

WRIGLEYS

Six reasons

WHY It's a good friend:

- 1—Steadies nerves
- 2—Allays thirst
- 3—Aids appetite
- 4—Helps digestion
- 5—Keeps teeth clean
- 6—It's economical

Keep the soldiers and sailors supplied!

Three Flavors

Chew it after every meal

The Flavor Lasts!

And Why Not?
A witness in a Milwaukee court incurred the wrath of the judge by taking a sack of potatoes to the stand with her and starting to peel them while testifying, according to the New York Tribune.

To his honor's rebuke she replied calmly:
"If those folks," nodding at several other women in the courtroom, "can knit, why can't I peel?"
This brought up a point which the judge is still trying to answer adequately.

\$100 Reward, \$100

Catarh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work. \$100.00 for any case of Catarh that HALL'S CATARRH MEDICINE fails to cure. Druggists 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

The Affronted Galloper.

Sir Frederick Smith—"Gallop," as he is sometimes called in England—got into difficulty now and then during the American visit on account of his fiery and ebullient nature.

"Gallop" Smith had an altercation with an Irish-American lawyer at a trial that he attended in New York. The altercation became very warm. Finally one of the Galloper's supporters said, with a sneer and a toss of the head towards the Irish-American: "Come away, Sir Frederick. Remember your rank."
"Remember I'm what?" roared Galloper Smith fiercely.

It is right to resist oppression.

DAIRY

BEST DAIRY CATTLE BREDS

In Making Selection Dairyman Should Take Local and Market Conditions Into Consideration.

(Prepared by the United States Department of Agriculture.)

Breeds of dairy cattle differ in both conformation and general characteristics. Each has been developed for certain ends. To make the greatest success a dairyman in selecting a breed should take local conditions and marketing requirements into consideration in connection with the characteristics of the various breeds. He should not allow personal preference to influence his selection if his favorite breed is unsuited to local conditions, but should give careful consideration to the breed or breeds already established in his community. In such a selection he is benefited in many ways.

Jersey Cow in Pasture.

For instance, a market is established, surplus stock may be disposed of to better advantage, co-operative advertising may be used and bulls may be bought co-operatively or exchanged readily among breeders.

Jersey cattle, the most numerous breeds in the United States, originated in the island of Jersey. Jerseys and Guernseys probably had the same foundation stock, but have been developed toward different ideals so that the breeds now differ in a number of particulars.

Jerseys vary considerably in color. Shades of fawn, squirrel gray, mouse color and very dark brown are common. Jerseys have a highly organized nervous system and are usually somewhat excitable, responding quickly to good treatment and good feed. Cows average about 900 pounds and bulls 1,600 pounds in weight. The Jersey cow gives rich, yellow-colored milk and is an excellent butterfat producer.

In the Jersey breed, the average of 5,244 cows that had completed yearly records for the register of merit was 7,792 pounds of milk, testing 5.35 per cent, making 417 pounds of butterfat. The ten highest milk producers ranged from 19,694.8 to 16,933.2 pounds, an average, for these ten, of 17,703.4 pounds of milk. The ten highest butterfat producers range from 909.1 to 875.2 pounds, an average, for these ten, of 943.1 pounds of butterfat.

HINTS ON MILK PRODUCTION

Cows Should Be Kept Clean and Milked in Clean Surroundings into Covered Pail.

(Prepared by the United States Department of Agriculture.)

After any foodstuff is produced one of the important things is to see that it is put on the market in good shape so that it will keep for a reasonable length of time without loss through spoilage. In this time of need for food every effort should be made to prevent milk from spoiling. Cows should be kept clean and should be milked in clean surroundings into a small-top or covered pail. All utensils which come into contact with the milk should be thoroughly sterilized with steam for at least five minutes, and milk should be cooled promptly to 50 degrees Fahrenheit or less and maintained at that temperature. Whenever these conditions are met, little milk will be wasted. In this time of terrible destruction of human life it is particularly necessary that milk be produced under such conditions as to insure a safe food for babies. This must be done by a decreasing number of men trained to do it. A great task and a great opportunity for dairymen are involved.

She Did.
"When I met Miss Oldgirl she was looking for a flat. Did she get one?"
"Oh, yes. She married it."

ONLY NEED TO CURB WASTE

Writer Points Out Reasons Why It is Not Hard for American People to Save.

I do not know of a thing which everyone of us needs to keep closer to his consciousness than saving wherever and whenever possible. What most of us are prone to forget is our greatest asset at this time—the amount and extent of what we can save. As a people and as individuals we have been needlessly and disgracefully wasteful, have spent money, food, energy, productivity, simply because we were too lazy and indifferent to get no more than we needed to satisfy our reasonable desires. Seriously, that past wastefulness is just now about our greatest asset. We can save what we must without involving a degree of real sacrifice which the French, Belgian, and English people had at once to face. As I look upon it, saving at a real cost to one's comfort, ideals, and perhaps health is not an easy thing, though a very fine one. But saving for such easy-going reckless-spending people as we have been, means so little sacrifice of anything necessary or worth while that a man or woman will be some sort of a yellow cur or nameless pup not to do his or her utmost every day and every hour to save, save, save—and win.—By Roland G. Usher of the Vigilantes, Author of Pan-American.

Last Stage.

"Young Chumpton is attentive to Miss Fadleigh."
"Yes."
"Is he very far gone?"
"I'm afraid so. He's talking about buying a big automobile to match her eyes."—Birmingham Age-Herald.

Appropriate View.

"What do you think of hanging as capital punishment?"
"I think it is better to let the subject drop."

The man who seeks the loan of children to avoid the draft borrows real trouble.

The man who wins is the man who works, and the man who fails is the man who shirks, generally.

As a rule, the truthful gravestone is marked for the brevity of its inscription.

We'll say this for the weather man; he's too wise to try making war predictions.

Yes, Elizabeth, you can get a first class waffle impression by sleeping on an old-fashioned corded bedstead.

Heaven never helps the man who is too lazy to hustle a little in his own behalf.

Girls should never flirt in public until after they have a strong hold on the art.

The chief burden of a woman's life is her neighbor.
