THREE DISTINCT TWISTERS NEAR HERSHEY SUNDAY

County Commissioner J. S. Koch who was in town yesterday attending a meeting of the board, says three distinct wind twisters were visible Sunday, two of which crossed his ranch southwest of Hershey but fortunately the track of each was very narrow. One came from the south and it struck Mr. Koch's water plant a short distance south of his house. The mill, which is an unusually large one, was snapped from the shaft and the tower splintered. Another twister which came from the north struck a half mile east of Mr. Koch's home, where he had erected buildings for his son's use. Here a 10x16 chicken house was caught and blown to pieces, and the windows on one side of the dwelling house blown in. The third twister traveled south of the Koch ranch, and veered on its foundation the garage on the Henry Frels ranch and blew down and scattered around one or two small buildings.

Mr. Koch said all three of the twisters were plainly visible and were watched by him and members of his family. It is fortunate that the track of each was very narrow, probably not exceeding a quarter of a mile.

Big Tax Collections

During the month of May collections at the county treasurer's office were \$94,000, of which \$84,000 came from the payment of state and county taxes, including school tax. The tax payments in April were almost as heavy. Treasurer Souder says that the payment of taxes in May were about the heaviest in the history of the office, and the payment of 1918 taxes are being made more promptly than ever before. He takes this as evidence that there is an unusual amount of ready money in the county, for as a rule if people are short of money they delay paying their taxes as long as possible.

SCHEDULE OF AIRPLANE THROUGH THE STATE

The United States Martin bomber, the airplane selected to make the ocean to ocean flight, was originally designed for military purposes as a day or night bombing plane or long distance photography. The power is supplied by two 400-horse power Liberty motors, mounted in the wing gap on each side of the body. The total wing and control area is 1,355 square feet. The span of the upper and lower wings is 71 feet 5 inches and the depth of each wing is 7 feet 10 inches. The length over all is forty-six feet and height over all is 14 feet 7 inches.

The present plan is for a single stop at North Platte, where the night will be spent.

The tentative schedule is for the flight to begin at Mineola, N. Y., at 3:30 in the morning; arrive at Chicago at 11:42 a. m.; then on west, arriving at Council Bluffs at 5:08 p. m. Passing over Omaha at 5:11 p. m., the plane will make a straight shoot for North Platte, keeping south of the Union Pacific railroad until reaching Central City where it will cross the railroad and then keeping north of the road through the south part of Merrick, Howard, Sherman and Custer counties, reaching North Platte at 8:09 p. m., making the flight from Omaha to this city in two hours and fifty-eight minutes. The plane will resume its flight the next morning at 3:30, reaching Ogallala at 4:05, Chappell 4:39, Sidney 4:57, Potter at 5:10 and Kimball at 5:24. From North Platte to the west line of the state the line of the Union Pacific will be closely followed.

Lieut. Conklin, of the Omaha balloon school, who will have charge of the landing field, returned to the city yesterday and will remain until after the flight.

Glenn R. Lindsay was arraigned in the county court yesterday on the charge of violating the chastity of Laura Johnson, aged fifteen, and the hearing was set for this afternoon. The outrage is said to have occurred at three o'clock Sunday morning at the city park, and the complaint was filed by the father of the girl.

BUSINESS HOUSES DECIDE NOT TO CHANGE TIME

A canvass of the business houses was made last evening and it was unanimously decided not to depart from the daylight saving or Wilson standard of time until the existing law is repealed by congress, which is likely to occur in the very near future.

The new time was tried out to a certain extent yesterday and resulted in the utmost confusion for the reason that practically four standards of time were used—two by the railroad and two by the city. In families where one member was employed by the Union Pacific and another in store, office or at a trade, two distinct meal hours had to be observed, and as a result the good housewife did not do anything but cook meals. One business house did not know what the other intended to do in regard to time, and this led to the canvass last evening when there was a unanimous expression that so long as the daylight saving standard was a legislative enactment by congress that it should be obeyed until repealed.

Therefore beginning today and continuing until the law is repealed, North Platte business houses will continue to be operated under the time which became effective the latter part of March.

Last night all switching crews in the yards went on west time thus reverting to the standard used prior to March.

Mrs. Mabelle McDonald has been quite ill the past three weeks, but is better now and her friends will find her back at work in her Beauty Shop in the McDonald building.

Painting A Good Investment
Good paint is a three-fold investment—it preserves, beautifies and increases the value of your property. Do not neglect painting, whether house, barn, silo or out-buildings, because they represent a big investment to you and should be protected from decay. A coat or two of good paint is the most effective and at the same time the least expensive way to preserve and lengthen their natural life. A few dollars invested in Paints or Varnishes will return you a rich reward in better property values and a more attractive home.
