

The Horse of Thirty-Five.
Study of the relation between the total length of life and the time required to reach maturity has brought out an interesting comparison between men and horses. A horse at five years old is said to be, comparatively, as old as a man at twenty, and doubtless may be expected to behave, according to equine standards, after the manner of the average college student following human standards. A ten-year-old horse resembles, so far as age and experience go, a man of forty, while a horse that has attained the ripe age of thirty-five is comparable with a man of ninety.—New York Evening Post.

Many Film Pictures Per Second.
Taking motion pictures at the rate of some 15,000 a second with a camera and lens, is the recent achievement of a French scientist. High-speed photography is not new, but heretofore has depended upon electric-spark shadows, without lenses, and lacking sufficient illumination for clear definition. The mechanism of the camera consists of an aluminum reel, electrically driven at 3,000 r. p. m. and winding film at 164 feet a second. At this rate pictures 2 inches high are made about 10,000 times a second, larger and smaller surfaces being exposed at respectively slower and faster speeds, says the August Popular Mechanics Magazine in an article carrying a full-page illustration.

The illuminant is a stream of high-tension electric sparks with a frequency of about 80,000 a second, produced at the focal point of a concave reflector, and kept from flaming by a current of air.

Nippon Honors Her Soldiers.
On a hill near Port Arthur, China, there looms a grand memorial tower, and just back of it are buried, in unmarked trenches, the bodies of 22,000 of the bravest soldiers of Nippon, says the Detroit Free Press. It is a shrine for every loyal Japanese. On the side of another hill lie buried all that is mortal of 15,000 Russians, and there also a monument has been reared. These were the men who died during the siege of Port Arthur, which commenced 15 years ago and continued for almost a year. Although Port Arthur was given back to China by the Japanese it remains for all practical purposes a stronghold of Nippon, and it is today more Japanese in character than Chinese, and is likely to remain so unless Japan is forced to relinquish the city by another war.

William Jason Knew.
William Jason Tucker, four-year-old son of Dr. and Mrs. E. T. Tucker of Columbus, was out riding with his parents and sister Sunday night, and an unusually large number of fireflies were seen along the country roads. His sister, age six, asked that caused the light in the fireflies. While her mother was trying to explain, William Jason remarked scornfully: "Why, Emily Margaret, anybody ought to know that. It's because they have headlights in their stomachs."—Indianapolis News.

Abiding Faith.
"He has implicit confidence in himself."
"That so?"
"Yes. Even drinks the beer he says he made himself."

ENCOURAGE BIRDS TO NEST
Only Through Them Can the Many Insect Pests Be Kept Within the Bounds of Safety.

Of all the ways of ridding our gardens, parks and farms of the insect pests that destroy fruit, grain, and even trees, none is so effective as the encouragement of birds. Most birds are naturally insect eaters, and it is really amazing to count the number of beetles, bugs, caterpillars and grubs that a small bird will devour in a day.

Andre Godard, a French naturalist, remarks in a recent number of La Nature (Paris) that agricultural plagues invariably follow the disappearance of birds, and he notes that the forests of Hungary were saved by the plucking of many artificial nests to attract the feathered enemies of the grubs that were destroying the trees.

It is true that a few birds eat fruit and grain, but even these prefer insects, and it is probably true in ninety-nine cases out of a hundred that the bird which seems to be eating the fruit is really pecking at an insect inside it.

Irving in England.
It is a pleasing sight, of a Sunday morning, when the bell is sending its sober melody across the quiet fields, to behold the peasantry in their best finery, with ruddy faces, and modest cheerfulness, thronging tranquilly along the green lanes to church; but it is still more pleasing to see them in the evenings, gathering about their cottage doors, and appearing to exult in the humble comforts and embellishments which their own hands have spread around them.—Washington Irving.

Billiken Shoes

Are made without a tack or nail; of the softest, toughest leather known, on broad, sensible, improved foot-form lasts—the most perfect child's shoe ever made—The one shoe a child outgrows.

Buy "Billiken" Shoes and let the children romp and play to their heart's content without annoyance to you; injury to the home or discomfort to themselves.

The growing feet of children are easily irritated by stiff soles or narrow shoes. "Billiken" Shoes are made by specialists in the largest shoe factory in the world, devoted exclusively to the manufacture of Children's High Grade Shoes.

The soles on "Billiken" Shoes are Pure Oak Flexible Leather—the softest and most pliable leather known, being especially prepared to withstand hard service. The absence of nails, tacks, etc., prevents the children scarring the floors and furniture. The soft soles render the shoes noiseless. Flexible soles make them as comfortable as a moccasin. The durable leather makes them as lasting as a man's heavy shoes. And they are extremely stylish.

Let Us Show You "Billikens".

Get Full Plow Value Behind Your Tractor

No matter how good your tractor may be, you have to depend upon the plow behind the tractor for the important, direct work of seed bed-making. It pays to be especially careful in choosing your tractor plow.

We offer you the opportunity to get a John Deere Tractor Plow—the plow that has more than 80 years of successful plow-making experience behind it.

If you will come in and investigate this plow we are sure you will agree with us that it is the best tractor plow for you to buy—that it will last longer than any other tractor plow and will give you better results while you are using it.

Especially, we would like to have you investigate these important features: How the genuine John Deere bottoms are particularly adapted for thorough seed bed-making and longer service.

Why the John Deere Quick Detachable Shares save time and labor and stay close-fitting.

How the simple, dependable power lift device, that raises the bottoms high and level, works without troublesome chains or sprockets.

How the bottoms reach full plowing depth immediately when lowered and are locked down to this depth while plowing.

How the unusual clearance assures steady work in trashy land.

How the simple, strong construction throughout assures maximum length of service and minimum repair costs.

How the hitch adapts it for successful use with any tractor.

We can furnish this plow in two, three or four-bottom sizes.

Remember you need the best tractor plow you can get.

Come in and investigate our John Deere Tractor Plow
