar company for 1918 is \$8.50 to \$9.00 per ton, which with the bonus would net farmers \$9.00 to \$10.00 per ton. The growers, however, are insisting that under present conditions, they should receive \$12 per ton. The labor question is one of the most important factors entering into the production of sugar beets in northwest Nebraska.
