

## take the grip out of GRIPPE

Don't let grippe get too hard a grip on your system. Grippe is the result of a simple cold and may easily lead into the more dangerous influenza. OUR COLD TABLETS are designed to combat grippe as well as simple colds, and, as a matter of fact, if taken in time will stop a cold before it has a chance to run into something more dangerous. An excellent remedy to have on hands. It has all the action of quinine without the deleterious effects on your head and system and with a slight action on the bowels to remove cold germs from your system, at the same time aiding constipation. A pretty good remedy to know, and knowing it you will use it. Use it and you will be satisfied with the results.

### HIGH SCHOOL STUDENTS NEED MORE SLEEP

Supt. Trout issued the following bulletin Tuesday:

That pupils in high schools do not get enough refreshing sleep is evident to the teachers on many occasions. Pupils occasionally go to sleep of their study desks; they show by their carriage, posture, eyes and yawns that they are sleepy. They tell stories boasting of how little they sleep. They claim they do not have time to study out of school and do the other things they want to do unless they stay up too late. After studying the matter for months, the teachers of Senior and Junior high schools adopted the following recommendations to parents, pupils and teachers, looking to more regular and efficient sleep of high school pupils:

1. We accept the almost unanimous opinion of our authorities that pupils of Junior high school age need regularly not less than nine hours sleep and that those of Senior high school age need at least eight hours daily. This is the minimum.

2. We believe that this sleep should begin rather early and that it should be preceded by a period of quiet. To this end the teachers do not ordinarily endorse any school, social or other activity which keeps the pupils away from home later than nine o'clock on a school night.

3. High school pupils or teacher should never attend the second picture show on a school night.

4. To be healthful and refreshing the sleeping of every child should be done during every night of the year in a room having one or more open windows.

NOTE—By school nights we mean those which precede school day, namely, Monday, Tuesday, Wednesday and Thursday and in most cases Sunday. There is no sense in providing fine buildings, qualified teachers and adequate equipment for boys and girls who are almost asleep during the hours when they are in school.

### Basket Ball Tonight

A double-header basket ball game will be played at the Franklin auditorium this evening between the boys and girls teams of the Garden high school at Oshkosh and the local teams. The first game will start at seven-thirty.

### "Engaged by Wednesday."

Work on this play to be given shortly by the Nicaegee Camp Fire girls is progressing splendidly. It depicts a page from the lives of two young people in which an aunt and a mother figure strongly. And when all is said and done, what is more interesting than the life of young people. The girls are sparing no expense or effort to make it one of the best entertainments ever staged in North Platte. Watch for the date and the place.

### Chiros Seils Out.

Haunted by the remembrance of the two officers lying dead on the floor of his store and the Mexican he shot, coupled with the fact that he has been "marked" by friends of the Mexican whom he shot, Nick Chiros, the Greek groceryman on Front street, has sold his store to two of his countrymen, Nick Papandru and Harry Karras, and will leave town. Nick says that as long as he remains in North Platte he cannot erase from his mind the incidents of that awful evening.

### Flu Cases in Town.

Physicians report the existence of flu in town, not enough cases to cause any particular alarm, but a sufficient number to demonstrate that it is here. One physician reports six cases in one family, the regular nose bleeding kind, while other physicians say they are treating several cases each. The first case of a school attendant to be kept out on account of flu was reported Tuesday. Many children are out of school, however, on account of scarlet fever, measles and mumps.
