For Sale—Large comfortable nine room house, thoroughly modern, large basement, back yard all enclosed. Located in good residence district. If you are going to buy a home you should look at this before buying.
L. C. SAWYER, 908 W. 5th.
Thomas Dixon said, "The young girl who rushes into marriage is a fool. More girls lives are ruined by hasty marriage than by any other process." The fact is ably presented in the picture "The Foolish Virgin," showing at the Keith Wednesday and Thursday. It is a picture that will be worth your time seeing because of the line of thought presented.
Two men who declined to settle a monetary transaction by reason of a difference of one dollar and forty cents, were about to begin an action in the county court yesterday. "Is this \$1.40 all the difference there is between you two men?" asked Judge Woodhurst. "That's all" was the reply. "Well," said the Judge, "that's too small sum to go to law with so will decree one of you the \$1.40 and assess the costs to the other." And the case ended then and there.

WILL UNVEIL SERVICE FLAG THIS EVENING.

At the K. P. hall this evening the Yeoman lodge will unveil a service flag containing thirty-two stars which represent the number of members of the local homestead who have joined the colors. Preceding the unveiling of the flag a program of patriotic music will be rendered and addresses made by Judge J. S. Hoagland and John E. Evans.
All Yeoman members and their families and those who have relatives in the service list who are not members of the order are cordially invited to be present.
The service flag bears a star for each of the following:

It's the Way GMC TRUCKS are Built—that Makes Them Superior

GMC Trucks serve right because they are built right; their construction principles and materials have been proved right in years of hardest service.
Consider just one item in many of this right building—the matter of brackets.
Brackets on GMC Trucks are machined on all surfaces coming in contact with the frame. Specially built machines do the work—yet it is a mere detail of GMC construction, so mere a detail that many truck makers do not bother to do it.
With this machining the connection is perfect; brackets and frame are one, no fin of metal from hot rivets can insert itself between—maximum strength is given throughout the life of the truck.
We could point out other instances, but it isn't necessary. Let us give you facts and figures on what GMC Trucks are doing in actual work. Let us prove to you that what we have said about this superior building of GMC Trucks is true.
