Dresses for Everyone.

The Style Shop's clothes for ladies represent real economy of high quality as distinguished from the false economy of low price. Some people think The Style Shop clothes are high priced. If you hold that opinion we know of nothing that will dispel it so quickly as a visit to The Style Shop. Style Shop values are high. Style Shop prices are not. Ask to see our new line of dresses and skirts and let us demonstrate this store's leadership and the advisability of getting the habit of trading here where the finest merchandise is lower priced. The smart dressed woman comes here to trade because she knows she can find a dress that will suit her particular type. We do not try to fit the large, the small, the short and tall in the same model. We have plenty of garments to show you but not dozens of the same model. We selected our dresses as they were shown on living models and used our very best judgment to select garments for each and every different type and figure. Our salesladies are at your disposal and we will be pleased to show you through our line. :o:~

Ship Ice 800 Miles.

The supply of ice at the Union Pacific ice houses was exhausted last week and from twelve to fourteen cars are being shipped in daily. This imported ice comes from as far south as St. Louis and as far north as Eau Claire, Wis. The fact that the 50,000 tons stored in the coal houses has been exhausted is evidence of the heavy run of refrigerator cars this summer. :o:~
