

He Don't Care Why the Sea is so Deep or the Water so Wet?

But, he is indeed a wise man who can eat his pie and still have it left for the future. The intelligent investor is the one who provides for his future welfare and still enjoys comfort and happiness as he goes along. The purchase of a vacant lot and the later erection of a home on the installment plan combines thrift and pleasure, the thrift of saving a portion of your earnings and the pleasure of acquiring something visible that is entirely your own. You can enjoy the possession in unknown ways, and before you know about it you will have a home from which no one can expell you and your family and around which will remain all the pleasant associations of something acquired wholly by your own efforts.

If this appeals to you let us show you the way on August 18th.

Thermopolis, Wyo., Aug. 3.

Editor Tribune:

Through your paper I want to thank those citizens of your city that visited the Thermopolis hot springs during July and August. They donned the one piece bathing suits like old timers. Thermopolis was fairly a suburb of North Platte for a few days. The Hot water plunge was the great attraction to them. It took 20 years off the age of Ira Bare and the others were brot to a realization that they were real kids. Tell your people that Thermopolis Chamber of Commerce extends the same cordial hospitality as was extended to those who were here.

Very respectfully,

WEBB ADAMS,
Secretary Chamber of Commerce.

Ships Stove to Greece.

D. J. Antonides, the North Side Hardware man, is extending his business to stricken Europe. Today he is shipping a cook stove to Greece for one of his customers. The address is Konstantinos S. Makris, Island Samos, Karlovasi, Greece. The local Greek who bought the stove says they have no stoves for cooking among his people and if this shipment arrives safely he will send others.

Notice to Water Consumers.

Owing to a breakdown to one of the old pumps used for emergency service at the plant, the water plant now has only one pump to depend upon for water until such time as arrangements can be made to install another pump. This will take at the very least two weeks time and I would therefore suggest to all water consumers that they keep their teakettles full and an extra bucket of water on hand at all times as circumstances might compel the water plant to shut down temporarily at any time. We will endeavor to give consumers a half hour notice should it be necessary to shut down for repairs, by giving one long blast of the fire whistle similar to the nine o'clock whistle but we cannot absolutely assure you that this notice will be given as it might be necessary for the safety of the plant to shut down at any time without giving any notice whatever. The city is making every effort to get another pump installed and we hope to have same in service before it will be necessary to do any work on the present pump but consumers should keep themselves prepared for a shut down at any time. In case of shut down call 44 or 99W for information. Please do not call Water Plant.

HERSHEY S. WELCH,
Water Commissioner.
