REMARKABLE RECOVERY

Extraordinary Curative Power of Lydia E. Pinkham's Vegetable Compound.

me no good at all—my pains got worse instead of better. I began taking the Vegetable Compound and felt a change from the first. Now I feel fine and advise any one going through the Change of Life to try it, for it cured me after I had given up all hopes of getting better. You can publish this and I will tell any one who writes to me the good it has done me."—Mrs. MARGARET DANZ, 743 N. 25th Street, Phila., Pa. It hardly seems possible that there is

a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Prayed for Cure Finds it After 10 Years

Food Would Sour and Boil -Teeth Like Chalk

Mr. Herbert M. Gessner writes from his home in Berlin, N. H.:

I had stomach trouble over ten years; kept getting worse. I tried everything for relief but it came back worse than ever. Last fall I got awfully bad; could only eat light loaf bread and tea. In January I got so bad that what I would eat would sour and boil; my teeth would be like chalk. I suffered terribly. I prayed every day for something to cure me. One day I read about EATONIC and told my wife to get me a box at the drug store as I was going to work at 4 p. m. I took one-third of it and began to feel relief; when it was three-fourths gone, I felt fine and when it was used up I had no pains. Wife got me another box but I have felt the pain but twice. I used five tablets out of the new box and I have no more stomach trouble. Now I write to tell you how thankful I am that I heard of EATONIC. I feel like a new man; I eat what I like, drink plenty of water, and it never hurts me at all.

Cutting Out the Cottonwoods. In many cities of the Southwest, the cottonwood trees have become a nuisance by reason of the litter which they make at certain seasons of the year from them and the matter is being met by the wholesale cutting down of these trees. Thousands of these beau-

Accepted for Life Insurance

Easily Passed Examination Although Previously Told Condition Was Hopeless

"I was so bad off with kidney trouble I had to give up my work as engineer,"
says J. B. Ragless, 210 West 60th
Street, Chicago, Ill. "My back gave
out completely. It was as weak as if

lost twenty-five pounds in weight; and had taken so many things without lief I became discouraged; in fact, I was told there was no help for me. "At last I began with Doan's Kid-ney Pills, and they made a new man of me. It wasn't any time before I was back to normal weight and had passed a life insurance examination, without any trouble. Over twelve years have since gone by and my cure is still permanent."

HOW TO PREVENT FIRES ON FARMS

All Conflagrations, Except Those of Incendiary Origin, Can Be Avoided.

GOOD POINTS TO REMEMBER

Preventable Loss of Millions of Dollars Worth of Agricultural Wealth Annually in Various Sections of Country.

Millions of dollars worth of agricultural wealth is destroyed annually by fire in the United States. The United States department of agriculture, in emphasizing the fact that all fires, except those of incendiary

The Sort of Catastrophe Which Care Can Prevent.

origin, are preventable, summarizes the points which the farmer must keep in mind, as follows:

All matches are a possible source of Smoking or striking matches in barns or stubles should be prohibited.

Endangers Life.

Open-flame lights should not be used In a garage or other building containing a gasoline engine or stored gaso-

Never test for gas leaks with a burning match.

Every open fire should be watched until it is out.

Fire attracts children; children cause many fires.

Metal Container for Rags. All oiled rags should be kept in a metal container with sir-tight metal

have metal covering.

The fire hazard should be considered in locating new buildings. Woodwork should not come in con-

tact with any chimneys. Remember that responsibility for fires rests on individuals,

Farmers' Bulletin "Fire Protection and Fire Fighting on the Farm," just reissued by the United States department of agriculture, will be sent to anyone addressing a request to the department at Washington, D. C.

UNLEDGERED INCOME IS BIG

Three Essentials, Food, Fuel and Shelter Do Not Appear on Farmer's Balance Sheet.

The farmer, unlike most men in other lines of work, has two kinds of income, one his regular cash income, the other an income that is almost never measured in dollars and cents,

Food, fuel, and shelter are three essentials of life that go to make up the part of the farmer's balance sheet. These are the things that lend safety and stability to form life; that enable the farmer to tide over bad years and hard times that would be rulnous If he had to pay cash for everything that he gets. In the case of the man on the small farm, this unledgered income is often of as great importance to the farm family as the cash income, say farm management specialists of the United States department of agriculture.

THRIFTY CONDITION OF SOWS

Animals Should Not Be Forced to Get Along on Little or Nothing and Raise Big Litters.

What sows demand is to be kept in strong, thrifty condition as a result of good feed and management if they are going to produce uniformly large litters from year to year. Although they will take care of themselves about the best of any animal on the farm, if given the chance, they should not be forced to get along on little or nothing and at the same time be expected to raise large litters.

CLEAN BEDDING IS HELPFUL

Filthy Floor in Hen House Always Soils Eggs Because Fowls Carry Dirt Into Nests.

Clean bedding on the floor of the enhouse helps to keep the eggs clean in the nest. A fifthy floor always soils the nests because the hens carry the dirt into the nests when laying and get it on the eggs.

LOSSES IN SPINACH SHIPMENTS REDUCED

Careful Handling and Packing Are Most Essential.

Occay and Deterioration in Transit Caused by Development of Slimy Soft Rot Can Be Checked by Lower Temperatures.

Losses in spinach shipments can be greatly reduced by careful handling in harvesting and packing and by effective refrigeration in transit, according to specialists in the bureau of markets, United States department of agriculture, who have been investigating the subject.

Reports show that some of the principal spinach shipping sections of the country are suffering considerable loss from decay and deterioration in transit caused by the development of slimy rot. This decay develops rapldly in transit when temperature conditions are favorable, say the bureau men. It starts at places where the leaves have been bruised or wounded and it very frequently follows attacks of blight or other field diseases. Other causes of deterioration in transit are yellowing and wilting of the leaves. Prompt handling and shipment at a ow temperature largely reduce losses from these causes,

That shipments of spinach arrive in petter condition when crushed ice is used in each package than without the ice is shown by test shipments made from Austin, Tex., by the bureng of markets during the last two cears. Where ice was used in these shipments, practically no soft rot had developed when the spinnch was removed from the car, while comparable shipments without ice had developed 8.9 per cent. Three days later the iced spinach had developed only 11.9 per cent of soft rot while that shipped without ice had developed 26.8 per cent. These shipments were made in freight or express refrigerator cars, the bunkers of which were feed in the regular way.

When barrels are used the Investigators found that several layers of crushed ice scattered through the bar-Pouring gasoline or kerosene on a rel are needed, a large layer being smouldering fire endangers life and placed on top of the spinach next to the barrel head. Holes bored in the bottom of the barrel provide drainage. Shipments in baskets or crates carry best with a layer of crushed ice in the center of the container and another layer on top of the spinach just under

> Test shipments made to determine the effect of washing spinach before shipment showed that washing has nn unfavorable effect on its keeping qualities. On removal from the car at destination, unwashed spinach showed practically no soft rot while washed spinach showed 5.5 per cent. Three days later the washed spinach had developed 24.8 per cent while the unwashed had developed only 5.7 per

LARGE PROFIT IN SPRAYING

Increase of 69% Bushels Per Acre Secured in Demonstration in Pennsylvania County.

Several potato-spraying demonstrations have been conducted by farmbureau members in Carbon County. Pa. One demonstration, in which the cost of spraying was \$15.60 an acre.

Spraying Potatoes.

gave the following results: Sprayed, 252 bushels per acre; unsprayed, 182% bushels per acre, an increase per acre of 69% bushels. With potatoes worth \$1.50 per bushel, the net profit was \$88.25 per acre.-United States Department of Agriculture,

MOST CATTLE ARE DEHORNED

Even Helfers Equipped With Fighting Paraphernalia Are Discriminated Against.

All the market-topping cattle which are sold at the largest live stock terminals are dehorned nowadays and even heifers equipped with such fighting paraphernalia are now discriminated against by the buyers.

SUITABLE SOIL FOR ALFALFA

Land Where Crimson Clover or Cow-Peas Has Been Turned Under Is Most Excellent.

Land where crimson clover or cowpeus has been grown for several years and turned under in a green state, is suitable for alfalfa when given a dressing of manure just before

FUEL SAVED BY GOOD ROADS

Wear and Tear on Trucks and Amount of Gasoline Consumed Shown in Recent Ohio Test.

A test conducted in Ohlo recently to determine the saving in gasoline from running over a good road as compared with gas consumption over bad and medium-grade roads, disclosed a surprising difference. Five new army standard "A" trucks with seven different types of road service, showed a gain of six miles per gation of fuel between the best and worst types of roads. All the trucks were empty during the test.

The trucks loaded showed that the poor road took seven times as much gasoline per mile as the good one.

The test results showed an average of 5.78 miles per gallon over a dirt road in good condition, 7.19 over fair gravel, 9,39 over good gravel, about the same over fair bituminous macadam and good brick roads, 11.44 over extra smooth brick and 11.78 over good

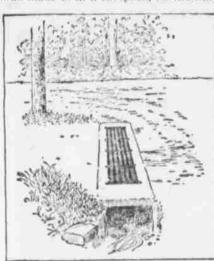

The saving to the motoring public in gasoline alone would amount to millions of dollars annually. Perhaps equal to this would be the saving in tires, which is considered as important an item of car upkeep as is gasoline. Calculating the saving in wear and tear on the mechanism of cars and trucks and also the Item of time lost by poor roads, adequate highways are undoubtedly a sane investment.

CULVERT IS EASILY CLEANED

Much Trouble Obviated by Invention of Grate or Iron Bars, Resting in Notches.

Often culverts under roads and paths become clogged with debris and frequently give trouble because they cannot be readily cleaned. The device illustrated obviates all this difficulty. It consists of a grate of iron bars supported by crosspleces which rest in notches or upon the surface of stonework or concrete, says American Agriculturist. The bars and the crosspieces should be of heavy enough material to support any load that will be driven across the grating.

The one from which this drawing was made is in a footpath, so the bars

Grating Easily Lifted.

were only 1½ inches wide and a quarter of an inch thick. The crosspieces are of the same material, bent at the ends and riveted to the bars. All that is necessary to clean such a culvert is to lift the grating and do the work with a spade or a hoe.

HIGHWAYS IN SOUTH DAKOTA

State Has 6,000 Miles of Improved Roads-Only Ten Other States Exceed in Mileage.

South Dakota has 6,000 miles of main highways; out of a total of 203, 523 in the United States, Definite road systems have been established in 44 states, either through legislative action or through state and local officials. North Dakota has 4,000 miles and Minnesota 12,700. Only ten states exceed South Dakota in mileage, while several of them have less than 1,000 miles of main highway.

BIG HIGHWAY APPROPRIATION

State of Wyoming Has Let Contracts for Improvements to Cost \$3,000,000 in 1920.

The total estimated cost of highway improvements for which the Wyom ing state highway department has let contracts, and which will be complet d during the present year, exceeds \$3,000,000. This total represents \$17 for each inhabitant of the state.

Moroccan Road Traffic.

Traffic on the (French) Moroccan highways is very large. In addition to the transport of passengers by private or public automobues, the roads permit an important movement of merchandise by motortrucks.

Cities Could Not Survive. Without roads, efties could not survive, and country-folk would be without many of the present necessities, comforts, and luxuries of life, which they are now able to enjoy.

Why Some Dealers Sell **Private Brand Roofing**

Any responsible dealer can sell Certainteed, but some dealers prefer to sell private brands. Why? Because competition is not possible-nobody else has their private brand for sale-nothing regulates in any way the profit that they can take on a private brand if you'll buy it.

If they sell Certain-teed they must limit their margin of profit to a reasonable figure. They get enough, but they can't play the hog. Every reputable dealer has a free right to buy and sell it at fair prices.

Private Brands Are a Gamble

Where's the percentage for you in private brands anyway? You don't know what they will do for you. You don't know whether the little mills that made them know how to make good roofing or not. And even roofing experts can't tell much about roofing by just looking at it.

But you know the Certain-teed reputation for high-quality products and for fair dealing. You know that Certainteed Roofing is guaranteed.

It's as easy as two and two. When you buy Certain-teed you know what you are getting. When you buy some private brand you don't.

And don't forget that any responsible dealer can get Certain-teed for you quickly from a nearby Certain-teed warehouse or jobber. He gets it when he wants it and he gets what he wants. He can afford to sell you at a fair price.

Certain-teed Products Corporation General Offices, St. Louis

Beware of the dealer who tells you he has Certain-teed, but tries to sell you a private brand. He probably wants a bigger profit.
