Bronchial Health

Health Talk No. 30 by Drs. States.
When the bronchial passages are in a vigorous state of health they throw off impurities that ordinarily discharge through the bronchial passages quickly and easily. Colds and coughs are of short duration. The bronchial tissues are sensitive, firm and active. In the late influenza epidemic when the victim had weak bronchial reaction

tion to the poisons given the bronchial passages for discharge, the result was usually fatal. Among influenza victims who developed bronchial pneumonia, the percentage of deaths from ordinary methods of treatment was six out of every ten.

Healthful bronchial passages depend upon an undisturbed and full supply of nervous energy. There is no known power for throwing off disease and developing health which equals the inherent forces of the body. The cause of nerve interference, or nerve weakness, is displacement of joints of the backbone causing pressure upon the bronchial nerves. This pressure is removed by chiropractic spinal adjustments.

NO CHARGE—There is no charge for consultation and it places you under no obligation.
