From Los Angeles comes the report that Dell Huntington, who has been visiting in that city for several weeks had his pocket picked and lost a purse. Fortunately he had his money in another purse and the thief got only a few unimportant papers. The former North Platte people in Los Angeles think it quite a joke that an ex-chief of police of North Platte should be the victim of a pickpocket.

Dixon's grind their own lenses.

Angus McLain spent Saturday in town while enroute from Omaha to Caspar, Wyo., where he had just purchased a shoe store. Angus is a former North Platte boy, having clerked for the Rincker Book & Drug Co. for a year or more. After receiving his discharge last year from service with the navy he went into a shoe store in Omaha which proved to be such a good thing that he is branching out with the Caspar store.

About 150 Elks attended the pool tournament banquet held at the home Friday evening, enjoyed the menu served under the supervision of Steward Kennedy and following the meal witnessed two boxing exhibitions and a wrestling match put on by local talent. The boxing exhibitions were by Simon and Lawrence and Boyer and Steel and the wrestling match by Arnold and Boyer. All three events proved interesting.

Let Dixon put an Edison in your home on small payment plan.

G. W. Trembley, familiarly called "Wash," died very suddenly at his home here Wednesday morning, aged 61 years, 9 months and 8 days. He had not been feeling well for some time but remained on the job carrying the mail on the route south of town until forced to give up a short time before his death. Death was caused from heart failure following what Dr. Kennon pronounced to be influenza.—Maxwell Telepost.

Here is an actual occurrence: A young man walked into a local clothing store and asked to see silk shirts. He selected one at \$16, and was advised that in addition to this price there was a war tax of \$1.45. "Oh, well," said the young man, "any fellow who is a fool enough to pay \$16.00 for a shirt shouldn't kick on the war tax." Circumstances of this kind are examples of the high cost of living or the cost of high living.

SOUTHERN FARMS AND RANCHES.

Mr. Farmer and Stockraiser did you ever stop to think of the number of farmers and stock raisers in the states of Nebraska, Iowa, Illinois, Wisconsin, Michigan, and other states who have shown their wisdom and foresight, by selling their high priced lands in the states just named at good figures and going down and buying lands just as good or better, at less than half the price of their former holdings, in the states of Louisiana, Mississippi, Alabama, and other southern states, where everything in the general farming line is as successfully raised as in the north, west and northwest, where stock have good pasturage continually, and where general farming, fruit and vegetable growing reaches perfection?

In addition, every day in the year may be spent out of doors in comfort which means every day a working day.

A Few Pointers

The thermometer seldom registers 90 degrees and rarely reaches 95; sun-strikes unknown.

In winter the mercury rarely goes below the freezing point.

The rain-fall is abundant and evenly distributed; the farmer can look for rain almost weekly.

Soil is sandy loam with clay sub-soil, and well drained.

No finer climate; no healthier section of the country; and it is the coming section of this continent in the matters of stock raising and general farming.

Two and three crops can be raised during the same year, on the same ground.

The winter does not consume what the summer produces.

Ten months good pasturage and twelve months abundant water supply.

No drouths nor blizzards which sometimes almost wipe out entire herds.

No costly barns necessary for winter housing; simply a shed for protection from rain.

Seventy-day feeding period carries cattle to maximum weight, as against 120-day period in the north, west and northwest.

Native food stuffs are the most economical known, and tests prove that the product is equal to the best produced elsewhere.

Contrasted With the Above You Must Remember that in the Northern, Western and Northwestern Home—

It costs time, labor and money, and requires a good portion of your acreage to raise the winter supply of food for your live stock.

It costs time, labor and money to build barns, cribs, etc., in which to store this feed.

It costs more to feed yourself, your family and your stock during these long, cold winters than in mild weather.

It costs time, labor and money to furnish your supply of winter fuel and store it away, ready for use.

A crop failure in a land of single crops means the loss of a whole year. You lose five months' valuable time each year in "getting ready" for and in being "housed up" during the winter.
