SEEING IS BELIEVING—If sight is defective your visual perceptions are not accurate. You mistake faces, you mis-judge distances, you mis-call words, letters, etc. If vision is correct, perceptions are reliable, you have confidence in your self. You cannot afford poor sight if we can improve it. Dixon & Son, Sight Specialists.

**Fire Department Reports to Council.**

**ASKS FOR NEW BUILDING.**

**Additional Equipment and Club Accommodations Needed.**

At a meeting of the Fire Department last Monday evening the following report was adopted and ordered submitted to the Chamber of Commerce and the City Council in response to a request from these sources that such a report be made by the fire boys.

North Platte, Nebr., July 20th 1926. To the Hon. Mayor & City Council, North Platte, Nebr. Gentlemen:—

The members of the Fire Dept. Committee in accordance with your request for suggestions for improving said department and for means to induce more men to join said department herewith submit the following suggestions and recommendations.

We recommend first that an addition two stories high be constructed across the south end of the present Fire Station, wide enough to make three (3) bedrooms above and leave space enough below for one or more stalls for the fire equipment. This would also enlarge the basement to sufficient size to store a full winter's supply of coal. The extra stall could be used either by the Water Dept. for their truck when they get one or for an extra fire truck when one is deemed necessary by the City Council.

The three bedrooms would enable more men to sleep at the station at night insuring at least 3 to 5 men would be ready to respond to any alarm and the bedroom being furnished free would attract men to join the Fire Dept. for the financial advantage if nothing else and the association of these men socially night after night together with their friends would tend to build up a feeling of unity of interest and produce an interest in the Fire Department. Man is a social animal and tends to seek the society of his fellows. Men join the Elks and other clubs in order to have some place to congregate together and swap stories or enjoy some game or amusement together and the same things which attract men to such clubs will also tend to attract them to the Fire Dept., so we offer as our second suggestion the fitting up in the large hall upstairs of a pool and billiard table and small gymnasium where of an evening the firemen and their friends can enjoy a friendly boxing match, a game of pool or billiards or feats of strength or other athletic stunts. With such things to be enjoyed free of charge by members of the Fire Department the young fellows would be found joining the Fire Dept., and playing pool or enjoying other athletic diversions at the Fire Station instead of at the pool halls and would thus be an incentive for a young man to join such an organization.

Our third suggestion would be full uniforms furnished for all firemen in good standing. As the department stands at present there is not a uniform man in it and when the boys appear on parade on the 4th of July or go to the cemetery on their memorial day there is nothing to distinguish them from the ordinary citizen. Whenever you put a man in some distinctive dress or uniform you set him apart from the ordinary man and mark him as a member of some special organization. The man in a base ball uniform feels he is one of the team and that he is expected to do his best to have his team win, so with the soldier and so also with the fireman. When a young fellow puts on a fireman's uniform he unconsciously feels he is part of the Fire Department and gives his loyalty to it.

Our fourth suggestion has to do with the equipment of the building. At the time the building was constructed a hose drying rack was constructed in the South-West corner of the South stall but it was never finished so that hose has never been dried therein but has to be stretched out on the sidewalk in front of dry. There should be a proper hook and block and tackle constructed in the top of this hose drying rack to enable the hose to be drawn up in it and we suggest that this be done at your earliest convenience. We believe that if the above suggestion and recommendations be carried out there need be no fear but that North Platte will have as sufficiently large Fire Department for any emergency which may arise and one with the best of morale and loyalty, ready to respond day or night to protect the property of our citizens from the ravages of fire.

Respectfully submitted,  
AMIEL TRAUB,  
FRED ANDERSON,  
F. W. DICK,  
Committee from Fire Department.  
This report is in the hands of the Fire Protection Committee of the City Council and an early report will be made to the Council according to R. L. Cantlin, Chairman of the Committee.

Modern Morals.  
Lady Duff Gordon said at a tea at the Ritz:

"There are young women who would rather be ultra-fashionable than anything else. In their eyes nothing matters but that."

"Two young women were lunching when a third young woman passed in the company of an elderly married pair."

"There goes Maud," murmured the first young woman. "They say that she and old Mr. Goldie spent the weekend at Atlantic City together."

"Oh!" said the second young woman in shocked tones. "Oh, what a libel on poor Maud! You know you couldn't drag her with wild horses to such a vulgar, common resort as Atlantic City."

Commercial Airlines.  
The regular commercial air line has already come to stay. At present the longest passenger air service running, or rather flying, on regular air service is between London and Paris. The distance of 250 miles is flown in about three hours, often less. The fare is at the rate of a shilling a mile, or \$67 for the trip. Even today these air passengers enjoy all the luxuries of modern travel. Nearly a score of passengers are carried in a comfortable cabin, seated in upholstered chairs. The cabin is lighted with electric candles and decorated with gilded mirrors. Several transatlantic air lines are planned. It is calculated that they can be run at a profit by charging \$500 for an air passage.—Boys' Life.

Success and Failure.  
Elihu Root on his seventy-fifth birthday reception in New York, talked philosophically about success and failure.

"After all," said a poet, "it's no disgrace to fall if you have done your best."

"Maybe not," said Mr. Root, "but all the same it's pretty rough to have to admit that the best you can do is to fall."

**HAY-FEVER AND CATARRHAL-DEAFNESS.**

**The Dependable Tractor That Burns Kerosene Completely**

The 12-25 H. P. Waterloo Boy Tractor is just the kind of machine that we like to put into the hands of our customers.

That saves motor trouble—no kerosene gets into the lubricating oil. There is no carbonizing of cylinders or fouling of spark plugs.

And it saves many dollars in fuel cost every year of its operation.

You are sure to like all of the Waterloo Boy's other features. It is simply made; easy to keep in good running order. The working parts, fully protected from dust, are placed where you can easily get at them, whenever necessary, through inspection plates and detachable casings. The motor, perfectly balanced and mounted on a solid foundation, runs with only slight vibration—no racking of mechanism. Gears are steel-cut and case-hardened—practically everlasting. It is equipped with Hyatt Roller Bearings, famous throughout the world for conserving full power. All bearing points and gears are kept constantly in a bath of oil by a perfect system of lubrication.

Be sure to come in some day soon and get fully acquainted with the Waterloo Boy
