**Play Tie Game.**  
 After battling through four periods of fifteen minutes each, the foot ball game played on the local grounds Friday afternoon between the North Platte and Kearney high school teams resulted in a scoreless tie. Once Kearney worked near the goal, and just before the close of the fourth period North Platte got the ball on the seven yard line and made a drop kick that failed. The game was rather savagely fought, the Kearney players, it is said, using the knee kick on several of the North Platte players, and two or three were temporarily knocked out. Each team used every known play in the effort to win but the best efforts did not avail. It was a fine exhibition of foot ball by evenly matched teams.

**MAYNARD IS WINNER OF THE TRANS-CONTINENTAL RACE.**

Lieut. B. W. Maynard won the trans-continental air race when he landed at Mineola field on his return trip at ten minutes before two o'clock Saturday afternoon. On the round trip he traveled 5,200 miles and his actual flying time was about fifty hours.

Death winged his tragic flight with the army's great trans-continental air derby. Ten lives had been the toll to the time Lieut. B. W. Maynard crossed the finishing line. Seven had died actually in the contest and three in connection with it.

From New York to San Francisco the route of the flight was dotted with disabled planes which were forced to quit the race or crashed to destruction from the air. Many fliers were injured.

Sixty-two contestants started the big race—the most adventuresome peaceful air competition the world has known. Forty-seven took the air from Mineola and fifteen from San Francisco on Wednesday, October 8th, for the 5,200-mile round trip, high-speed aerial journey.

The great race was marked by many incidents of interest. With virtually simultaneous starts from Mineola and San Francisco, west bound and east bound fliers strove to win the honor of crossing the continent first. News of Lieutenant Maynard's arrival Saturday, October 11th, at the Pacific terminal was followed in two hours by word that Major Carl Spatz and Lieut. E. C. Kiel had reached the Atlantic terminal within half a minute of each other. Captain Lowell H. Smith followed them with claim to first place in actual flying time.

Maynard's actual flying time from Mineola to San Francisco consumed little over twenty-five hours and the flying time of Spatz and Kiel came within the 27-hour limit they said. Army air service computed Smith's actual flying time, however, at thirty minutes better than Maynard's.

Here at North Platte, Lieutenant Maynard and Captain Smith landed within a few minutes of each other, the first fliers to greet each other from the east and west. Both had been flying at a rate close to two miles a minute. Maynard led his field by a generous margin, but Smith was hotly pursued by Spatz and Kiel who arrived at the North Platte control station only a few minutes behind him.

On the return journey the "flying parson"—Maynard—got away from San Francisco a day or better in advance of Kiel, Smith and Spatz at Mineola. He winged it fast and furiously, allowing himself no more than the required thirty minute stops at control stations. The snapping of a crank shaft within twenty miles of Omaha Thursday forenoon held him back. He worked on repairs all that day and night and Friday climbed into the air again and headed "home."

In the first thirteen hours of his flying time Maynard reeled off 1,696 miles, estimated. Smith, driving eastward, raced 1,460 miles in the same number of hours, also estimated.

Lieut. Maynard flew the 142 miles of the last lap in his great flight at a speed of nearly two miles a minute. The first persons to greet him as he stepped from his machine on the Mineola field were his wife and two little daughters.

**Warning.**  
 All the automobile trade magazines and all the manufacturers warn us that the present shortage of good cars will continue from a year to two years. Both the Dodge and Chandler factories are more than doubly oversold. It will surely pay you to get your order filed now for delivery, even if you do not want your car until next spring, as all authorities say that next spring will see the worst shortage of cars which the trade has ever experienced. If you will protect yourself, if you want to buy a good car at a right price, it will be well for you to act promptly. Remember also that we give exclusive service on the cars we sell, which may be worth a good deal to you, if you have need of continual service from your car. Repair parts in stock in North Platte for our cars, which means no expensive delays for repairs. Our ideal is to sell good cars and give good after service.  
 Good Cars J. V. ROMIGH Good Service Dealer.

Up to Saturday evening twenty-nine of the fliers who had left the Mineola field in the trans-continental derby had reached San Francisco. The remaining thirty-one, some of whom were killed or injured, failed to reach the western terminal in the allotted time and were disqualified in the race. The allotted time ended Saturday evening at sundown.

**Aviator Killed at St. Paul.**  
 Last Friday Lieut. Cameron Wright, manager of the trans-continental control station at St. Paul, Neb., was killed, and his companion Miss Helen Haggart fatally injured when an Oriole plane in which they were passengers dived to the earth from an elevation of 250 feet. The plane, which was demolished, was owned by a party in Gibbon and driven by Rex Randall, of Gibbon, a returned soldier, who suffered a broken arm. Randall had made several flights with passengers, and on the last trip had taken up Lieut. Wright and Miss Haggart.

**Robespierre's Curious Watch.**  
 The number of watches of various kinds and size and value which are now seen in the windows of the jeweler-watchmakers of Paris reminds a correspondent of the 'Eclair' of the watch which once was the property of Robespierre, and which the correspondent saw at an exhibition of curios. It surely should have long ago found its place in the Carnavalet. The watch was in the shape of a pear and of the size of one, and was made of silver. It opened in the center, the face being in the lower section, while the top section was ornamented with pear leaves wrought in silver. A watch the size of a pear, and a good deal heavier, is plainly indicative of somewhat bizarre tastes on the part of the "Friend of the People." That is, at any rate, how it strikes the 'Eclair's' correspondent.—Christian Science Monitor.

**Kitchener's Dog.**  
 Lord Kitchener's favorite dog, which he left in the hands of Admiral Grant before embarking on the cruiser Hampshire, is believed to have become a good Australian. Admiral Grant, who has been appointed first naval member of the Australian naval board, brought Kitchener's pet to the commonwealth on board the battle cruiser Australia. Ordinarily the commonwealth does not encourage the landing of cats and dogs from overseas, but Australia holds Kitchener in such dear memory that one may safely conjecture that exception will be made in this instance.

**Warblers of All Colors.**  
 Not taking into account the human beings who are sometimes referred to as warblers, you will find on looking into a bird book that there are many kinds of warblers, ranging alphabetically all the way from gray-breasted warblers to yellow-rumped warblers, says the American Forestry association, Washington.

If you had a collection of them all together they would take in about all the colors of the rainbow, yellow, orange, chestnut, black, white, green, gray, brown and other colors, with numerous shades entering into their beautiful plumage.

**Radio Telephone Useful.**  
 The extraordinary value of wireless telephony for directional purposes in connection with aircraft has been emphasized recently in its relation to night flying, says the Scientific American. It often happens of course, that in daylight inter-communication between planes, or between wireless stations and aircraft, is unnecessary, but in flying across country at night the use of the wireless telephone will certainly become more efficacious.

**Operating Under Difficulties.**  
 The Huan provincial government is operating directly the Shui Kou Shan lead silver mine, one of the largest in China. The ore is being smelted as it is mined, but the government is short of funds and the lack of sufficient capital is a serious handicap.
