A Terrible Ordeal ! Gravel and Kidney Stone Caused Intense Suffering -Doan's Brought a Quick Cure.

Edw. J. Turecek, 4332 Eichelburger ye., St. Louis, Mo., says: "I was aves, St. Louis, Mo., says: I was taken with a terrible pain across the back and every move I made, it felt like a knife being driven into my back and twisted around. It lasted about half an hour, but soon came back and with it another affliction. The kidney

with it another affliction. secretions began to pain me; the flow was scanty and burned like fire when passing. I had severe beadaches and my bladder got badly inflamed, too, and I noticed little par-ticles of meaned in the 36 ticles of gravel in the se-cretions. Doan's Kidney Fills had been recom-mended to me and I be-

mended to me and I be-gan their use. The first Mr. Turecek half hox brought religf and I passed a stone the size of a pea. It was a terrible ordeal and afterwards a sandy ternole ordeal and afterwards a sandy sediment and particles of gravel settled in the urine. I got more of the pills and they cured me. The inflammation left and there was no more pain or gravel. I now sleep well, eat well and my kidneys act normally. Down's Kidney Pills alone accomplished this wonderful cure."

"Subscribed and sworn to before me." JAMES M. SMITH, Notary Public. Get Doan's at Any Store, 60c a Box DOAN'S RIDNEY PILLS FOSTER-MILBURN CO., BUFFALO, N. Y.

#### Westward Bound.

One night the soldiers were telling what they did the first time they heard the big guns at the front. One fellow spoke up and said : "The first time I heard a big gun I ran so far in five minutes that it took me three hours "to get back."

## BOSCHEE'S SYRUP

Why use ordinary cough remedies when Boschee's Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles? It gives the patient a good night's rest. free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts. throw off the disease, helping the patleat to regain his health. Made in America and sold for more than half a century .- Adv.

Naturally.

"What was the result of trying your play on the dog?" "It raised a howl."

## **RECIPE FOR GRAY HAIR.**

To half p'nt of water add 1 oz. Bay Rum. a small box of Barbo Compound, and 1/4 ez. of glycerine. Any druggist can put this up or you can mix it at home at very lit-tle cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.-Adv.

Ready to Assist Owners of Herds in Controlling Infectious Diseases Among Animals.

# ASSISTANCE RENDERED FREE

### Members of Several Cow-Testing and Bull Associations Have Accepted Offer and Report Good Results -Herd Lists Issued.

(Prepared by the United States Department of Auriculture.)

Any herd of cattle built on a foundation of diseased stock cannot survive profitably for any length of time. The wise breeder who is establishing a herd, therefore, will see that his original stock comes from herds known to be free from disease and that the animals have not been otherwise exposed. More than that, the established breeder, to safeguard the health of his herd and meet the increasing demand for healthy stock, should use every means at hand to maintain a herd known to be healthy.

### Government Asks Co-operation.

The dairy division, United States department of agriculture, co-operating with the tuberculosis eradication division, is ready to assist members of cow-testing and bull associations in controlling infectious diseases among

### Dairy Herd on Southern Farm.

their animals. This assistance is rendered free in associations whose members request it and who will co-operate with the bureau of animal industry in maintaining healthy herds.

In several cow-testing and bull asso dations the members have already accepted federal assistance and report good results. Practically all members bmit their herds to the tests and in this way start tuberculosis-free communities, which are expected eventually to grow to counties, then to states, and finally the entire United States may be freed from bovine tuberculosis.

WAYS TO ERADICATE SLUGS IN GARDENS Insects Are Menace to Gardeners and Mushroom Growers. Poisoned Bait, Clean Culture and Use of Lime and Powders Recommended to Destroy Destructive

Member of Snail Family. Propared by the United States Depart-

ment of Agriculture.)

Bait poisoned with arsenic, clean culture in garden and greenhouse, and the use of time and powders, such as finely powdered salt and road dust are recommended as means of destroy ing the spotted garden slug and other injurious garden slugs.

The sported garden slug, which frequently becomes a menace to gardeners and mushroom growers, is somewhat wormlike in appearance, ranges in length from one-half inch to nearly seven inches, and varies in color from yellowish gray, or brown, mottled with black, to nearly black. It thrives in damp, dark locations, such as under old decaying boards and logs; in cellars and creameries, along hedges and beneath damp refuse. It is particuharly fond of lettuces tomatoes, peas, benns and other vegetables when grown either under glass or in the open, and frequently causes damage in mushroom beds, to celery during the bleaching process, and to vegetables, especially potatoes in storage. It remains under cover until nightfall, when it comes out to feed, and returns to the same place before morning, leaving a trail of sticky mucus.

The common toad is among the slug's few natural enemies. Owing to its habits of feeding by night and concealing itself during the day, the slug is very difficult to control. Spraying with arsenicals is impractical, because slugs avoid most poisonous substances. Boiled or baked potatoes sprinkled with white grsenic have been found effective as a poisoned balt. In mushcom houses the most effective remedy s to surround the beds with a border about two inches wide, using lime, salt, or road dust, which prevents the slugs from passing. Cleaning up the iding places of the slug and sprinkling lime, which is the standard remedy for slugs, about infested areas, 18 the best treatment in gardens and greenhouses.

# INSURE SAFE WATER SUPPLY

Woodlot or Orchard Conserve Soil Moisture and Rainfall-Should Be Kept Clean.

Prepared by the United States Department of Agriculture.)

On any farm a woodlot, grove, or windbreak is highly desirable, not only to supply fuel and small timber, but for its beauty and the protection it affords. If kept clean and free from stock, such wooded area, an orchard even, may be made to serve another useful purpose, that of supplying water, says Farmers' Bulletin 941, "Water Systems for Farm Homes," Forest-covered lands conserve rainfall and soil moisture, and in many instances afford ideal sources for farm water supplies. The farmer, therefore, who fences off his woodlot, or part of it, or forests an inclosed area and keeps it clean for water supply purposes, is following closely the wise policy of cities and towns which, to insure safe, ample water supplies, acquire elevated, sparsely settled watersheds, and clean, forest, and patrol them.

tend all such essential public works. with a view to furnishing employment for laborers who may be seeking new tasks during the period of readjustment. Knowing that the department of agriculture and the state highway authorities in each state have been carefully working out road systems and developing plans and specifications. I have no doubt that all activities in this field can be vigorously conducted through these two sets of existing agencies, acting in full accord. "Faithfully yours,

"WOODROW WILSON."

The following letter has been received from Secretary of War Baker: "My Dear Mr. Secretary :

"I am in full agreement with your view that there should not only be a prompt resumption of road construction under the federal aid road act, and under such further authority as may exist for separate state action, but also that additional funds should be made available to your department for

# Weekly Health Talks Where Most Sickness Begins and Ends

BY FRANKLIN DUANE, M. D.

It can be said broadly that most human ills begin in the stomach and end in the stomach. Good digestion means good health, and poor digestion means bad health. The minute your stomach fails to properly dispose of the food you eat, trouas begin to crop out in various forms. Indigestion and dyspepsia are the commonset forms, but thin, impure blood, headaches, backaches, pimples, blotches, dizziness, belching, coated tongue, weakness, poor appetite, aleeplessness, coughs, colds and bronchitis are almost as common. There is but one way to have good health, and that is to put and keep your stomach in good order This is easy to do if you take Dr. Pierce's Golden Medical Discov ery. It is a wonderful tonic and blood purifier, and is so safe to take, for it is made of roots and herbs. Dr. Pierce, of Buffalo, N. Y., stands behind this standard medicine, and it is good to know that so distinguished a physician is proud to have his name identified with it. When you take Golden Medical Discovery, you are getting the benefit of the experience o doctor whose reputation goes all around the earth. Still more, you get a temperance medicine that contains not a drop of alcohol or narcotic of any kind. Long ago Dr. Pierce combined certain valuable vege table ingredients-without the use of alco hol-so that these remedies always have been strictly temperance medicines.

If piles are torturing you, get and use Pierce's Anodyne Pile Ointment. The relief relief it gives is hard to believe until you try it. If constipated Dr. Pierce's Pleasant Pellets should be taken while using Anodyne Pile Ointment. Few indoed are the cases which these splendid remedies will not relieve and usually oversome. They are so good that nearly every drug store has them for sale. Accredited Herd Lists Stimulate Sales.

Accredited herd lists will be issued at suitable intervals. These lists contain the names and addresses of the owners, and a statement of the breed of cattle maintained by those owners whose herds are found to be free from tuberculosis.

Already approximately 50,000 copies of the first list have been distributed among breeders, state officials, extension men, breed associations, and others. Breeders whose names appear on this list state that as a result they have received numerous inquiries from prospective purchasers, some buyers even desiring to purchase the entire herd.

Certain communities have become unfavorably conspicuous for the large number of tuberculous cattle found in them, and purchasers of cattle both for breeding and slaughtering purposes are shunning those sections. On the other hand, when sections become noted for their healthy cattle, buyers obviously will seek animals from the breeders in such tuberculosis-free localities.

## PROPER SOIL FOR SOY BEANS

**Grop Does Not Require Much Drainage** for Best Development-Too Much Water Harmful.

(Prepared by the United States Department of Agriculture.)

The soy bean does not require a welldrained soil for its best development, although it will not succeed where water stands for any considerable length of time. Swamp and peat soils, after being drained and limed, have usually been found to produce this crop very well. Soy beans will thrive on soils that are too acid for the successful culture of red clover.

## BEST AS A DORMANT SPRAY

### Lime-Sulphur is Effective When Applied of Proper Strength-Kills Egg Clusters.

Lime-sulphur answers practically all purposes as a dormant spray, being effective, when applied of proper strength, for San Jose and other scale insects. It also kills many egg clusters of insects and serves as a fungifruit.
