## Grow Wheat in Western Canada

### One Crop Often Pays for the Land

Western Canada offers the greatest advantages to home seekers. Large profits are assured. You can buy on easy payment terms.

**Fertile Land at \$15 to \$30 per Acre**—land similar to that which through many years has averaged from 20 to 45 bushels of wheat to the acre. Hundreds of cases are on record where in Western Canada a single crop has paid the cost of land and production. The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta want the farmer to prosper, and extend every possible encouragement and help to Grain Growing and Stock Raising.

Though Western Canada offers land at such low figures, the high prices of grain, cattle, sheep and hogs will remain.

Loans for the purchase of stock may be had at low interest; there are good shipping facilities; best of markets; free schools; churches; splendid climate; low taxation (none on improvements).

For particulars as to location of lands for sale, mail, illustrated literature, reduced railway rates, etc., apply to Dept. of Immigration, Ottawa, Can., or

Canadian Government Agent

In Good Order of Course.

"A good soldier always obeys orders, you know," observed the chronic quoter.

"That being the case, I'm a pretty good soldier," responded the henpecked husband, whose wife wouldn't let him smoke in the house.

"Every morning I have to obey my wife's orders to advance; the order not to smoke in the house has been taken for granted for years. About all I can do without her orders is to retire."

To keep clean and healthy take Doctor's Pleasant Pellets. They regulate liver, bowels and stomach. Adv.

In Turkey husbands are deserting their wives and girls are being sold for a few shillings.

None but a fool is always right—Hare.

## SAFE, GENTLE REMEDY

### CLEANSSES YOUR KIDNEYS

For centuries GOLD MEDAL Haarlem Oil has been a standard household remedy for kidney, liver, bladder and stomach trouble, and all diseases connected with the urinary organs. The kidneys and bladder are the most important organs of the body. They are the filters, the purifiers of your blood. If the poisons which enter your system through the blood and stomach are not entirely thrown out by the kidneys and bladder, you are doomed.

Weakness, sleeplessness, nervousness, despondency, backache, stomach trouble, headache, pain in loins and lower abdomen, gall stones, gravel, difficulty when urinating, cloudy and bloody urine, rheumatism, sciatica and lumbago, all warn you to look after your kidneys and bladder. All these indicate some weakness of the kidneys or other organs or that the enemy microbes which are always present in your system have attacked your weak spots. GOLD MEDAL Haarlem Oil Capsules are what you need.

They are not a "patent medicine," nor a "new discovery." For 200 years they

Dicky's Wish.

It was Dick's first day at school. During the afternoon, he began crying and the teacher asked him what the trouble was. Like so many, he was homesick.

"Well, Dick," the teacher said kindly, "you may go home."

"No," he sobbed, "I don't want to go home, but I wish I was there."

**RECIPE FOR GRAY HAIR.**

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/4 oz. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

Only one child in every ten in China goes to school.

## EGGS PRESERVED FOR WINTER USE

Work Should Be Performed in Spring When There Is Surplus on Most Farms.

### WATERGLASS SOLUTION BEST

Earthen Crocks or Jars Are Preferred as Containers, as Glazed Surface Prevents Chemical Action—Other Methods.

(Prepared by the United States Department of Agriculture.)

Spring is the season when there is a surplus of eggs on most farms. For this reason it is desirable that a supply be preserved at home to be used next fall and winter when eggs are hard to get and are high in price. There are several methods of preserving eggs which have proven very successful and which, because they are cheap, simple, and effective, should be put into practice more extensively.

Eggs to be preserved must be fresh, and should be placed in the preserving container as soon as possible after they are laid. One of the best methods of preserving is by the use of waterglass, a pale yellow odorless, syrupy liquid that can be bought by the quart or gallon from the druggist or poultry supply man. It should be diluted in the proportion of 1 part of waterglass to 9 parts of water which has been boiled and allowed to cool. Earthenware crocks or jars are the best containers, since their glazed surface pre-

Preserving Eggs in Waterglass.

vents chemical action from the solution. The crocks or jars should be sealed and allowed to cool before they are used. A container holding 5 gallons will accommodate 15 dozen eggs and will require one quart of waterglass.

**To Use Waterglass Solution.**

Half fill the container with the waterglass solution and place the eggs in it. Eggs can be added from day to day as they are obtained, making sure that the eggs are covered by about 2 inches of waterglass solution. Cover the container and place it in a cool place where it will not have to be moved. Look at it from time to time, and if there seems to be danger of too much evaporation, add sufficient cool boiled water to keep the eggs covered. Eggs removed from the solution should be rinsed in clean, cold water. Before they are boiled, holes should be pricked in the large ends with a needle to prevent them from cracking.

**Lime-water Also Preservative.**

Lime-water also is satisfactory for preserving eggs and is slightly less expensive than waterglass. A solution is made by placing 2 or 3 pounds of unslaked lime in 5 gallons of water which has been boiled and allowed to cool, and allowing the mixture to stand until the lime settles and the liquid is clear. The eggs should be placed in a clean earthenware jar or other suitable vessel and covered to a depth of 2 inches with the liquid. Remove the eggs as desired, rinse in clean, cold water, and use immediately.

### HOW BULL ASSOCIATIONS AID

Purchase Price and Maintenance Distributed According to Number of Cows Owned by Members.

(Prepared by the United States Department of Agriculture.)

Co-operative bull associations are formed by farmers for the joint ownership, use, and exchange of purebred bulls. The purchase price and cost of maintenance are distributed according to the number of cows owned by each, thereby giving the farmer an opportunity to build up his herd at a minimum expense. The organization also helps its members to market dairy stock and dairy products, to fight contagious diseases of cattle intelligently, and in other ways assists in improving the dairy industry.

The bull association does not give something for nothing, but with an outlay of \$50 can furnish a share in five purebred bulls. These bulls cannot increase the production of the cows in a herd, but they may double the production of their daughters. The daughters of association bulls and grade cows can never be registered, but in all other respects they may be the equal of purebreds.

## WHAT CLUB WORK IS TO BOYS AND GIRLS

Sets Standard of Achievement in Home Activities.

Among Other Advantages It Engages Best Thought and Energy of Every Youth in the Business of Farming.

(Prepared by the United States Department of Agriculture.)

Club work makes farm and home work, sometimes thought of as drudgery, an interesting game. Club work sets standards of achievement for boys and girls in home activities and dignifies common labor.

It is training for community leadership and farm and home co-operative work of every type and kind. It socializes community life through the boys and girls, and gives young people a real motive in all their work.

It also teaches farm boys and girls that it is infinitely better to be a proprietor of farm land, farm animals, machinery, crops, kitchen equipment, etc., than to be a mere wage earner.

It produces and conserves food to meet local, national, and world needs on an economic basis.

It demonstrates how to make farming and home making profitable and tolerable.

It engages the best thought, energy, and interest of every boy and girl in the business of farming and home-making. Club work is a practical back-to-the-home, "made-in-America" type of education that has for its chief aim the practical basis for extension, not provided for in the public school curriculum nor in the Smith-Hughes vocational work.

Boys' and girls' club work has a permanent, year-around program of work, both for the group and the individual member, supported by permanent funds, permanent program, permanent leadership in every state in the Union, and reaches boys and girls, both in and out of school, of all ages from 9 to 21 years. In most states they are grouped in two classes—members of the boys' and girls' clubs from 9 to 15 and junior farmers and home makers from 15 to 21.

### CONSIDER QUALITY OF SEED

High-Priced Article May Be Cheaper Than Low-Priced One—Be Ready to Act Early.

(Prepared by the United States Department of Agriculture.)

The value of seed depends not only on the price but on how price and quality compare. A high-priced lot may be cheaper than a low-priced one. For example, if one lot costs \$45 a hundred pounds and contains 99 per cent pure seed, of which 95 per cent will grow, there will be 94 pounds of pure, viable seed in every 100. This 94 pounds, therefore, will cost 47.8 cents a pound. Another lot selling for \$35 a hundred may contain 90 per cent pure seed, of which 80 per cent will grow. This lot, then, has 72 pounds of pure, viable seed in a hundred pounds and this 72 pounds will cost the buyer 48.6 cents a pound. On the other hand, a lot costing \$40 and containing 95 per cent pure seed, of which 90 per cent will grow, will contain 85.5 pounds good seed per hundred and will cost the consumer 46.7 cents for every pound of good seed. Have the seed tested and be ready to act early and intelligently.

### TESTING SEED CORN IN SOIL

Kernels Are Taken From Each Ear and Planted in Separate Compartments.

For the purpose of testing seed corn in soil—a method said to be more accurate than testing it in water—a

Rack for Testing Seed Corn.

3-foot open rack has been devised containing supports for three tiers of 12 ears each, says Popular Mechanics. There is also incorporated in the rack a box divided into 36 compartments. The selected ears of corn are placed in the open frame and at the same time six kernels are taken from each and planted in the soil-filled compartment corresponding in position to that of the ear in the rack.

### GARDEN IS MOST IMPORTANT

Essential as Food Supply and as Means of Reducing Living Expenses This Year.

The garden will be even more important as a food source and as a means of reducing living expenses this year than last year. The experience of last year will be a valuable asset toward a better garden for the coming season. A small garden will produce more food than an acre of ordinary farm crops. Last year the United States became a nation of gardeners. That reputation must be maintained. Every farm must have its home vegetable garden, and every foot of vacant land in the cities and towns should be planted to food crops.

### "Bayer Tablets of Aspirin"

**SUCCESSOR TO QUININE**

For Colds, Grippe, Influenzal Colds

No Discomfort! No Head-buzzing! No Distress!

Millions of people take "Bayer Tablets of Aspirin" as the best means to prevent as well as to overcome Colds, Grippe and Influenzal Colds—being far more efficient than quinine. Besides relief comes without discomfort or distress.

"The Master of Colds"—Dependable!

Adults—Take one or two "Bayer Tablets of Aspirin" with water. If necessary, repeat dose three times a day, after meals.

### "Bayer Tablets of Aspirin"

Buy only the original "Bayer packages." Look for the safety "Bayer Cross" always. 20 cent package—also larger packages.

Owned by Americans Entirely.

Aspirin is the trade mark of Bayer Manufacture of Monocetideester of Salicylic Acid.

## Acid-Stomach Ruins Health of Millions

Besides those painful attacks of indigestion; that awful bloated, lumpy feeling after eating and downright stomach misery that you who have experienced it know so well; besides disgusting belching, food-repeating, sour stomach and distressing heartburn—besides all this, ACID-STOMACH undermines the health and saps the strength of millions.

If you don't get rid of those stomach miseries there is no telling where your stomach troubles will end, for it is a well known scientific fact that many serious ailments have their start in an acid-stomach.

Start now—this very day—to get rid of your stomach miseries. Take EATONIC—the wonderful remedy that absorbs the excess acid from the stomach and brings INSTANT relief. You simply have no idea how much better, stronger and brighter you feel as once. It drives out all the gas and bloating, puts an immediate stop to belching and heartburn,

ends stomach suffering and makes it cool, sweet, comfortable and strong. There can be no further excuse for you to allow acid-stomach to wreck your health—pile up misery upon misery until you get to the point where you feel down and out and that life has lost all its joys. Remember, just as acid-mouth ruins teeth, so acid-stomach ruins health.

Take EATONIC. It's good, just like a bit of candy and makes the stomach feel fine. You can then eat the things you like and, what is more, every mouthful you eat will count in creating power and energy. You'll feel so much better—have punch and pep—the power and will to do things and get results, and your stomach misery will be gone. Take our advice. Get a big box of EATONIC from your druggist today. It costs so little. If it fails to remove your stomach distress, he will refund your money. That is guaranteed; you are to be satisfied or money refunded.
