THE SIGN OF THE BIG RING.

THE MARVELOUS RECORD OF THE FORD FACTORIES.

It is a source of justifiable pride to know that the production of Ford cars for the fiscal year ending July 31st, 1920, in the factory at Highland Park, reached the astounding figure of 941,042 cars. The Ford Motor Co. of Canada of Ford, Ontario made 55,618 cars, a total for the year of 996,660 Ford cars. A year ago the factory estimated that in the following twelve months it would make one million cars. As it was averaging 3,500 cars a day, it needed just one day more to have reached the million mark.

Almost one-half the motor cars in the world are Ford cars. They are the solution of the question of economical transportation and they have added unlimited pleasure and happiness to millions of people.

Add to this that during the same twelve months, the company made 79,008 tractors and there were made at the plant in Ford, Ontario, 2,647 tractors an aggregate of 81,655 tractors. They tell us there are a little more than 300,000 farm tractors in the United States and we have built more than 144,352 Ford farm tractors. And the Fordson farm tractor makes possible the cultivation of the waste places of the earth, through its service in adding to the productivity of every acre of farm land, giving a valuable service in a hundred other ways and adding its share to the sum total of the happiness and prosperity of man.

The promise of production for 1920 will exceed, we hope by at least 25%, the marvelous record of the past year.

We take great pleasure in thanking our trade for the liberal patronage given us to make it possible for us to share in the accomplishment of this wonderful record.
