

Signs of Eye Strain.

Eye strain is muscular strain. A network of tiny muscles enables the eye to contract or expand, let in much or little light, and to focus that light. A defect in the shape of the eye may cause these muscles to work extra hard and under constant strain, this will cause tired, weary, aching, tearing eyes, headache, nervousness and exhaustion.

Properly ground glasses, such as you secure at Clinton's, end strain and the troubles it causes.

Chronic Constipation.

(Health Talk No. 1 by Dr. States, Chiropractor.)

Where constipation is chronic and the sufferer must resort to artificial methods daily, the cause, invariably, lies in nerve interference.

The nerves that impart vigor to the lower bowels leave the backbone between certain joints in the small of the back. When by jar, accident or strain these joints become out of alignment, it pinches the nerves and a sluggish condition or partial paralysis of the lower bowels results.

Hundreds of sufferers from chronic constipation and all the ills it brings, have found spinal adjustments removed the cause.

FREE—Call for a free consultation and learn what this new science can do for you.

Never Feels A Pain Now

For ten years I suffered from chronic constipation and one winter had muscular and inflammatory rheumatism, being utterly unable to walk or help myself. I tried patent medicines, prescriptions and artesian baths with only temporary relief, then commenced taking Chiropractic adjustments. In fourteen adjustments my rheumatism left me and my constipation was ended. There has been no return of either.
