There is more excitement in one reel of "The Grim Game" than in any five reels of celluloid ever unwound. Such is the comment of a New York paper. Throughout the civilized world Houdini is recognized as the greatest of wizards and in this picture he adds to his marvelous exploits still others that have never been performed before.

DODGE BROTHERS BUILD 500,000.

On July 1, 1914, Dodge Brothers were completing their last contract as manufacturers of automobile parts. The first Dodge Brothers motor car had not yet been built.

On July 1, 1920, a great crowd of workmen assembled within the gates of the factory and let loose a mighty cheer as a glistening new roadster was swung into position on a high platform adorned with flowers and American flags.

It was Dodge Brothers motor car No. 500,000.

Production has attained the half million mark within 67 months after the first car was put on the market. It was an achievement without parallel in the automobile industry and was accordingly made the occasion of a fitting celebration. Dodge Brothers' Band played a special concert, and F. J. Haynes, vice-president and general manager delivered an address. The car was decorated with an immense floral wreath and above it hung a banner bearing the following words: **500,000 in 67 Months.**

This unparalleled achievement was made possible because of the splendid work of Dodge Brothers' organization, which means every man in the plant.

General announcement of production of 500,000 cars was withheld pending a nation wide advertising campaign in which billboards and newspapers carried only the word "One Half Million." All these advertisements have now been changed to read "One Half Million Dodge Brothers Motor Cars."

In his address to the employees, Mr. Haynes commended them on the loyalty and diligence that had made the record possible and related some interesting facts pertaining to the early history and growth of the institution.

On December 4, 1914, when the first car left the factory for the world market, Dodge Brothers works comprised little more than 20 square acres of floor space. Now the acreage has risen to 109 and additions under construction will soon bring it well above 120. Instead of a few thousand workmen, the plant now employs more than 22,000 men with families representing five times that number.

"Last month you built and shipped over sixty times as many cars as you built in December 1914," Mr. Haynes said. "The car was designed on honesty, was built on honesty and was marketed on honesty, and that is why it has been a success. You build better than you knew. You built a plant that cannot stop—it has got to go on forever."

Car No. 500,000 was completed on the afternoon of June 30th and held for the ceremonies the following noon. It was allotted to the Botterill Automobile Company, the Dodge Brothers dealers in Salt Lake City. Frank Botterill drove the car through the factory and made it the central figure of a special publicity campaign.

Adv.

BECK DRAWS PLANS.

The contract for the remodeling and repairing of the East and West ward school buildings at Lexington amounting to about \$24,000 has been let. This work is to be done according to plans and specifications just completed by Architect Beck of this city. The plans include a new steam heating system in the east ward school and a new boiler with added radiation for the west ward school.

Lovely autumn silks now on sale at The Leader Mer. Co.

POLES MUST BE REMOVED.

The City Council at its meeting Tuesday evening took a positive stand in the matter of removing obstructions from the alleys before paving begins. It ordered all stairways, poles and other obstructions removed from the alleys constituting Paving Districts 2 and 7 within thirty days. This conforms to a resolution passed some time ago which brought protests from a number of sources.

PETITION FOR RELIEF.

A number of business men and residents on west Front Street presented a petition to the City Council Tuesday evening asking relief from the flood waters that overflow that part of the city in the spring. They claimed it was due in part to the water from other streets. The matter was referred to the Street Committee for action.

PLACES FOR BOYS OR GIRLS

Every year there are a number of boys and girls from the country districts who come to North Platte to attend school and who must work for part of their expenses. It is very proper that we look after these boys and girls and help them to become well located. We would appreciate hearing from anyone who has a place where someone can work before and after school and on Saturdays and on board and room or other remuneration.

E. C. LITTEL, City Supt.

LOCAL HUMAN FLY.

Elmer Pease, a student in the North Platte High School, astonished the onlookers Monday afternoon when he scaled the Franklin Auditorium with out the aid of a rope. Last week a salaried man attempted to scale the same building in the same place but after getting part way had to be thrown a rope which aided him to the top.

Puts your palate in delightful touch with the luscious fruit flavors.

STAR BOTTLING & MERCANTILE CO.

ASK YOUR DEALER. Put up in the distinctive bottle. Originators of Better Beverages.

Every Potato Left in the Field Represents a Loss

Our Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. Designed and developed to its present standard of excellence by a prominent potato-grower, it has proved to be an especially good investment to all potato-growers who have used it.

The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers.

The vine-separating rear rack has a backward and forward mo-

tion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at the rear of the machine, while the vines and trash are deposited at one side.

Twelve roller bearings and wide tires on the wheels assure light draft.

Patented Double-Action Front Truck permits the digger to be turned in a very short space.

Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear.

Don't fail to see the Hoover Potato Digger before you harvest your potato crop; it's use means greater profits from your potato crop.

Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions.

The Leypoldt-Pennington Co., Implements

ORGANIZED 1887. Mutual Building and Loan Association, Of North Platte, Nebraska. RESOURCES JUNE 30, 1920, \$1,329,175.53.

Installment Stock.

The installment stock of this association is issued in shares of \$200.00 each and may be subscribed for at any time upon the payment of 25 cents per share entry fee and a monthly payment of \$1.00. This stock earns dividends of eight per cent per annum, compounded semi-annually and matures in 128 months. This maturity is effected by adding to the \$128.00 paid by the investor, \$72.00 to cover the earned dividends for that period.

\$10.00 per month so invested will yield in 128 months \$2000.00.

\$10.00 per month so invested will yield in 256 months \$6000.00.
