HALL'S CATARRH MEDICINE is tak-en internally and acts through the Blood on the Mucous Susiaces of the System. Sold by druggists for over forty years. Price 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

Visitors.

Knicker-Why are your wife's folks coming to visit you? Bocker-They think I want to have their personal counsel.

Lost.

"But what was his reason for wanting to marry?" "None whatever. A man loses that before he does it."

No man is a hopeless fool who can keep his ignorance concealed.

Those of us who are past middle age are prone to eat too much meat and in consequence deposit lime-salts in the arteries, veins and joints. We often suffer from twinges of rheumatism or lumbago, sometimes from gout, swollen hands or feet. There is no longer the slightest need of this, however, as the new prescription, "Anuric," is bound to give immediate results as it is many times more potent than lithia, in ridding the impoverished blood of its poisons by way of the kidneys. It can be obtained at almost any drug store, by simply asking for "Anuric" for kidneys or backache. It will overcome such conditions as rheumatism, dropsical burning urine and sleeplessness due to constant arising from bed at night.

Send to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for a 10c. trial package.

MADERA, CAL .- "1 recommend Doctor Pierce's Anuric very highly. I have suffered for the last three years with catarrh of the bladder, having tried every remedy I heard of but without relief. I saw Anurie advertised in the paper, and like a drowning man grabbing at a straw I thought I would try it also, which I did with great success, as it relieved me almost immediately, before I had taken all of the trial package, and having great confidence in the remedy I immediately sent to the drug store and bought a full-size package, I can say to all suffering from any disease of the kidneys or uric acid troubles, try this remedy and suffer no longer. I have great faith in Dr. Pierce's remedies."-S. P. HENSLEY.

OLD PRESCRIPTION FOR WEAK KIDNEYS

Have you ever stopped to reason why it is that so many products that are ex-tensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain-the article did not fulfil the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent re-sults, as many of my customers testify. No other kidney remedy that I know of has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmers' Swamp-Root is due to the fact that so many people claim, it fulfills al-most every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism. You may receive a sample bottle of Swamp-Root by Parcel Post, Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores .- Adv.

THE SEMI-WEEKLY TRIBUNE, NORTH PLATTE, NEBRASKA,

TREES MUST BE PROTECTED Girdling by Rabbits Is Usually Done

in Winter, but May Occur at Other Seasons,

One of the dangers to be guarded against in the case of young tree plantations is girdling by rabbits. While this is most apt to occur in winter, damage may be done at other seasons if these animals are plentiful and other food is scarce.

"The cheapest and easiest method of checking the trouble," says Prof. B. O. Longyear of the Colorado Agricultural college, "is by means of some material offensive or poisonous to rabbits which can be painted on the trunks of trees. Lead or other oll paint, tar, creosote or similar substances are unsafe to use on small trees, such as rabbits usually injure.

"The following preparation is useful and safe for this purpose; Boil together one pound of quicklime and one pound of sulphur in a gallon of water

Demr ! Makes Opportunity for **Aeturning Soldiers.** bilities in Settlement of Available Farm Land in This Country and in Canada.

The war is over, peace will soon be

signed, the fighting nations have sheathed their swords, and the day of econstruction has come.

What of it? Hundreds of thousands of men. taken from the fields of husbandry. from the ranks of labor, from the four confines of the workshop, taken from them to do their part, their large part, moved from the gear of common every- has rendered. day life, will be returning, only to find in many-cases old positions filled, the machinery with which they were for-

merly attached dislocated. Are they to become aimless wanderability to assist in laying new foundastructures, is underestimated. Men enemy partially destroyed, when it comes to the reconstruction of the world, the ideals of which they had in view when they took part in the great struggle whose divine purpose was to ring about this reconstruction.

Inured to toil, thoughtless of fatigue, trained in initiative and hardened by their outdoor existence, they will rehave matured and young men will have developed.

They will decide for themselves lines of action and thought, and what their future should and will be. On the field of battle they developed alertness and wisdom, and they will return with both shedding from every pore.

Action was their watchword, and it will stand them in good stead now that the din of the battle no longer rings. in their ears, or the zero hour signals them to the fray, and it will continue their entire existence.

But if they return to find their old avocations gone, their places filled, the institutions with which they were connected no longer existing, new walks of life and employment must be opened to them. It may be that the counting house, the factory, the workshop will have lost their attraction. The returned soldier will look elsewhere for employment; within his reach there is aiways the "Forwardto-the-Land" necessity. In this lies the remedy that will not only take care of a multitude of those who may not of a multitude of those who may not be able to return to their former occu pations, whose desires are not to do so, whose health prohibits them from indoor life or whose outdoor habits from the past one, two, three or four years have given them such a taste and desire for it that confinement would be unbearable. Farm life will thus appeal to them, and the indications are that it will be taken advantage of by thousands. It means much to them as well as to the continent of America that provides the opportunity to the world at large, and to the stricken and famished nations of Europe, who, not only today, but for years to come, will require the sustenance that can only largely be supplied by the United States and Canada. By following the pursuit of agriculture the returned soldier will continue the cause he so greatly advanced when fighting on the field of battle. Both countries have tree trunk is the most effective protec- undeveloped areas yet open to settlement.

But now that the war is ended, and indissoluble as time itself .- Adverthe fact apparent that of all avocations the most profitable and independent is that of the farmer, there will be

a strong desire to secure farm lands ers, with the ultimate possibility of for cultivation. Canada offers the opugmenting an army of menacing portunity to those seeking, not as specoafers? If they do it is because their ulation but as production. The deepest interest is taken by Federal and tions, in building up much-required Provincial authorities to further the welfare of the farmer and secure a who fought as they fought, who risked maximum return for his efforts. Large and faced dangers as they did, are not sums of money are spent in educaof the caliber likely to flinch when it tional and experimental work. Encomes to the restoration of what the gaged on experimental and demonstration farms, and in the agricultural colleges, are men of the highest technical knowledge and practical experience, some being professors of international reputation. The results of experiments and tests are free and available to all. Educational opportunities for farmers are the concern of the government and appreciation turn better and stronger men, boys will is shown by the number of farmers who attend the free courses.

> Agriculture in Canada has reached high standard, notwithstanding which lands are low in price.

Thus upon the United States and Canada for many years will rest the great burden of feeding the world. With free interchange of travel, difficulties of crossing and recrossing removed. Canada may look for a speedy resumption of the large influx of settlers from the United States which prevailed previous to the war, During the war period there was a dread of something, no one seemed to know what. If the American went to Canada he might be conscripted, put in prison, or in his attempt to cross the border he would meet with innumerable difficulties, most of which, of course, was untrue. These untruths were circulated for a purpose by an element, which, it was discovered, had an interest in fomenting

attention to the wealth that has come tween two peoples whose language to the farmers of Canada within the and aims in life should be anything past few years. It is not only in grain but of an unfriendly character. The growing that unqualified and almost draft law of the United States, adoptunequaled success has followed honest ed for the carrying out of the high effort, but the raising of horses, cattle, purposes had in view by the United sheep and hogs has been a large source States, kept many from going to Canof profit. These are facts that are ada during the period of the war. The well known to the many friends and citizen army of the United States acquaintances of the thousands of was quickly mobilized, and contained Thousands Will See Glorious Possi- farmers from the United States who a large percentage of the young men have acquired wealth on the prairies from the farms. for one hour. Dilute this with hot water, then, to make three gallons. To this add one quart of strong soapsuds or a pint of soft soap and allow the dry work heavier this winter; Red mixture to cool. The mixture may be made more effective by the addition of two or three ounces of carbolic acid. It should be used while fresh and stirred during its application. Where only a few trees are to be protected some form of wire screen of not over one-inch mesh wrapped around the tion.'

PRUNE TREES DURING WINTER

Surplus Time May Be Utilized in Cutting Out Dead Wood and Removing Crowded Branches.

Any surplus time may be profitably utilized in pruning the trees about the place. The dead wood and crowded branches of course must be removed. Smooth, clean wounds should be made and then smeared over with lead paint. Spongy tissue from old cavities should then be washed with creosote and filled with cement. This latter operation had best be undertaken on one of the warm days at this time of the year .--Neb. College of Agriculture.

HOW TO CONTROL APPLE RUST

Most Effective Plan Is to Get Rid of Red Cedars in Neighborhood-Disease Is Peculiar.

The most effective way of controlling apple rust is to get rid of the red cedars in the neighborhood. This host plant is necessary for the propagation of the rust, as the disease has a peculiarity of living during one stage on the cedar as host plant and during the second stage either on the cedar or the apple as host plant. The first stage will not develop on the apple tree, and if one eliminates the cedars he gets rid of apple rust.

Benefit of Cover Crops.

Cover crops hold the orchard soll from washing, prevent hurning out unius, furnish profitable pasture for ors, colves, pouliry and small stock; and furnish up excellent mulch and soll covar for the trees;
