

CARRY INSIGNIA OF HONOR

War Department Has Decided That Planes Shall Retain Distinguishing Marks Earned in War.

Buddy back on the farm is going to get an awful shock one of these days when he looks skyward during a lull in the plowing. A plane is going to appear overhead and he will instantly recognize the insignia painted on the fuselage of the stellar aero squadron that worked for his division at the time they were hoeing their way through the Argonne. In the Home Sector, Frederick J. Dartle says: "The decision of the war department to retain the distinguishing insignia will in any event make the identification of the planes easy for civilians. More and more the army planes—old as they are—are undertaking long flights. They appear unexpectedly over cities far away from their stations and many a farmer these days sees a gargantuan propelled beetle settle down in his back pasture. When an army plane comes flying by or lands near us, we will soon look for the insignia, just as everybody once looked for the tourist's dust covered auto passed. When the pedestrian sees a plane decorated with the painting of a kicking mule, a silhouetted, scythe-swinging skeleton or a witch astraddle a broomstick, he may wonder what battle record the insignia stands for. He may guess rightly that the tiny winged elephant on a plane is a sarcastic commentary on the plane's speed, but he probably would like to know whether this plane is from a burden-bearer squadron that hauled tons of bombs over the lines to drop them on German railway junctions."

MADE FEAST FOR LOBSTERS

Crustaceans No Doubt Highly Appreciated Mackerel That Seemed to Be Provided for Them.

"Charlie" is well known in his home town of Rockland. While covering his route along the south shore, he got a trade on some nice lobsters and purchased six dandles. A fat mackerel also caught his fancy while speculating in sea food and he took along the handsome specimen. Charles put the mackerel in with his lobsters and, cranking up his truck, headed for home.

"I've got something here, all right," said Charles to his better half as he carried the big bundle into the house. He dumped a crawling mass of crustaceans on the table but nowhere could he find his mackerel. Back to the auto he went but the fish had disappeared. When the lobsters were boiled and served it was noticed there was a decided flavor of mackerel to them. The diners' suspicions were aroused and, seeking authority, Charles was told that he had guessed correctly—the lobsters had eaten his mackerel. The hungry shellfish, being brought up on salted herring in the traps, were not slow to realize that an epicurean dish was being served them on the long ride home. They made the most of it, too.—Brockton Enterprise.

For Sale.

Modern eight room house, only 5 years old. Same as new. This is a bargain for some one. Will sell on easy terms. Call at the house or see me.

A CENTURY OF ANTHRACITE

First Ton of Hard Coal Reached the City of Philadelphia Just One Hundred Years Ago.

An even hundred years have elapsed since one William Wurts, a Philadelphia merchant, drove his team of mules with the first ton of anthracite through the spring freshets and bog land to the banks of the Delaware river and floated the new fuel down the river to Philadelphia on a pine log raft.

But he experienced no little difficulty in that first anthracite year of 1820 in overcoming the popular objection that the coal was "extremely slow of lighting." Pine log rafts floated only 365 tons of anthracite that year. But it fetched a price of \$12 a ton and could be delivered freight-on-raft Philadelphia at \$3—a fact that was freely advertised to attract additional capital, for, of course, there was no producing in those days.

Spring freshets and bog land and slow inflammability no longer worry operators. Silk shirts for miners are a bigger nuisance. But production in a hundred years has jumped to 80,200,000 tons, and could this year surpass the 100 million-ton mark, which was almost reached in 1917.

Reading, Wilkesbarre, Lehigh, Mauch Chunk—these names are spoken one thousand times hourly in the industrial world today, simply because there lay up in the hills of Pennsylvania a hard, black substance, one ton of which sly old William Wurts steered on a raft down the Delaware to Philadelphia, just one hundred years ago.—Wall Street Journal.

ASTRONOMY STILL AT FAULT

Men of Science Forced to Admit Exact Results From Their Calculations Are Not Possible.

The celebrated observatory at Greenwich, the place from which we reckon longitude, was founded by Charles II in 1675, mainly for the purpose of investigating the movements of the moon in the interests of navigation. Although in the intervening two and a half centuries astronomers have worked at the problem, the moon has not yet become entirely amenable to their mathematics. In a recent report of the observatory at Greenwich attention is invited to the increasing deviation between the calculated position of the moon in the sky and its real position shown by the Greenwich observations. The deviation has lately been growing in a serious manner. The error last year was more than twelve times as large as the error twenty years ago, and the average annual increase during the two decades has amounted to half a second of arc in longitude. The reason that astronomers have failed in getting exact results from calculations based on the dynamical laws of gravitation is possibly the existence of some attractive force that they have not yet discovered, although the result may also be affected by the true shape of the earth, which still awaits accurate determination.

CHURCH OF OUR SAVIOR—Episcopal

Divine Services for next Sunday. Holy Communion at 8 a. m. Children's Services 10 a. m. Morning prayer service 11 a. m. No evening service will be held during the summer.

WHY IT SUCCEEDS

Because It's For One Thing Only, and North Platte People Appreciate This.

Nothing can be good for everything. Doing one thing well brings success. Doan's Kidney Pills are for one thing only.

For weak or disordered kidneys. Ask your neighbor.

Here is North Platte evidence to prove their worth.

Mrs. Bessie Wright, 169 E. 7th St., says: "I have had more or less trouble with kidney complaint and backache. I have found nothing better than Doan's Kidney Pills to relieve me. When sewing I have had such backache that I would have to get up and stir around as it hurt me so when sitting. When I have these pills I take Doan's Kidney Pills and they soon rid me of the trouble. Doan's are certainly excellent and I am glad to recommend them."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Wright had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Fathers and Mothers OF NORTH PLATTE.

Your Schools must have the co-operation of the home if you are to get the best results from the schools. Philander Priestly Claxton, United States Commissioner of education says:

Out of the 180,000 hours between birth and the age of legal maturity, the child spends an average of only 7,000 hours in school. The rest are passed in the home or in home environment.

You can see for yourself how trifling must be the influence of the school on your child's life.

Are you going to leave his "education" up to the school any longer?

The home was the first and still is the most important institution for the education of children. All other agencies of education, however important, however well organized, are only secondary and supplementary to the home, and all of them do their work best when they remember this and cooperate with the home.

However efficient our schools may be, our children never can be fully and rightly educated until the homes do their part intelligently and faithfully.

Among the means of education in these years of childhood are also to be counted song and story and play. Every mother should know how and what to sing to children, what stories to tell them; how to make the most of the child's desire for play.

THE BEST MATERIAL FOR DEVELOPING YOUR CHILD'S MIND IS FOUND IN

The Book of Knowledge

THE CHILDREN'S ENCYCLOPEDIA

10,000 EDUCATIONAL PICTURES IN FIVE LANGUAGES 350 COLORED PLATES

English French Spanish Italian Portugueses

CURIOSITY is the beginning of all knowledge. Do you know any subject about which your child has not asked you a dozen questions? Let him ask as many as he likes, and be sure to answer them correctly. That is the parent's most important and most easily neglected duty. If you discourage your child's curiosity you will injure his mind, and the bright boy or girl becomes stupid or indifferent. Through curiosity Columbus discovered America. THE BOOK OF KNOWLEDGE is the simplest and most natural method of helping the child to educate himself. IT ANSWERS EVERY QUESTION A CHILD CAN ASK IN PLAIN AND SIMPLE LANGUAGE. So captivating is this great original work to the mind or a child that he absorbs with little effort the profound truths and great facts of the world of knowledge, while reading its delightful pages and looking at the thousands of striking educational pictures.

The BOOK OF KNOWLEDGE has been adopted by the Nebraska State Reading Circle Board and recommended for supplementary reading for every school in this state, and has the endorsement of many leading educators throughout the United States. Over 600,000 copies are in use in homes and schools.

If you have children mail this coupon today.

Tribune readers may obtain free of charge the valuable and attractive illustrated book of specimen pages from THE BOOK OF KNOWLEDGE. Let the children decide whether this new method of education interests them. Send for FREE 80-page book which contains the following subjects: The Sun and His Family; What Our Skin Is Like; How the Nail Grows on the Finger; How the Teeth Grow; The Nerves of Smell; The Marvel of Hearing; The Lords of the Wild Kingdom; A Concrete Ship in the Water; The Wonderful Birth of the Wheat; How We Dig Up Sunshine; Making the Desert Blossom; Canada, the Wonderland; The Republics of South America; The Boy Carpenter's Box of Tools; West Point and Annapolis, and others.

ILLS OF WOMEN

The subject of female ailments is of such nature that it gets little attention. This is unfortunate, but will probably never be any different. Those who wish information on the subject can usually find it in abundance, but the subject is never discussed in its relation to chiropractic because chiropractic is so new.

The troubles peculiar to women are invariably evident in the condition of the spine in the region in the small of the back. When the spinal condition needs correction the chiropractic method is of course the only common sense solution. Many stubborn cases of this form of trouble could have avoided months of weary suffering had the value of adjusting been known in the beginning.
