

Come in and
examine diamonds

We are always glad to have any one come in to look at diamonds. We know that the diamond is not an ordinary purchase, and that expert help is wanted in making the selection.

When we show diamonds we point out to you the different features which caused it to be graded as it is. It is the kind of service and attention you like.

We carry a large stock of small, medium and large weights, which, as you appreciate, is a big help in getting exactly the stone you want.

As an indication of the travel on the Union Pacific out of North Platte it can be cited that last month the ticket sales were \$18,000 greater than in September 1918. The ticket sales last month averaged over \$1,500 a day.

ROUND-UP PROMOTERS LEFT IN A FINANCIAL HOLD

The Round-up at the fair grounds closed Saturday with a fair attendance but the gate receipts of the day were not sufficient to make up for the financial loss sustained on the two preceding days when the weather was so bad that the attendance was scarcely 300 each day. The promoters of the Round-up succeeded in getting together a good-sized bunch of excellent riders, the horses and stunts were all that could be desired so far as real wildness was concerned, and the stunts satisfied all who attended; in fact nothing but good words were spoken of the entertainment furnished. It is to be regretted that the weather Thursday and Friday was so inclement as to keep the crowd away, as the amusement furnished each day was worthy crowded grandstand and bleachers.

Census Enumerators.

Enumerators to take the census of 1920 will be appointed for the various sub-divisions of the Sixth Congressional district within the next thirty days. The enumeration will be made in January and the appointments are open to men and women alike between the ages of 18 to 70.

To those interested, a letter addressed to J. J. Tockey, supervisor, Broken Bow, will bring blanks for making formal application together with other facts relating to the duties of enumerators.

Opposition Intensified

The opposition to the action of the school board in granting high school students the right to hold a dance in the Franklins auditorium was further intensified when several of the ministers severely criticised the board's action from the pulpit Sunday evening. In addition to this a protest is being circulated for signatures which requests the board to rescind their action.

In the face of all this opposition it is probable that the board will, to save further criticism, gig back on the proposition.

PEARS. PEARS.

Just received a car of pears which we will sell from the Locust street crossing at \$2.55 a bushel. These pears are in bulk so bring your sacks. MEMICHAEL GROCERY.

We are placing them on sale this morning at a saving to the purchaser of 20 to 40 per cent less than today's value. Come in and select your winter coat or suit now. The Leader Mercantile Co.

Keep in mind for the wedding gift that Dixon's silver stock cannot be surpassed.

How Bridges Breathe.

Like us mortals, big steel bridges feel the changes in the weather, and must be built to withstand them, or perish.

In the heat of summer a bridge is appreciably longer than it is in winter, and at various times of the year it may be longer on one side than on the other, as when a hot sun plays on one flank, and a cold wind on the other.

The "breathing apparatus" of a bridge consists of rollers under the feet at one end so that the end can move to and fro freely according to the expansion and contraction of the huge girders.

Provision is made in the case of the Forth bridge for as much as two feet of "breathing" of the immense cantilevers.

High Temperature May Mislead. High temperature does not always mean fever, for the body heat may be increased by exercise or eating, and a rise of as much as 1.3 degrees Fahrenheit has been traced to mental work.

Dr. F. B. Wynn of Indianapolis reports that drafted men before examination showed an average rise of 0.3 degrees from the anxiety and suspense, with a corresponding depression below normal after examination. In 40 nurses the fall after examination averaged 0.6 degrees. The psychic rise plus the daily elevation may lead to false conclusions if the physician is not careful.

His Mistake.

Flatbush—You know my wife and her sister look very much alike. Bensonhurst—Oh, is that so?

"Yes. Why, the other day I got a seat in a crowded trolley car, and when I got off my sister-in-law was also getting off the same car and she gave me Hall Columbia for not getting up and offering her my seat."

"Well, why didn't you offer her your seat? Didn't you know her?"

"No, I didn't. I really thought it was my wife!"—Yonkers Statesman.

Even the Seal

It is one of the disillusionments experienced by most sojourners on this planet that the wonderful places of childhood's enjoyment are found to have shrunk amazingly on being revisited in after years. Even the small people find that imagination plays pranks with them, and are driven to some such remark as that of the little girl who, on being taken back to the seaside after two years or so, exclaimed: "It's not the same, mummy darling, it's gone out of shape."

Farm Lands Grow in Value.

The value of farm lands is increasing steadily in the United States, the average for average grade plow lands being about \$74.31 per acre on March 1, as compared with \$68.38 a year ago, \$62.17 two years ago, and \$58.39 three years ago.

Why Friday's audience at Methodist Church was so completely mystified. Odette Le Fontenay was inside the phonograph in all excepting physical presence

At first reading, the story of the New Edison's performance last Friday night at the Methodist Church seems fraught with mystery.

But the explanation is simple enough.

First, get a picture of what happened. Mme. Le Fontenay sang The Swallows. She stopped after the first few lines, but her voice flowed on without a break. No one even noticed she had stopped—until some eyes keener than the rest, saw her lips were still. It was only then that realization dawned. The audience found it had been listening to the New Edison.

To every ear, the two voices, living and RE-CREATED, had been without a shade of difference.

That was what so mystified the audience. They had expected the RE-CREATED art to betray its phonographic origin. It was a step too advanced for their comprehension that this instrument should be all that Mme. Le Fontenay is, excepting her physical presence.

The NEW EDISON

"The Phonograph With a Soul"

This extraordinary proof is the only means through which people learn to appreciate the true powers of the New Edison. If you are interested in music, it is indeed unfortunate that you were not present.

Yet, you know this is a test which no other phonograph dares to attempt. It is proof that no one can evade or deny. The New Edison® is the only phonograph which RE-CREATES music and the soul of music.

Come in and hear it for yourself.

*The instrument used in Friday's Tone-Test is regular model which sells for \$285 (in Canada \$431). It is an exact duplicate of the Laboratory Model which Mr. Edison perfected after spending Three Million Dollars in experiments.
