What an extraordinary food is BREAD

Not only is it the most nutritious, most economical food there is—not only is it, simply delicious with butter, jam or toasted—but innumerable delicacies and appealing dainties can be made with it.

Use BAKE-RITE Bread when trying this appetizing recipe:

STEAMED BREAD PUDDING

2 cups fresh or stale bread crumbs	1 teaspoon soda
1/2 cup chopped suet	1/2 teaspoon salt
1 cup-hot water	1/2 teaspoon powdered cinnamon
1 cup flour	1 teaspoon powdered ginger
1 cup molasses	1/2 teaspoon grated nutmeg
1 cup currants	Few blanched almonds
	1 egg

Grease a mold and decorate it with almonds. Pour hot water over bread crumbs, add molasses, suet, flour, soda, spices, currants, salt and egg well beaten. Turn into prepared mold, cover with greased paper and steam steadily for two and a half hours. Serve with hotmilk or sweet sauce.

Shilling Has Grief.

In the goodness of his heart, Capt. A. W. Shilling accepted the county chairmanship of the Near East relief committee, conscious of the fact that the situation in Armenia and Syria was such that it should appeal to all and that he would experience no trouble in securing plenty of workers to help him conduct the campaign. But in this the Captain has been sadly disappointed, for his call for workers has fallen on deaf ears and he alone is the only one who has evidenced any interest in securing funds for the destitute people of those countries.

Through The Tribune he makes an appeal for volunteers to gather quarters, halves, and dollars to relieve the destitution of the people who have been viciously maltreated by the unspeakable Turks and Kurds.

Special Meetings.

Special meetings are now in progress at the People's Mission on north Locust street at 7:45 each evening conducted by Hedwig M. Peterson, evangelist, of Colorado Springs.

Services next Sunday will be held as follows: Sunday school at 2 p. m., preaching at 3:00, and evening service as usual. Everybody welcome.

It is generally conceded that the local demand for mechanics and laborers will not be as strong this spring and summer as last year, due to a probable dropping off in building operations. Just at present there seems to be more laborers than jobs.

Scientist Was Fooled.

A few years ago Doctor Emmens, a distinguished American scientist, was convinced that he had discovered a "missing element" between gold and silver, which he called "argentaurum." He melted Mexican dollars in a crucible, dissolved the silver with nitric acid, and exhibited a residue of undeniable gold.

Explanation lay in the fact that there was originally some gold in the silver out of which the dollars were minted. This is commonly the case (owing to imperfect metallurgical processes) with the older Mexican coins.

Chinese Study Real Work.

Even a Chinese pocket dictionary contains more than 10,000 characters representing words, and if a man intends really to master Chinese he must learn to recognize them all—"a stupendous task." However, 3,000, 4,000 or 5,000 syllables are all that a Chinese of average education requires, and, if anyone will persevere until he has thoroughly conquered a thousand, he will be in a position to have some appreciation of a novel and to master the difficulties of a simple business document. But for the sincere student a thousand characters is the minimum.
