ASPIRIN FOR HEADACHE

Name "Bayer" is on Genuine Aspirin-say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Headache, Colds Pain, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin toxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoaceticacidester of Salicylleacid .- Adv.

Try This Now.

"Time was, before the experts came along and, in vulgar business parlance, 'sold efficiency' to the telephone companies when the telephone was a real convenience." John Armstrong relates in Everybody's: "The historic instance | church. of the lady who rang up central and said, I am just stepping over to Mrs. Brewster's for a few minutes to get her doughnut recipe—she's Main 227 -and I'll leave the receiver off so you can hear if the baby cries and let me know.' In my home town we used to ask central where the fire was, and who was dend, and did she think there was any mail for us."

"FIDDLE-FIT"

Keep Liver and Bowels Clean and Active with "Cascarets"

Sick headache, billiousness, coated tongue, sour, gassy stomach-always trace this to torpid liver; delayed. fermenting food in the bowels.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and polsons in the bowels.

A Cascaret tonight will have you feeling clear, rosy and as fit as a fiddle by morning. They work while you sleep .- Adv.

An Inward Bent. Rob Wagner, the movie director,

RELIEF SHIP HELD UP BY ARCTIC ICE

Attempt to Reach Mission in Wales, the westernmost point of the Northernmost Alaska Again Fails.

REACH WITHIN 69 MILES

of the Havoc Wrought by Influenza-Whole Villages Are Wiped Out.

Newport.-Turned back by an impenetrable ice-field within 69 miles of his goal, Dr. John A. Marquis, general secretary of the board of home missions of the Presbyterian church of the United States, was forced to return to New York without reaching his destination at Point Barrow, Alaska, the northernmost mission in the

and sailed from Scattle July 7 to Nome, where he boarded the United States coast guard service steamer Bear, to reach Point Barrow, but for the second time within two years this doughty little craft with its hardy crew was unable to buck the terrific ice jam of the arctic. For eight days the sturdy boat battled, but finally on August 15 it was forced to turn back of that town. From here it is expected that sledges will be able to carry some of them to the needy people at Point

"Last year," says Dr. Marquis, "the Bear was able to get within 25 miles of Point Barrow, but the steady winds this year had forced the ice masses down farther south than they had been

Ice at Latitude 701/2. "Massive fields of ice were reached when we were at latitude 701/2 degrees, when we were at intitude 70% degrees. HIGH LIVING COST BEATEN charge of the Bear, declared the ice was the worst known since 1826."

about the appeal from the people there for the erection of a hospital at Point Barrow and also to study the opportunities for Presbyterian mission and school work generally in Alaska, particularly since the influenza epidemic last year wrought such havoc. He returns with interesting stories of the work and with pitiful tales of the terrible havoc wrought by the "flu," which in some sections wiped out whole villages.

On leaving Seattle July 7, Dr. Marquis took passage to the Aleutian islands and thence to Nome. At Nome for six weeks Dr. Marquis was on this stage Prof. Osterhout points out that tricity. are of all kinds-helresses, chamber- ria, the next stop was at the Diamede As an instance he cites the many plant transforms the carbon dioxide

American continent, about four hourwest of Scattle.

Upon this trip the vessel's coal supply ran low and the Bear had to put back from Cape Prince of Wales to Nome for recoaling, Leaving Nome the vessel began its journey to Point Barrow, Kotzebue sound was entered and stop was made at the village, where Dr. Marquis Brings Back Pitiful Tales the Society of Friends had excellent missions, and then the Bear wend north to Kivalina, where no mission fields are established, but which a few missionaries visit at intervals, From this point Dr. Marquis went to Point Hope, which until recently was one of the most famous whaling stations in the arctic regions. From there the great but futile attempt northward was made toward Point Barrow,

Dr. Marquis on his return trip gave special study to the conditions as lefby the influenza epidemic. As a result world operated by the Presbyterian hasbrings back with him pitiful stories of the terrible ravages wrought by Dr. Marquis left New York June 23 this epidemic among the Eskimos,

food from sunlight, air and water. passage was taken on the Bear and ing is as yet confined to the laboratory of ultra-violet rays, radium and elecgovernment vessel. From Nome Dr. many discoveries remained some time Part of our research work at Harislands, and then to Cape Prince of doubters of the practical value of elec-

tricity, and the long uphill road Edison had to travel before he gained recognition commercially.

Anent the production of nutritious food in the laboratory Prof. Osterhout, who is in no sense a visionary, but whose manner would indicate a practical hardheaded business man, says;

Several Ways to Make Sugar.

"Analyzing food we learn that the three chief components are sugar, fats and protein. Until recently it was impossible to manufacture sugar synthetically, but now we have solved the riddle in several different ways. Iron New York,-During the present agi- rust exposed to the prismatic rays of tation over the high cost of living it the sun through water makes foris interesting to note several recent maldehyde, since the rays of the sur Other ways of making sugar syn Although this process of food mak- thetically are through the emptoyment

gas and water together into sugar, and later into starch, either of which forms can be preserved.

"So much for obtaining sugar. Protein is composed of amino acids, It has been found possible in the laboratory to take the carbon dioxide of the air, water and ammonia, which is also found in the air in small quantities, to form a simple kind of protein. Now through the combination of sugar and pretein, both of which have been man ufactured in the laboratory, the necessary fat is obtained, with the resultant nutritious food.

The Great Obstacle.

"Of course one of the greatest obstacles standing in the way of the production of food through this method is in the present cost of making sugar which can only be manufactured as yet in small quantities. Our greatest competitor in this important field is the plant itself, which thus far undersells the synthetic method."

Prof. Osterhout, who has taught at many of the large universities through out the United States, and has attained an international reputation as a man of science, is a Fellow of the American Association for the Advance ment of Science and of the American Academy of Arts and Sciences. In addition to many other scientific and resor of botany since 1913.

ROAD BUILT OF EPSOM SALTS GERMANS ARE AFTER TRADE

Texas to Have Unique Highway Ten Miles Long, Say State Highway Officials.

Austin, Tex .- A road of epsom salts is an attraction Texas can soon hold out to tourists, according to the state highway department.

Ten miles of highway out of Rockport is being surfaced with a material which analyzes more than one-fourth epsom salts. The material is obtained from flats where constant evaporation of gulf water has left silt strongly impregnated with salts, among which the epsom variety predominates,

Highway engineers declare the mixture forms an excellent road surfacing material, as the salts absorb enough moisture from the air to keep the roads damp, free from dust and firm on the dryest days. One trouble, own language. however, is that the road becomes very slippery during wer weather, but dian population in that district. Ac- portion of shell and regulating the cording to the report there are no stope of the surface.

BIG GOOD ROAD BOND ISSUE

Dallas County, Texas, Votes \$6,500,000 for Construction of Complete Belt Line.

Prepared by the United States Depart-ment of Agriculture.)

The largest bond issue ever submitted in any county in Texas and one of the largest voted anywhere in the country was ratified by a big majority recently in Dallas county, Texas. It provides \$6,500,000 for a complete belt line around the county, with 12 roads radiating from Dallas to all sections and six intermediate roads connecting the radial highways. The system provides for 332 miles of road, and in addition feeder roads amounting to about one hundred miles will be improved by the decrease in mainbenance expenses. Federal aid

Building a Hard Rock Road.

amounting to \$250,000 had been altotted to Dallas county for its highway development, and it is expected that a large number of motortrucks will be assigned to assist in the construction work. The favorable reception of the big bond issue in this county is expected by officials of the bureau of public roads, United States department of agriculture, to have a favorable effect on similar proposals elsewhere. Road building in Texas is at high tide. State highway engineers estimate that more than \$20,000,000 worth of roads are now under con-

WIND HELPS ROAD BUILDERS

When Used in Construction of Highways in New Mexico Experiment is Successful.

A new method of using the wind in sand-road construction has proved so successful, that after making a ninemile experimental stretch in New Mexico, roadmakers in that state have built 80 miles of similar highways. First of all, the grass and weeds are cleared from the right of way, and then a trench is made through the sand to the clay bottom. The loose sand is deposited in stacks ten feet from either side of the cut, and the rest of the work is left to the desert winds. During the spring and fall, the winds sweep away all the sand and widen the clay strip. Then the road is graded and the work finished.

COUNTRY NEEDS MORE ROADS

Improved Highways Influence Every Branch of Economic and Financial Structure.

There is no doubt about it, the country needs more good roads. It has become an economic necessity that our roads be improved because good roads influence every branch and twig of the social, economic and financial structure of the nation.

Good roads decrease the cost of living-bad roads increase it. Good roads save labor-poor roads spend it. A community with good roads has av unlimited trade area, while a commualty with poor roads has limited trade area.

IGNORANCE PARTNER OF MUD

Motorists Complain That Farmers in Bad Roads Districts Know Nothing About Roads.

As a rule, ignorance accompanies mud. Many motorizts in bad roads districts, stopping to ask a farmer information about roads not ten miles away, have found that the farmer ad never traveled so far way and could give no directions.

Up to People Interested.

The success of state and national aid to road construction and road improvement will depend upon the interest the people take.

Earth Road Is Foundation. The earth road is the foundation

upon which all other surfaces are placed, and upon which we should depend for the load-carrying capacity.

Water for the Dog. See to it that the dag mas plenty of cold water to dr'ng in hot weather.

BITRO-PHOSPHATE IS GOOD FOR THIN **NERVOUS PEOPLE**

A PHYSICIAN'S ADVICE.

Frederick S. Kolle, M. D., Editor or: New York Physicians' "Who's Who," says that weak, nervous people who want increased weight, strength and nerve-force, should take a f-grain tablet of Bitro-Phosphate just before or during each meal

Bitro-Phosphate just before or during each meal.

This particular phosphate is the discovery of a famous French scientist, and reports of remarkable results from itsuse have recently appeared in many medical journals.

If you do not feel well; if you tire easily, do not sleep well, or are too thin; go to any good druggist and get enough Bitro-Phosphate for a two weeks supply—it costs only fifty cents a week. Eat less; chew your food thoroughly, and if at the end of a few weeks you do not feel stronger and better than you have for months; if your nerves are not steadler; if you do not sleep better and have more vim, endurance and vitality, your money will be returned, and the Bitro-Phosphate will cost you nothing.

Getting Ball for Moses.

It was at the Greek theater. "Miriam. sister of Moses," alias Ruth St. Denis, was dancing the Israelites from the Red sea to the wilderness. At left center of the stage stood two policemen listening. The actors were discussing the merits and demerits of one god, Basi, who appeared to have a big influence on the play.

"What are they doing now?" asked one cop of the other.
"Well," replied the second, "it's kinda mixed up, but the way I make

it the guy on the end with whiskers is trying to get bail for Moses." State of Unio, City of Toledo, Lucas
