

MODEL OF DIRIGIBLE HANGAR FOR OUR NAVY

In these days of trans-Atlantic flight, stations for giant airships are imposing structures. A scale model of the mammoth dirigible hangar to be erected by the navy department at Lakehurst, N. J., is shown here. The hangar will be 800 feet long, 265 feet wide and 174 feet high.

REMARKABLE ROAD CONSTRUCTION IN KHYBER PASS

View of the roads ascending the Khyber pass, looking toward the plains of India. The upper road is the old camel caravan road leading into Afghanistan. The lower road was specially constructed last year by British engineers for motor transport.

SEARCH FOR BOMBS IN IRISH POLICE BARRACKS

British troops searching in the ruins of the Galtytrain police barracks, county Monaghan, Ireland, for bombs. Many were found. More than 150 masked and armed Sinn Feiners attacked the police barracks and fought for three hours until the barracks and an adjoining grocery store had been blown up and the police had surrendered.

HAYTI HONORS U. S. MARINES AT GRAND REVIEW

President of Hayti and marine corps officers reviewing a battalion of gendarmes in whose presence the president decorated marine corps officers for bravery. The gendarmerie of Hayti is a body of native soldiery led and taught by "noncoms" of the United States marine corps.

BURNING JAPANESE GOODS AT TIENSIN

Chinese of Tientsin participating in a great anti-Japanese demonstration and burning goods taken from Japanese shops and homes.

BACK FROM THE NEAR EAST

Dr. Regina Flood Keys of Buffalo, N. Y., who is at home on furlough from Monastir, Greece, where she is head of the American Women's hospital of the American Red Cross. During her three years abroad she has received three decorations, two from Serbia and one from Greece.

How Whales Breathe.

An eminent naturalist says concerning the breathing apparatus of the whale: "The windpipe does not communicate with the mouth; a hole is, as it were, bored right through the back of the head. Engineers would do well to copy the action of the valve of the whale's blow-hole; a more perfect piece of structure it is impossible to imagine. Day and night, asleep or awake, the whale works its breathing apparatus in such a manner that not a drop of water ever gets down into the lungs. Again, the whale must of necessity stay a much longer period under water than seals; this alone might possibly drown it, inasmuch as the lungs cannot have access to fresh air. We find that this difficulty has been anticipated and obviated by a peculiar reservoir in the venous system, which reservoir is situated at the back of the lungs."

NEW EARL OF GALLOWAY

Lord Garties, captain of the Scots Guards, who through the death of his father has just become the twelfth earl of Galloway. He was taken prisoner while badly wounded in the retreat from Mons in the early months of the war, and his health wrecked by the terrible hardships and cruelties endured while a German prisoner. He is a descendant of the founder of the Scottish Royal House of Stuart.

Discover New Crater.

Two young Swedish students of geology named Wadell and Yegberg, after an adventurous nine days' expedition in Iceland, have discovered what is believed to be the largest crater in the world, measuring eight kilometers (five miles) long and five kilometers (three and a quarter miles) wide. The two students further claim to have discovered some warm springs.

Children Given Lessons in Law.

A remarkable educational establishment is the school for judges in Paris. Here mock trials are held by pupils under the supervision of able attorneys. The whole procedure, from the issuing of a warrant for arrest to the summing up and the jury's verdict, is carried through in a businesslike manner.

LARGEST SEARCHLIGHT IN THE WORLD

This, the largest searchlight in the world, is the invention of Elmer A. Sperry. It has 1,280,000,000 beam candle power, and is so powerful that its rays will light cigarettes and melt lead at a distance of 12 feet.

GOB WHO MADE GOOD GOES TO ANNAPOLIS

Every year one hundred men from the enlisted ranks of the United States navy are selected for training at the naval academy at Annapolis, preparing them for posts as commissioned officers. This photograph shows Commander J. P. Lannon, executive officer of the U. S. S. New Mexico, handing one of the lucky sailormen of his ship an appointment to the academy.

HYDROPLANING OVER THE HIGHEST ALPS

Hydroplaning over the Wellensee, Switzerland. One can climb into a hydro on the St. Moritz lake and in a few minutes be circling high above the highest peak in the range.
