What Neighbors Say

Walden, Colo.—"I am glad to add my testimony in regard to what Dr. Pierce's Anuric Tablets have done for me. I am sure they saved my life, and if I can be instrumental in helping others I will feel well repaid. My kidneys and bladder were in very bad condition for a long time and got worse every day. I used one bottle of a well-known kidney medicine without any relief, then I took two bottles of another remedy and used them but got worse every day. I was in terrible shape, was disturbed eight to twelve times in a night and suffered excruciating pain and there would be a thick brownish sediment. I was despondent. At last I saw 'Anuric' advertised in a Kansas City paper and I thought it just suited my case so I sent Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for a trial package, which was ten cents. I took two tablets at night and felt much better in the morning and by the second morning I didn't feel any pain at all when voiding the kidney secretion. In a week there was no sediment in the water, and it has been normal ever since. That was eighteen months ago, therefore it would be hard to make the claim for 'Anuric' too strong."—G. L. BUNDY.

When Run-down and in Need of a Tonic

Kansas City, Kans.—"About the only medicine I have ever given my little boy is Dr. Pierce's Golden Medical Discovery. He never was very strong, and being delicate would become run-down very quickly, would suffer loss of appetite. I would give him the 'Golden Medical Discovery' and it always built him up in good health. I have also given this medicine as a spring tonic for such 'Golden Medical Discovery' has no equal. I do recommend its use."—MRS. GEO. MAUL, 1942 N. 13th St.

BELCHING Caused by Acid-Stomach

Let EATONIC, the wonderful modern stomach remedy, give you quick relief from disquieting belching, food-remaining, indigestion, bloated, gassy stomach, depression, heartburn and other stomach miseries. They are all caused by Acid-Stomach from which about nine people out of ten suffer in one way or another. One writes as follows: "Before I used EATONIC, I could not eat a bite without belching it right up, sour and bitter. I have not had a bit of trouble since the first 'eat'." Millions are victims of Acid-Stomach without knowing it. They are weak and ailing, have poor digestion, bodies improperly nourished although they may eat heartily. Grave disorders are likely to follow if an acid-stomach is neglected. Catarrh of the liver, intestinal congestion, gastritis, catarrh of the stomach—these are only a few of the many ailments often caused by Acid-Stomach. A sufferer from Catarrh of the Stomach of 11 years' standing writes: "I had catarrh of the stomach for 11 long years and I never found anything to do for me any good—just temporary relief—until I used EATONIC. It is a wonderful remedy and I do not want to be without it." If you are not feeling quite right—lack energy and enthusiasm and don't know just where to locate the trouble—try EATONIC and see how much better you will feel in every way. At all drug stores—a big box for 50c and your money back if you are not satisfied.

Caucasus Is Rich Country

Contains Fertile Fields and Mountains Stored With Precious Metals.

RABBIT WARREN OF HUMANITY

At One Time There Were 300 Tribes and Dialects in Region—Is Sort of Three-Ring Group of Natural Marvels.

Washington.—With various anti-bolshevik governments seeking a resting place and capital at one end of the range and fabulous oil hoards of Baku at the other, inspiring covetous imperialistic interest, the long line of mountains which separates Europe from Asia gives promise of once more attaining the headline position it so often has held throughout the ages. Made up of 400 miles of majestic peaks, in three ridges, the Caucasus stretches from northwest to southeast like a petrified wave, whose northeastern face mounts to the snow crest, but whose southwestern front, facing toward Turkey, seems dashed into countless precipices by the titanic forces of nature, says a bulletin from the National Geographic society.

The Caucasus is the most interesting rabbit warren of humanity on the globe. For uncounted ages various peoples sifted through the secluded valleys, leaving a fraction of their number in some remote spot, so that at one time El Azizi said that there were 300 tribes and dialects in the region, 650 miles long and 100 miles broad, which he called the "Mountain of Languages."

Strahy spoke of 70 races of men, some of them armed with poisoned arrows and wearing skin shoes with spiked soles. Troglodytes they were and are. The Caucasus is a sort of three-ring group of natural marvels compressed between Europe and Asia, between the Black sea and the Caspian.

Spanish to Introduce Goat-skin Clothes Here

New York.—Branch houses of Spanish manufacturers of goat-skin clothing will be established in this country. It was announced by Jose Bernatez de Usualde and Joaquin Hernandez, representatives of the firm, who arrived yesterday. Exhibitions will be given in several American cities and Spanish girl models will display the apparel. Many of the skins bear fine fur. Mr. Hernandez said, and certain grades are turned into men's clothing and women's dresses.

Names Mean Nothing

You're Merely a Number in U. S. Census Records.

Identity Lost When Individuals Become Cards With a Lot of Holes Punched in Them.

Washington.—Names mean nothing at all in the job of counting noses in the United States for the 1920 census. You have a name when you come into the big barn-like building here where 4,000 clerks are tabulating you and about 110,000,000 like you. Very soon, though, you become nothing but a card with a lot of holes punched in it. You have sex, age, nationality and a lot of other things, but no name. Your card is just as important, yet as anonymous, as the president's. In the census bureau the president isn't Woodrow Wilson. He is merely a

white man, born in America, living in Washington, head of a family, English-speaking and able to read and write. Neither king's horses nor king's men could drag your name out of the census bureau. Draft officials in 1917 tried it and failed. The census bureau gave General Crowder lots of information about the number of men between certain ages living in certain areas. But when the slacker drive was on and General Crowder, with the whole war department back of him, tried to get the names to check up against enlistments and draftees the census bureau called his attention to the law. It's not only against the law to give out such information, but enumeration sheets carrying names are destroyed after the information has been transferred to cards. A bald-headed man is soon parted.

is flanked by the Cossacks of the Don, the Kuban and the Terek, along whose banks the famous Tolstoy served as a young soldier. On the Asiatic side there are the new republics of Georgia, Azerbaijan and Armenia, partly carved from Russian, partly from Turkish lands. The people who have left the deepest impress on the Caucasus, although most of them emigrated to Turkey in 1864, are the Tcherkees or Circassians. The Tcherkees gave to the Caucasus and the fancy dress ball the Tcherkeska, the familiar skirted costume of the warlike Cossack and the lithe Georgian grandee. It is the original opera bouffe uniform, with a narrow waist and flaring skirts above soft boots without heels. This costume is also distinguished by 18 cartridge cases ranged across the chest. Martial Dress Once Worn. Formerly real cartridges gave a truly

martial aspect to the dress until the automatic revolver came into fashion. But comparative wealth and peace overtook the Georgians and the other town dwellers who wore the striking dress, and gradually these cartridges were changed for decorative imitations. Some of them were made of ebony at one end and ivory at the other. Modernity has gone even further. One of these cartridge cases is now sometimes used for a fountain pen, and the ultra-fastidious dandy sometimes has hollow decorations in whose solid gold shell is concealed rich perfume for the mustache.

The North Caucasus is not distinguished solely by legendary lore and fancy dress manhood. The broad fields, which sweep gently up toward the slopes, produce some of Russia's most abundant grain crops, and form an important field for the sale and use of modern agricultural machinery.

Smoke Evil Is Found Costly

City Dweller Nicked for \$12 to \$20 Each Year in Property Damage Alone.

HOW TO GET RID OF PLAGUE

Bureau of Mines Says Best Way is to Turn Bituminous Coal into Coke and Gas, Using Coke for Heating and Gas for Cooking.

Washington.—The smoke evil, which costs each city dweller of this country from \$12 to \$20 each year in property damage alone, cannot be abated if the people continue to use in the old way the same smoky coal, according to the bureau of mines, department of the interior. Now the bureau maintains that the best way to get rid of the smoke plague in the residential portions of the cities is to first turn the bituminous coal into coke and gas, which are smokeless, the coke being used for house heating and gas for cooking. The factories may continue as usual to use the soft coals, for it has been demonstrated that in the boiler and heating plants the coal can be burned practically smokeless. Use Smokeless Fuel. "The only way of eliminating smoke in large cities is by using smokeless fuel," says Dr. Van H. Manning, director of the bureau of mines—"a fuel that will burn without producing smoke in any equipment now in use. In the past the only smokeless fuel available in quantity for house heating was anthracite. However, anthracite is mined

in only one district in the United States and, therefore, its use is limited to the area lying within reasonable freight distance of the anthracite mines. Much the larger part of the country has to depend on soft coal. "Coke should be used for heating houses because it is a clean and convenient fuel. It eliminates smoke, reduces the necessity of cleaning the furnace and flues, requires less attention than coal, and gives a more uniform temperature in the house. By burning coke for domestic heat, more soft coal will be used in by-product plants, which save many valuable by-products that are wasted when the coal is used directly. The by-products of popular interest obtained in the coking process are gas, light oils, ammonia and tars.

By-Products of Coking. "With soft coal costing \$7 a ton turned into its by-products, you will get 5,000 cubic feet of gas valued at \$5; three gallons of light oil valued at 75 cents; 25 pounds of ammonia sulphate valued at \$1.25; nine gallons of tar worth 25 cents; and more than half a ton of coke valued at \$6.

"When our mineral supply of oil is exhausted, soft coal will be a material source of motor fuel. The light oil recovered from coking soft coal now supplies part of the ever-increasing demand for motor fuel. Germany, during part of the war, was cut off from every supply of mineral oil, and she depended entirely for her motor fuel on her coal. As a result of that condition, Germany sent most of her coal through by-product coking plants. What has been done in Germany may in the future have to be done in the United States."

AUSTRALIA "LOW" IN H. C. L.

Advance Only 48 Per Cent, 85 Per Cent in United States and 210 in Sweden.

Washington, D. C.—Living costs have advanced more in six foreign countries since 1914 than in the United States, according to a comparison of retail food prices in nine countries, including America, made public by the bureau of labor statistics. In Australia and New Zealand, however, the advance was less than in this country. The comparisons are made from the latest reports from the various countries. In August, 1919, the increase in the United States was 81 per cent, compared with 93 per cent in Canada, 139 per cent in France, 112 per cent in Norway, 116 per cent in Great Britain and 210 per cent in Sweden, while in Australia and New Zealand prices climbed but 48 per cent. April, 1919, the latest report from Italy, showed an advance of 181 per cent there, against 78 per cent in this country.

LESS MEAT IF BACK AND KIDNEYS HURT

Take a Glass of Salts to Flush Kidneys if Bladder Bothers You.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders. Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.—Adv.
