

DOUBLE BEAUTY OF YOUR HAIR

"Danderine" creates mass of thick, gleamy waves

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and full of life. Just get at any drug or toilet counter a small bottle of "Danderine" for a few cents. Then moisten a soft cloth with the "Danderine" and draw this through your hair, taking one small strand at a time. Instantly, yes, immediately, you have doubled the beauty of your hair. It will be a mass, so soft, lustrous and so easy to do up. All dust, dirt and excessive oil is removed.

Let Danderine put more life, color, vigor, and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff and falling hair and help your hair to grow long, thick, strong and beautiful.—Adv.

Taming the Bolshevik Turkey. Most of us consider the turkey a domestic fowl. He is not. He is the bolshewist among farm birds. He refuses to submit to barnyard government except when feed cannot be obtained by aging.

To keep his turkeys out of the neighbor's cornfields, one farmer fitted up an attachment that at first glance looks like a turkoplane. It is merely a board fitted around the turkey's neck and tied by a heavy cord that passes under the wings.—Popular Science Monthly.

ASPIRIN FOR COLDS

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monocetate of Salicylic Acid.—Adv.

Rightly Named. Two well-dressed women called on a rather hard-up neighbor.

One of these women commented on her hostess' dress, making the poor little woman blush with pleasure.

When the call was over and the two friends were outside one said crossly: "Why did you call that thing Mrs. Blank had on a creation? It wasn't new, to say the least."

"I know. That's why I called it a creation. It was about as old as that."—St. Paul Dispatch.

TONIGHT!

Take "Cascarets" if sick, Bilious, Constipated.

Enjoy life! Straighten up! Your system is filled with liver and bowel poison which keeps your skin sallow, your stomach upset, your head dull and aching. Your meals are turning into poison and you cannot feel right. Don't stay bilious or constipated. Feel splendid always by taking Cascarets occasionally. They act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh pills. They cost so little too—Cascarets work while you sleep.—Adv.

Not So Shrinking. Grays—She seems a timid, flower-like girl.

Leigh—Well? Grays—Do you think her mother would allow her to go to the theater without a chaperon?

Leigh—Why, I think so, my boy. She drove an ambulance in France during the war.—London Answers.

Important to Mothers Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fitch*

In Use for Over 30 Years. Children Cry for Fletcher's Castoria

A man seldom forgets a favor he does another.

A woman seldom laughs at a man's jokes unless she has pretty teeth.

MONEY IN FOWLS FOR FARM WOMEN

Number of Chickens Kept Usually Determined by Time and Skill Devoted to Them.

EARNINGS OF CLUB MEMBERS

Members of Clubs Formed by Department of Agriculture Are Taught the Best and Most Up-to-Date Poultry Methods.

Prepared by the United States Department of Agriculture.

Butter and eggs furnish many farm women with most of the money they spend on themselves and their children. The amount of butter a woman sells depends pretty much on the number of cows her husband is willing to keep. The number of chickens, however, is usually determined by her skill and by the amount of time she can devote to caring for them.

Club Members Taught.

The women who belong to clubs organized by the department of agriculture and the state colleges are taught the best and most up-to-date methods of caring for poultry. The members are also helped in organizing egg and poultry circles which enable them to obtain better prices for their products. One egg circle in Hernando county, Florida, in three months sold \$1,840.70 worth of poultry and eggs. In one month the members shipped 1,080 eggs. Egg circles guarantee their products to be fresh, and there is always a good market for guaranteed eggs.

One of the home demonstration club members in Prince Edward county, Virginia, cleared \$500 last year on

A Small Flock of Good Hens Will Supply Enough Eggs for the Average Family.

eggs and chickens, and she buys all her feed. She claims 200 hens, if managed rightly, will enable a woman to keep up her table and to dress well. Next year her eggs money will be used to send her boy to college.

Two Vital Points.

A poultry club in Coffee county, Tennessee, in 12 months has sold \$345 worth of poultry from a flock of 135. The members of these clubs are taught how to weed out poor layers and how to select good setting eggs by the poultry specialists. Often the difference between success and failure for the poultryman or woman lies in knowledge on these two points.

KEEPING CLOSELY IN TOUCH

Worth While for Farmer to Keep Himself Informed of Market Conditions Before Selling.

(Prepared by the United States Department of Agriculture.)

Farmers who sell vegetables or other farm produce to consumers or retail stores find that taking pains to inform themselves on the condition of the market is very much worth while. Frequently a telephone inquiry or reference to the local paper will reveal a demand or lack of demand that seriously affects the value of one's product. The information so obtained may suggest a delay in taking the produce to town, and give the seller a considerably better price than he or she would otherwise have obtained. In advertising goods for delivery through parcel post it is particularly important that the farmer keep closely in touch with the demands and tastes of prospective customers. To advertise goods at the wrong time is to throw away money. To offer them for sale at the most favorable time at proper prices means getting the largest returns for one's labor and investment.

WOODLAND RANGE FOR FOWLS

Man Can Scratch Up Many Slugs and Worms and Catch All Kinds of Bugs and Beetles.

A special reason for woodland range for the hen is that she can scratch up so many slugs and worms, and pick bugs and beetles from rotten wood and under bark, and catch all kinds of insects in various places. These give protids which are so necessary in egg production.

DANGER IN USING KEROSENE

As Poultry Remedy It Should Never Be Given Internally—Oil Will Cause Blistering.

The use of kerosene as a poultry remedy is dangerous. It should never be given internally, as results may prove fatal. It should never be used on the fowl, as it will cause blistering of soft parts.

DISEASES WILL NOT KILL GRASSHOPPERS

Various Fungi and Bacteria Are Natural Enemies of Pest.

Insects, Like All Other Animals, Are Susceptible to Maladies and There Are Two or Three Known to Attack Them.

(By C. R. JONES, Colorado Agricultural College, Fort Collins, Colo.)

During every season several requests are received asking for information relative to diseases as a method of grasshopper control. Grasshoppers, like all other animals, are susceptible to disease and there are two or three known to attack them.

First, a fungus disease (Empusa grylli Fres), which has been reported to be successful in grasshopper control, but later experiments have proved it to be of no practical value. It appears that under favorable conditions this disease will appear, with more or less virulence, and spread with sufficient rapidity to cause the destruction of a large number of locusts.

Experiments carried on in co-operation with the division of entomology have demonstrated that the grasshopper is not susceptible to the organism when brought in contact with the ordinary form of the fungus, such as is obtained from the bodies of dead grasshoppers. In these experiments the grasshoppers were fed with the fungus, and the pure culture was spread upon their bodies, but in spite of these numerous attempts to infect them, all remained healthy.

Second, a bacterial disease (Coccobacillus acidivorans D'IJ.) was reported by D'Herelle as having worked successfully in Argentina. Later experiments with this organism, both in the Philippine Islands and in South Africa, have proved it useless.

Under artificial conditions, such as are found in a laboratory, these diseases may possibly be applied with good results, but as yet, in the field, no disease has been found by which a swarm of the hoppers in a given locality can be contaminated.

"NEEDLE-EYE" GATE USEFUL

Opening Made in Fence to Permit Farmer or Help to Pass Through and Is Animal Proof.

On many farms there is occasional need for a gate in some portion of the pasture or barnlot, yet such openings would be used so little that it is hardly worth the trouble to put up an

The "Needle-Eye" Gate.

ordinary gate. In such cases a "needle-eye" gate will make it easy for the farmer or his help to pass through a fence. Such a gate is shown in the illustration. It merely consists of two posts erected so close together that a horse or cow cannot pass between them. These posts are tied together at the top with a long bolt, while at the bottom they are boarded up for a foot or two to keep hogs or calves in. Such a gate as this is convenient for the farmer to "duck through" and is at the same time animal proof.

MUST FEED EACH INDIVIDUAL

Idea That Every Hen and Cow Must Be Fed Exactly Same Ration Is Erroneous One.

Some folks get the idea that every hen and every cow must be fed exactly the same ration. That is all a mistake, for they have different appetites and different demands. It is alright to have an ideal average ration to serve as a guide, but it must not be expected to work out individually.

WHY FOWLS EAT THEIR EGGS

Habit Usually Begins Through Some Accident and Spreads Rapidly Through Flock.

Egg eating usually begins through accident by eggs being broken or frozen and generally when it gets started in a flock egg eating becomes a serious vice, inasmuch as chickens are very fond of eggs when they have learned to eat them, and the habit quickly spreads from fowl to fowl.

SELECTION OF RIGHT BREED

In Making Choice One Must Decide Whether Eggs or Meat or Both Combined Is Desired.

Your chicken breed must be selected with a purpose in view. Do you want eggs? Do you want meat? Or do you want eggs and meat combined? Each of these purposes have breed or breeds especially.

"CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California!"—Adv.

His Excuse. "I'm going to strike!" asserted the farm hand. "There's too dod-busted much work around this place!"

"But you seem to do very little of it," we severely said, "so why should you strike?"

"It makes me tired to see anybody else—yaw-w-w!"—working," he replied.—Kansas City Star.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Natural Inference. "Sometimes I feel as if I hadn't a friend in the world," remarked the gloomy citizen.

"You probably haven't," replied the night watchman. "When a man talks like you do he generally has the kind of a disposition that prevents a man from deserving to have any friends."

YOUR COLD IS EASED AFTER THE FIRST DOSE

"Pape's Cold Compound" then breaks up a cold in a few hours

Relief comes instantly. A dose taken every two hours until three doses are taken usually breaks up a severe cold and ends all the gripe misery. The very first dose opens your clogged-up nostrils and the air passages in the head, stops nose running, relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

Don't stay stuffed-up! Quit blowing and snuffling! Clear your congested head! Nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only a few cents at any drug store. It acts without assistance, tastes nice, contains no quinine—Insist upon Pape's!—Adv.

GREEN'S AUGUST FLOWER.

Constipation invites other troubles which come speedily unless quickly checked and overcome by Green's August Flower which is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. It is a sovereign remedy used in many thousands of households all over the civilized world for more than half a century by those who have suffered with indigestion, nervous dyspepsia, sluggish liver, coming up of food, palpitation, constipation and other intestinal troubles. Sold by druggists and dealers everywhere. Try a bottle, take no substitute.—Adv.

LOCAL MATERIAL NEGLECTED

One of First Economies Engineer Makes Is Utilization of Overlooked Essentials.

When a competent engineer is engaged to look after road building and maintenance one of the first economies he makes in many cases is the utilization of local materials previously neglected or undiscovered.

American Roads Inadequate. The roads of America today are absolutely inadequate, inefficient, and antiquated. They are not designed to carry heavy traffic.

Urgent Need of Country. The most urgent necessity of our country is good roads—permanent roads that can be used twelve months in each year.

Spreader Is Necessary. The manure spreader is a necessity on the dairy farm.

GOOD ROADS

SENTIMENT FOR GOOD ROADS

Governors of Twenty-Two Western States Petition for Increased Annual Appropriation.

If the passage of the Townsend bill depended on the support from Western states the measure calling for a national system of highways would become law by an overwhelming majority, says a representative of a large rubber concern.

At Salt Lake City recently governors of 22 states signed a petition, which will be forwarded to congress, to increase immensely the annual appropriation for road-building, to be expended during the next five years.

While the Townsend bill asks for \$425,000,000, their petition calls for a billion dollars. The Western governors not only indorse the bill as men, but as governors of their respective states. This action reflects plainly what the West thinks of the necessity of highways and furnishes an influence which cannot be overlooked. The West has gone on record as being willing to stand its share of the cost of a system of nationally administered roads, and the share will be a big one.

RURAL ROADS NOT IMPROVED

Not More Than One-Fourth of 1 Per Cent of Nation's Roads Suitable for Motor Traffic.

Official figures show that there are in the United States approximately 2,500,000 miles of rural roads of which 12 per cent are classed as improved. Road engineers, however, estimate that no more than one-fourth of 1 per cent of the nation's roads are suitable for motortruck traffic. More than 6,000,000 motor vehicles are now using the highways, and of this number about 500,000 are trucks varying from less than a ton capacity to vehicles capable of hauling five to seventeen loads.

The most conspicuous example of anything approaching the efficiency of a national thoroughfare in the United States is the Lincoln highway. Organized as a private enterprise six years ago, to stimulate good-road building, the officers of the association have raised several million dollars by private subscription and have stimulated the improvement of many sections of the highway by the states and counties through which it passes.

SLIDING SHOES SAVE ROADS

Wooden Device Tightly Fastened to Rear Wheel Does Much to Prevent Ruts Forming.

After a road which has steep grades is carefully repaired, it is disconcerting to see heavy wagons going down the hills with one or both rear wheels tightly clamped by the brake, grinding

A Wide Shoe Placed Under One Rear Wheel of Each Heavy Wagon Which Descended the Steep Hills on a Road Did Much to Prevent Ruts Being Formed.

along the roadway and cutting ruts. On a stretch of road which had suffered greatly from this cause, heavy wagons were provided with a sliding shoe, which was placed under one rear wheel when descending a hill, to furnish braking action. The other wheel revolved and prevented side slip. The shoe was made of hard wood, surfaced on the bottom with sheetiron, and provided with a staple, ring and chain, by which it was attached to the wagon.—J. W. Shaw, Corlith, N. Y., in Popular Mechanics Magazine.

PISO'S

What Neighbors Say

Walden, Colo.—"I am glad to add my testimony in regard to what Dr. Pierce's Anurie Tablets have done for me. I am sure they saved my life, and if I can be instrumental in helping others I will feel well repaid. My kidneys and bladder were in very bad condition for a long time and got worse every day. I used one bottle of a well-known kidney medicine without any relief, then I took two bottles of another

remedy and used them but got worse every day. I was in terrible shape, was disturbed eight to twelve times in a night and suffered excruciating pain and there would be a thick brownish sediment. I was despondent. At last I saw 'Anurie' advertised in a Kansas City paper and I thought it just suited my case so I sent to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for a trial package, which was ten cents. I took two tablets at night and felt much better in the morning and by the second morning I didn't feel any pain at all when voiding the kidney secretion. In a week there was no sediment in the water, and it has been normal ever since. That was eighteen months ago, therefore it would be hard to make the claim for 'Anurie' too strong."—G. L. BUNDY.

When Run-down and in Need of a Tonic

Kansas City, Kans.—"About the only medicine I have ever given my little boy is Dr. Pierce's Golden Medical Discovery. He never was very strong, and being delicate would become run-down very quickly, would suffer loss of appetite. I would give him the 'Golden Medical Discovery' and it always built him up in good health. I have also given this medicine as a spring tonic for such 'Golden Medical Discovery' has no equal. I do recommend its use."—MRS. GEO. MAUL, 1042 N. 13th St.
