POULTRY FACTS

RATIONS FOR LAYING STOCK

Pullets on Farm Should Get Large Part of Feed by Foraging if No Snow on Ground.

(Prepared by the United States Department of Agriculture.)

When there is no snow on the ground pullets on the farm ought to get a large part of their feed by foraging. Whether they can get it depends not only upon what food may be available but on whether they have been so distributed as to get the feed on the range. To find whether they require more is to observe how far they range and whether they find feed enough to keep them busy most of the time, and then to test them further by seeing how much they eat heartily in the morning, and then go foraging, and also how much they eat just before going to roost at night. Pullets that forage well and have the opportunity to get plenty of green food, worms and bugs cannot be overfed by giving them what grain they will eat up clean. Careful feeders learn just how much their flock will take, and so avoid waste while keeping the birds full fed.

Pullets in confinement should have the same ration they will have in the winter, and be liberally supplied with the vegetable feeds available at the season. Liberal use of these makes it

possible to feed grains heavily, to promote egg production, and yet keep the birds in the best of physical condition. A good war-time standard ration is:

Mash.

- 2 parts cornmeal
- 1 part bran
- 1 part middlings
- 1 part ground oats
- 1 part meat scrap or fish meal

Scratch Feed.

- 1 part cracked corn
- 1 part heavy oats

Green Feed.

Cabbage, sprouted oats or any available green vegetable. Another good ration with less beef scrap is as follows:

Mash.

- 5 parts mixed feed (bran and middlings)
- 4 parts cornmeal
- 1 part beef scrap or fish meal

Scratch Feed.

- 1 part cracked corn

Green Feed.

Cabbage, sprouted oats or any available green vegetable.

For a moist mash use eight parts of mixed feed instead of five. Sprouted oats are recommended as green feed, not as preferable to cabbage and other green vegetables when these can be obtained, but in order to use oats as much as possible.

SUCCESS IN RAISING PIGEONS

Good Breeding Stock is Essential and It is Best to Purchase From Reliable Breeder.

Good breeding stock is necessary to succeed in pigeon raising. It is advisable to buy pigeons from reliable breeders—those who guarantee their stock. Many failures in squab raising have been due to poor stock—old pigeons past their period of usefulness or perhaps too many male birds. There are a great many varieties of pigeons but only a few are used in squab raising. The Homer is generally considered the most popular variety.

SIX VARIETIES OF TURKEYS

Bronze, White Holland, Bourbon Red, Black, Narragansett and Slate Are Recognized.

The American Standard of Perfection recognizes six different varieties of domesticated turkeys as most desirable, the many others being largely mongrel, breeding from which is always uncertain as to quality of the progeny. The standard varieties are the Bronze, the White Holland, Bourbon Red, the Black, the Narragansett and the Slate.

Highway Improvement

IOWA DOES GOOD ROAD WORK

Lincoln Highway Official is Pleased With Progress—Each County Preparing to Aid.

That good work is being done in the improvement of the Lincoln highway through Iowa is the assertion of H. C. Ostermann, field secretary of the Lincoln Highway association. Mr. Ostermann recently made a trip of inspection through the Hawkeye state and the results were more than satisfactory to him.

On his journey across the state the Lincoln highway official was accompanied by D. E. Goodell of Tama, Ia., state consul of the Lincoln Highway association, and Thomas H. MacDonald, J. W. Holden and H. C. Beard of the Iowa state highway commission.

Enthusiastic and well-attended Lincoln highway meetings were held at numerous points across the state; a splendid program of Lincoln highway improvement was revealed by the reports submitted at these meetings. Covering the most important developments, Mr. Ostermann states:

"Seventeen miles of the Lincoln highway in Clinton county have already been graveled with federal aid funds; applications for federal aid funds have also been made by Cedar and Pottawattamie counties, and similar applications will be filed in the immediate future by Linn, Tama, Benton and probably Crawford counties."

A Lincoln highway seedling mile is now under way in Linn county, and existing arrangements call for the complete graveled of all the rest of the Lincoln highway in the county. In a similar fashion the plans in Marshall county call for the graveled of every foot of the Lincoln highway from county line to county line. Story, Boone and Greene counties are practically all graveled at the present time and an all-weather road is reported.

The visiting officials found that Crawford county had spent more money than any other county in the state in grading the Lincoln highway.

Field Secretary Ostermann and State Consul Goodell expect that by

the end of 1918 there will be 1,000 sustaining members of the Lincoln Highway association in Iowa.

Plans for the permanent marking of the route across the state were discussed with the various local officials, and consuls of the national association, and each county in the state is preparing to aid in financing this project to the extent of \$300. A start has been made in this direction, following the action of Pottawattamie county in voting \$200 for this purpose, to which the city of Council Bluffs has added \$100.

The importance of the Lincoln highway improvement in Iowa was attested by the presence and interest of State Engineer MacDonald and his associates at the various meetings.

REPAIRS NEEDED FOR ROADS

Necessity and Desirability of Eliminating Holes and Ruts Should Be Brought Out.

In order that the roads may not be entirely destroyed or put into a condition requiring complete rehabilitation the government ought to impress upon states, counties, cities, villages and townships the necessity and desirability of eliminating every mudhole, every depression, by filling in; it should ask that culverts and bridges be kept in a reasonable state of repair and it should command that every highway should regularly and systematically be dragged after every rain, that high spots may be eliminated, low spots filled and the roads made as smooth and safe as possible with this temporary scheme to aid, as far as possible, transportation over public highways.—Pitt and Quarry.

Stand Heavy Motor Traffic.

It is perfectly possible to build roads which will stand up under the heaviest motortruck traffic, as the state of Connecticut has amply proved.

Road Builders Are Made.

Road builders are seldom born, but are made and trained largely at public expense. You either pay for the trained man or you pay to train one.

Cry Everywhere for Roads.

There is everywhere the cry for roads, and for better roads.

Swift & Company, Chicago, 1918. One of Our 22 Packing Plants in U.S.A.

Unlike Topsy— Swift & Company Has Not "Jest Grown"

Swift & Company, in fifty years of well ordered growth, has become one of the great national services because it has learned to do something for the American people which they needed to have done for them, in the way in which they preferred to have it done.

It has met each successive demand, in the changing conditions of national life, by getting good meat to increasing millions effectively, efficiently, economically, and expeditiously.

The Swift & Company packing plants, refrigerator cars, car routes, branch houses, organization, and personnel of today are the practical solutions, born of practical experience, to the food problems of half a century.

Because of all these elements working in correlation and unison, Swift & Company is able to supply more and better meat to more people than would have been possible otherwise, at a net profit per pound of meat so low (a fraction of a cent) that the consumer price is practically unaffected.

Strip away any portion of this vast, smooth-running human machine, and you make a large part of the meat supply uncertain, lose the benefit of half a century of fruitful experience, and scatter the intelligent energies of men who have devoted a life work toward meeting the needs of a nation in one vital field.

The booklet of preceding chapters in this story of the packing industry will be mailed on request to Swift & Company, Union Stock Yards, Chicago, Illinois.

Feel Lame and Achy?

Colds and grip leave thousands with weak kidneys and aching backs. The kidneys have to do most of the work of fighting off any germ disease. They weaken—slow up, and you feel dull, irritable, or nervous—have headaches, dizziness, backache, sore joints and irregular kidney action. Then the kidneys need prompt help. Use Doan's Kidney Pills. Thousands praise Doan's for quick, satisfactory results.

An Iowa Case

Acid-Stomach Makes Millions Old Before Their Time

What is it that robs so many people of their vitality, youth and good looks—makes them all in and decrepit, years before their time? Some say it's rheumatism that is ailing them. Others complain of chronic stomach or liver trouble. Others are bilious. Life is a burden to multitudes of dyspeptics. Severe headache, extreme nervousness, insomnia, dizziness, vertigo, heart and chest pains, constipation, etc., claim other sufferers. Sometimes these people are downright sick. More frequently they are just weak, sticky and unlit, not knowing exactly what is the matter with them. Nearly always they resort to medicines getting back their health and strength. And nearly always they are disappointed, because medicines don't build strength unless they eat the stomach free from acidity, allowing it to take full strength out of the food eaten.

People who marry for money usually live to regret that they didn't learn a trade instead.

Into every part of the system. The famous scientist, Metchnikoff, said if the system could be kept free from these toxic germs, people might easily live a hundred years or more. A way has been found in the wonderful preparation, called EATONIC—a compressed compound that absorbs the excess acid and carries it away through the bowels. Thousands upon thousands now know of EATONIC and its amazing power to clean out the excess acid and leave the stomach sweet, cool and strong—giving it a chance to properly digest food so that you get full strength of what you eat and in this way help Nature build up vigorous health, strength and vitality to take the place in a few days, of sickness, lassitude, weakness. EATONIC is worth your trial. Its possibilities for restoring health, vigor, energy and vitality are beyond telling you in mere words—you must "just try it."
