**P**OWER, sturdiness and dependability have been qualities of Buick Valve-in-Head Motor Cars from the time that the name Buick first became linked with the automobile industry. Today, in equal measure as in the past, the Buick Motor Company is dedicated to a continuance of the policy that has caused the Buick car to occupy the position it holds in the public mind.

To all that the name Buick has meant in twenty years of automobile history, the new Nineteen Twenty One Buick brings that grace of movement, that refinement of every line and feature, that sheer beauty of design which inspire a pride of ownership in a fine motor car.

The new Buick line comprises seven models, one for every possible demand. Each has the famed Buick Valve-in-Head Motor, as rugged and powerful as ever, yet refined into a mechanism of unusual quietness.

The improved radiator, hood and cowl lines give a finished touch of trimness to the body, yet without any sacrifice of Buick individuality.

A more resilient spring suspension gives these new Buick models a riding comfort as delightful as their exterior appearance is pleasing.

Each of these seven models has its own value particularly adapted to a distinct class of service. All possess those inherent Buick qualities that assure the owner the uninterrupted use of his investment.
