Inflamed Nerves Made Healthful.

Nervous inflammation, or neuritis, is inflammation of a nerve. It is usually progressive in character, the process of Nature being to fill the blood vessels of the inflamed area with serum. As the heat of the inflammation continues this serum dries up and there is degeneration of nerve and cell tissues. At this stage there is a

kind of limp paralysis.

The very nature of the disease indicates its nerve source. It is caused by misalignment of joints of the spine, causing pressure upon the nerve affected at the point of its exit between joints. Spinal adjusting removes the cause. There is repeated evidence that sufferers have found in chiropractic the thing that has freed them of suffering.
