## Farmers Say Lalley Saves

13 to 66 Hours  
Per Week

Doubt of the positive saving of Lalley Light has disappeared. Proof is piling up on all sides. We no longer need to ask you to accept our statements.

We never doubted for a minute that Lalley-Light-and-Power was one of the greatest blessings that had ever come to the farmers of the world.

Now we can quote the farmers themselves-- thousands of them.

Lalley Light is a complete unit--engine and generator--with 15 coil storage battery. It supplies ample electricity for lights, water pump, washing machines, sweeper, cream separator, fanning mill, iron, etc.

The grand average saving in all the records compiled thus far is better than 13 hours per week

Many of these farmers admit they installed the Lalley because their wives, sons and daughters gave them no rest till they did.

They weren't thinking so much of the saving. They simply couldn't get away from the conclusion that their wives and families were entitled to the comfort, the education, the conveniences of Lalley-Light-and-power.

Now they are finding that Lalley is even more than a wonderful comfort and convenience.

It is making money by saving time for them. Think of one man admitting cheerfully that he has gained 66 1/2 hours' labor in one week!

The wise thing for you to do is to see Lalley Light.

Its value to you, your family and your farm is so great that it would pay you to make a special trip to us as soon as you can.

Or we will come to you if you telephone.

Ask your Lalley dealer to show you the Lalley Saves Book telling experiences of Lalley owners
